There may be many problems and difficulties you will face, but believe in our Certified Implementation Specialist - Strategic Portfolio Management exam dumps if you want to be the next beneficiary, our CIS-SPM Quiz guide is not only superior in price than any other makers in the educational field, but also are distinctly superior in the quality of our products.

ServiceNow Certified Implementation Specialist - Strategic Portfolio Management Sample Questions (Q28-Q33):

NEW QUESTION # 28

The color band at the top of the project card in Project Workspace displays what project attribute?

- A. Risk
- B. Issues
- C. State
- **D. Status**

Answer: D

Explanation:

Explanation

According to the ServiceNow documentation¹, the color band at the top of the project card in Project Workspace displays the project status. The project status is a calculated field that indicates the health of the project based on the schedule, cost, and scope variance. The color band can be green, yellow, or red, depending on the status value. The other options are incorrect because:
B: Risk: The risk is a potential problem that could affect the project or its outcome. The risk level is displayed as a circle icon on the project card, not as a color band².

C: State: The state is the current phase of the project, such as Draft, Planning, Work in Progress, or Closed. The state is displayed as a text field on the project card, not as a color band³.

D: Issues: The issues are the actual problems that affect the project or its outcome. The number of issues is displayed as a badge icon on the project card, not as a color band⁴.

NEW QUESTION # 29

How can cost plans be generated from resource assignments?

Choose 2 answers

- A. Run a scheduled job to automatically generate labor costs from resource assignments
- B. Select the 'Generate cost' button in Resource Management Workspace
- C. Update the appropriate Resource Management property
- D. Select the 'Generate labor costs' button on Project Workspace

Answer: A,D

NEW QUESTION # 30

The Business Unit field on a Project or Demand form displays values from a specific table. What type of field is this?

- A. List.
- B. Reference.
- C. Journal.
- D. Conditions.

Answer: B

Explanation:

Explanation

According to the ServiceNow documentation¹, the Business Unit field on a Project or Demand form is a reference field that displays values from the `cmn_department` table. A reference field stores a link to a record on another table, rather than storing the data directly in the field².

NEW QUESTION # 31

What is the default table that stores the idea categories that a user can select from when submitting an idea?

- A. `im_module`
- B. `im_category`
- C. `im_idea_core`
- D. `dmm_demand`

Answer: B

Explanation:

Explanation

According to the Category Configuration document, the default table that stores the idea categories that a user can select from when submitting an idea is `im_category`. This table contains the predefined categories for ideas, such as Business Process, Customer Service, or IT Service. The other options are not correct, as they are not the tables that store the idea categories. The `dmm_demand` table stores the demand records that are created from the approved ideas. The `im_module` table stores the idea modules that are used to group ideas by different criteria. The `im_idea_core` table stores the core fields of the idea records.

NEW QUESTION # 32

If a user creates a new demand from the demand workbench, what state will the system save the record in?

- A. draft
- B. open
- C. approved
- D. qualified

Answer: D

Explanation:

According to the Using the Demand Workbench document, if a user creates a new demand from the demand workbench, the system saves the record in the qualified state and displays it on the bubble chart. The other options are not correct, as they are not the default state for a new demand created from the demand workbench. The approved state is the final state for a demand that has

passed all the assessments. The open state is the initial state for a demand that is created from the Service Catalog. The draft state is the state for a demand that is created from the Demand form.

NEW QUESTION # 33

.....
