Use Genuine Salesforce Service-Con-201 Questions for your Exam Preparation

If you study with our Service-Con-201 exam questions, then you are better than others, and of course you will get more

opportunities. You will never be picked by others. You will become the target of business competition! This will be a happy event! You must understand what it means in this social opportunity. You can get your favorite project and get a higher salary! Our Service-Con-201 simulating exam can give you more than just the success of an exam, but also the various benefits that come along with successful Service-Con-201 exams.

Salesforce Certified Service Cloud Consultant Sample Questions (Q75-Q80):

NEW QUESTION # 75
Universal Support is implementing Service Cloud to replace its legacy ticketing system. The support team is geographically dispersed and consists of customer support users with varying levels of technical expertise. They are introducing Case Management, Knowledge, and Omni-Channel routing. The Support Manager aims to ensure the rollout proceeds smoothly and that users adopt the new system quickly and efficiently.
How can the Support Manager meet these requirements?

- A. Provide sandbox access to all support reps two weeks before launch and encourage peer-to-peer learning without formal training.
- B. Launch a full company-wide rollout with a short video tutorial and allow support reps to explore the system independently.
- C. Schedule instructor-led training sessions, include role-based scenarios, and implement a phased rollout starting with a pilot group.

Answer: C

Explanation:
According to Salesforce Implementation Best Practices, for complex Service Cloud rollouts (including Case, Knowledge, and Omni-Channel), the optimal approach is to:
Conduct role-based, hands-on training focused on real-life scenarios.
Use a phased rollout strategy, starting with a pilot group to collect feedback and refine processes before full deployment.
This minimizes disruption, builds confidence, and supports adoption across varying skill levels.
Option B and C lack structure, training depth, and change management alignment.
Referenced Salesforce Materials:
Service Cloud Consultant Exam Guide - Implementation Strategies Domain.
Salesforce Help: "Plan User Enablement and Phased Rollouts."
Salesforce Project Delivery Framework - Adoption and Training Best Practices.

NEW QUESTION # 76
Metrics show that Universal Containers has a high call abandonment rate using Service Cloud Voice.
Which strategy should a consultant recommend?

- A. Set up self-service Knowledge.
- B. Set up escalation rules.
- C. Set up assignment rules and case queues.

Answer: A

Explanation:
To address a high call abandonment rate, setting up self-service Knowledge in Service Cloud Voice is recommended. Providing customers with easy access to Knowledge articles enables them to find answers to their queries without the need for direct agent interaction, potentially reducing call volumes and call abandonment rates by offering alternative solutions.

NEW QUESTION # 77
Universal Containers wants to allow customers to send messages to agents in Service Console via their preferred mobile app.
Which feature should a consultant recommend?

- A. Messaging
- B. OmniStudio
- C. Einstein Bots

Answer: A

Explanation:
To enable customers to send messages via their preferred mobile app to agents in the Service Console, the "Messaging" feature in Salesforce is recommended. This feature integrates various messaging platforms with the Service Cloud, allowing agents to communicate with customers through their preferred channels, enhancing customer experience and engagement.

NEW QUESTION # 78

In which of the following scenarios should a consultant use a Screen Flow?

- A. Transfer a call to another support rep within the Service Console.
- B. Provide decision-based troubleshooting steps for support reps.
- C. Redirect a support rep to a Knowledge article during case creation.

Answer: B

Explanation:
Screen Flows are used in Salesforce to guide users through interactive, decision-based processes. For example, a Screen Flow can present troubleshooting questions and next steps to support reps, dynamically adapting based on responses. This allows for consistent issue resolution and knowledge capture.
Option B (call transfer) is handled through Omni-Channel or CTI features, not Flow.
Option C (redirecting to Knowledge) can be done with console components or Einstein Article Recommendations, not a Screen Flow.
Referenced Salesforce Materials:
Service Cloud Consultant Exam Guide - Service Cloud Solution Design Domain.
Salesforce Help: "Use Screen Flows for Guided Troubleshooting and Agent Assistance." Salesforce Trailhead: "Build Guided Service Flows."

NEW QUESTION # 79

Support agents at Universal Containers are entering customer contact information in multiple ways. Management is concerned about the high likelihood of duplicate customer contact information being entered.
What should the consultant recommend to prevent duplicate records from being created?

- A. Grant "View All Data" and instruct them to search.
- B. Implement Apex triggers for Contact.
- C. Configure and activate Duplicate Management.

Answer: C

Explanation:
To prevent duplicate customer contact information, the recommended approach is to configure and activate Salesforce's built-in Duplicate Management feature. This feature allows for the creation of duplicate rules and matching rules to identify and prevent duplicates at the point of entry. It can be applied to standard objects like Contacts and can provide users with alerts or block duplicates based on the rules set. This proactive approach ensures data quality without requiring excessive manual intervention or extensive access rights like "View All Data."

NEW QUESTION # 80

......

Be able to grasp the details of the partial-derivative, multivariate calculus Service-Con-201 that is common in machine learning papers and in many other subjects that underlie ML, including information theory and optimization algorithms.

Comprehensive, up-to-date coverage of the entire Service-Con-201 Salesforce Certified Service Cloud Consultant curriculum
