## 시험준비에 가장 좋은 Drupal-Site-Builder인기자격증 시험대비 덤프문제 최신 덤프문제

Acquia Drupal-Site-Builder인증시험은 전업적지식이 강한 인증입니다. IT업계에서 일자리를 찾고 계시다면 많은 회사에서는Acquia Drupal-Site-Builder있는지 없는지에 알고 싶어합니다. 만약Acquia Drupal-Site-Builder자격증이 있으시다면 여러분은 당연히 경쟁력향상입니다.

## 최신 Drupal 10/11 Drupal-Site-Builder 무료샘플문제 (Q21-Q26):

### 질문 # 21

Your content team needs to use `<div>` tags in the content of some articles. The default configuration does not allow for this. How can you reconfigure the site to support this request? (Select 2 options)

- A. Enable the site theme's "structural HTML" setting.
- B. Reconfigure the page's body field to use the "Full HTML" text format.
- C. Reconfigure the site's permissions; grant content editors the "Use advanced HTML" permission.
- D. Reconfigure the "Basic HTML" text format to allow the use of `<div>` tags.

정답: B,D

### 설명:

Drupal controls HTML markup through text formats and filters. The official User Guide explains that text formats such as Basic HTML and Full HTML determine which tags are allowed, and these formats exist specifically to protect the site from unsafe markup such as XSS. Because of that, if editors need to use `<div>` tags, one valid solution is to configure the content so it can use the Full HTML text format, which is the most permissive core format. Drupal also supports restricting or allowing which text formats are available on a formatted text field, including the Body field.

Another valid solution is to edit the Basic HTML text format and add `<div>` to the list of allowed HTML tags. Drupal's text format configuration page explicitly allows administrators to change the Allowed HTML tags for Basic HTML. That makes option C correct as well. Option B is incorrect because Drupal does not use a permission named "Use advanced HTML"; permissions are tied to specific text formats. Option D is incorrect because theme settings do not control which tags are allowed in editor input.

### 질문 # 22

You wish to display the "Recent content" block in the sidebar region on all the article pages only. The block should be hidden on all other pages.

How do you accomplish this?

- A. Edit Article Content type and check the "show recent content" option.
- B. In the Block layout settings, add the Recent content block to the Sidebar section and set the block to be visible for the "Article" Content type.
- C. Check the "show recent content" option in the site branding block, and set it to be visible only for Article Content type.
- D. Add the Recent content block to all pages, and hide it from non-Article pages using CSS.

정답: B

### 설명:

Drupal 10 and Drupal 11 provide block visibility conditions that allow administrators to control where blocks appear. According to Drupal's block system documentation, when placing a block through Structure # Block layout, you can configure visibility based on content types, pages, roles, or request paths.

To meet the requirement of showing the "Recent content" block only on Article pages, the correct approach is to place the block in the Sidebar region and configure its visibility condition to Content types # Article. This ensures the block is displayed only when viewing nodes of the Article content type and hidden elsewhere.

Option A is incorrect because using CSS to hide blocks is not a proper Drupal configuration and still renders the block unnecessarily. Options B and C are invalid because Drupal does not provide such settings in content type or site branding configurations.

Thus, using block visibility settings tied to the Article content type is the correct and recommended method in Drupal site building.

### 질문 # 23

You have created a new View on the development environment.

How will you export the View to the production environment?

- A. This requires development effort and cannot be done by Drupal admin interface
- B. Make the required changes to the development site. Partial export using single export option and import on the live site
- C. Use backup and migrate module to export the view
- D. Select synchronize configurations option on production environment

정답: B

#### 설명:

In Drupal 10 and Drupal 11, a View is stored as configuration, and Drupal provides a built-in Configuration Management system to move configuration between environments. According to the official Drupal User Guide, when you want to move a single configuration item (such as a View), the recommended approach is to use the Single Export and Single Import functionality available in the admin interface.

On the development site, you navigate to Configuration # Development # Configuration synchronization # Export # Single item, select View, and copy the YAML configuration. Then, on the production site, you go to Import # Single item and paste the configuration to import it.

Option A refers to full configuration synchronization, which is typically used for complete site configuration deployment, not for a single View. Option B is incorrect because Backup and Migrate is meant for database backups, not configuration transfer. Option C is incorrect because Drupal provides a UI-based method for this task.

Thus, the correct and documented approach is partial export/import using the single configuration option, making D the correct answer.

#### 질문 # 24

While building a new site, you are working with the default frontend theme. You have placed custom blocks in available regions.

After some time, you decide to install a new contributed theme, and set it as the default for the site.

After switching to the new theme, you notice that many of your blocks have disappeared!

What is the likely reason for this?

- A. The new theme's regions have different names from the regions in the old theme. Those blocks have been disabled.
- B. The new theme only allows system blocks, not custom blocks.
- C. The blocks have not yet been registered with the new theme.
- D. The blocks were built in such a way that they are not compatible with the new theme. They need to be re-created.

정답: A

#### 설명:

In Drupal 10 and Drupal 11, block placement is defined per theme. The Block Layout documentation explains that when placing a block, you are assigning it to a region in a specific theme, not globally for all themes. So when you switch the site's default theme, the new theme may have a different set of regions or different region names, and block placements from the previous theme may no longer map correctly.

Drupal's theming documentation is even more explicit: if a theme does not define a region that blocks were assigned to, those blocks are treated as assigned to an invalid region and are disabled. The Block module documentation also states that disabled blocks (blocks not assigned to any region in your theme) are never shown. This is exactly why blocks can appear to "disappear" after changing themes.

The other options do not match Drupal's documented behavior. Blocks do not need to be "registered" with a theme in this sense, contributed themes are not limited to system blocks, and custom blocks generally do not need to be recreated just because the theme changed. The issue is the theme-specific region mapping, which makes D the correct answer.

#### 질문 # 25

You have created a new Article node with a title, an image and a body field. Your site is configured to use Drupal's core search. If you search for a phrase which is used in your new article, the article is not returned in the search results. Search is otherwise working correctly.

Why is your article not appearing in the search results?

- A. You did not check the "Add to search index" checkbox when creating your article.
- B. The core search module must be configured to recognize the search term.
- C. Cron has not run since you added the article, so Drupal has not indexed the new article yet.
- D. Drupal core search does not work very well, and you should use a contributed module for search instead.

정답: C

#### 설명:

Drupal core search does not index newly created or updated content immediately in the default workflow.

According to the official Drupal core Search module overview, content actions such as creating, editing, or deleting content automatically mark the affected content items for indexing or reindexing at the next cron run.

Until cron runs, the new or changed content is not updated in the search index, so a newly created article may not appear in search results even though search is otherwise functioning correctly.

This makes option C the correct answer. The other options do not match Drupal core behavior. There is no normal site-building step where you configure core search to "recognize" a specific term, and Drupal does not provide an "Add to search index" checkbox when creating an article in core search. Also, while contributed search solutions exist, the question states that Drupal core search is already working correctly, so the missing result is best explained by indexing timing, not by a flaw requiring another module. Drupal's search documentation is explicit that cron is responsible for updating the index after content changes.

## 질문 # 26

.....

Itexamdump의 Acquia Drupal-Site-Builder덤프는 Acquia Drupal-Site-Builder시험문제변경에 따라 주기적으로 업데이트를 진행하여 덤프가 항상 가장 최신버전이도록 업데이트를 진행하고 있습니다.구매했던 Acquia Drupal-Site-Builder덤프가 업데이트되면 저희측에서 자동으로 구매시 사용한 메일주소에 업데이트된 최신버전을 발송해드리는데 해당 덤프의 구매시간이 1년미만인 분들은 업데이트서비스를 받을수 있습니다.

**Drupal-Site-Builder인기자격증 덤프공부자료** : <https://www.itexamdump.com/Drupal-Site-Builder.html>

Itexamdump 선택함으로 Acquia Drupal-Site-Builder인증시험통과는 물론 Itexamdump 제공하는 일년무료 업데이트서비스를 제공받을 수 있으며 Itexamdump의 인증덤프로 시험에서 떨어졌다면 100% 덤프비용 전액환불을 약속 드립니다, Acquia 인증Drupal-Site-Builder시험대비덤프에는 시험문제의 모든 예상문제와 시험유형이 포함되어있어 시험준비자료로서 가장 좋은 선택입니다, 고객님의 IT인증시험준비길에는 언제나 Itexamdump Drupal-Site-Builder인기자격증 덤프공부자료가 곁을 지켜주고 있습니다, Itexamdump 에서 제공해드리는 Drupal-Site-Builder인증덤프는 실제 Drupal-Site-Builder시험의 가장 최근 시험문제를 기준으로 하여 만들어진 최고품질, 최고적중율 자료입니다, Pass4Test는 응시자에게 있어서 시간이 정말 소중한다는 것을 잘 알고 있으므로 Drupal-Site-Builder덤프를 자주 업데이트 하고, 오래 되고 더 이상 사용 하지 않는 문제들은 바로 삭제해버리며 새로운 최신 문제들을 추가 합니다.

극단적으로 가까운 거리여서 이젠 그의 목소리의 울림에도 깜짝 놀랐다, Drupal-Site-Builder그는 생산라인과 연구실을 날마다 찾아가고 피부 임상 테스트를 위해 이례적으로 돈을 쏟아 부었다, Itexamdump 선택함으로 Acquia Drupal-Site-Builder인증시험통과는 물론 Itexamdump 제공하는 일년무료 업데이트서비스를 제공받을 수 있으며 Itexamdump의 인증덤프로 시험에서 떨어졌다면 100% 덤프비용 전액환불을 약속 드립니다.

## 시험패스에 유효한 최신버전 Drupal-Site-Builder인기자격증 시험대비 덤프문제 시험대비자료

Acquia 인증Drupal-Site-Builder시험대비덤프에는 시험문제의 모든 예상문제와 시험유형이 포함되어있어 시험준비자료로서 가장 좋은 선택입니다, 고객님의 IT인증시험준비길에는 언제나 Itexamdump가 곁을 지켜주고 있습니다.

Itexamdump 에서 제공해드리는 Drupal-Site-Builder인증덤프는 실제 Drupal-Site-Builder시험의 가장 최근 시험문제를 기준으로 하여 만들어진 최고품질, 최고적중율 자료입니다, Pass4Test는 응시자에게 있어서 시간이 정말 소중한다는 것을 잘 알고 있으므로 Drupal-Site-Builder덤프를 자주 업데이트 하고, 오래 되고 더 이상 사용 하지 않는 문제들은 바로 삭제해버리며 새로운 최신 문제들을 추가 합니다.
