

Latest C-BCBTP-2502 Practice Materials - C-BCBTP-2502 Discount Code

The SAP C-BCBTP-2502 exam PDF is the collection of real, valid, and updated SAP C-BCBTP-2502 practice questions. The SAP C-BCBTP-2502 PDF dumps file works with all smart devices. You can use the C-BCBTP-2502 PDF Questions on your tablet, smartphone, or laptop and start C-BCBTP-2502 exam preparation anytime and anywhere.

In line with the concept that providing the best service to the clients, our company has forged a dedicated service team and a mature and considerate service system. We not only provide the free trials before the clients purchase our C-BCBTP-2502 study materials but also the consultation service after the sale. We provide multiple functions to help the clients get a systematical and targeted learning of our C-BCBTP-2502 Study Materials. So the clients can trust our C-BCBTP-2502 study materials without doubt.

>> Latest C-BCBTP-2502 Practice Materials <<

C-BCBTP-2502 Discount Code | C-BCBTP-2502 Reliable Test Practice

According to the statistic about candidates, we find that some of them take part in the SAP exam for the first time. Considering the inexperience of most candidates, we provide some free trial for our customers to have a basic knowledge of the C-BCBTP-2502 exam guide and get the hang of how to achieve the C-BCBTP-2502 Exam Certification in their first attempt. You can download a small part of PDF demo, which is in a form of questions and answers relevant to your coming C-BCBTP-2502 exam; and then you may have a decision about whether you are content with it. Our C-BCBTP-2502 exam questions are worthy to buy.

SAP Certified Associate - Positioning SAP Business Technology Platform as part of SAP Business Suite Sample Questions (Q19-Q24):

NEW QUESTION # 19

Which SAP BTP service helps businesses automate workflows and approval processes?

- A. SAP Ariba
- B. SAP Business Network
- **C. SAP Workflow Management**
- D. SAP SuccessFactors

Answer: C

Explanation:

Automation is a key pillar of the Intelligent Enterprise, and SAP Workflow Management (now part of the broader SAP Build Process Automation suite) is the engine that drives this. This service enables businesses to digitize and automate business processes that require human intervention, such as multi-level approvals for purchase requisitions, travel requests, or HR onboarding. By moving these processes onto BTP, organizations can eliminate the "paper trail" and ensure that tasks are routed to the right people at the right time, with full auditability.

Positioning Workflow Management as a service on BTP allows for "cross-application" orchestration. For instance, a workflow could start in SAP S/4HANA with a new sales order, trigger an approval in a custom mobile app, and finally update a record in an

external CRM system. This level of flexibility is difficult to achieve within a single application silo. Furthermore, the service provides visual "Low-Code" tools that allow business process owners to modify workflows as business rules change, without needing deep technical coding skills. This agility ensures that the SAP Business Suite remains responsive to organizational shifts, making SAP Workflow Management a critical tool for improving operational efficiency and reducing process cycle times across the entire enterprise.

NEW QUESTION # 20

What is a key advantage of SAP BTP for enterprises?

- A. It does not support low-code/no-code development.
- B. It eliminates on-premise deployments completely.
- C. It restricts integration to SAP-only applications.
- **D. It enables AI-driven process automation and decision-making.**

Answer: D

Explanation:

A key advantage of SAP BTP is its ability to transform a standard "system of record" into an "intelligent enterprise" by enabling AI-driven process automation and decision-making. In the legacy SAP Business Suite environment, processes were often manual and reactive. By positioning BTP as the innovative extension layer, enterprises can now embed artificial intelligence and machine learning directly into their business workflows. This allows for the automation of high-volume, repetitive tasks-such as matching bank statements or verifying supplier invoices-while also providing intelligent recommendations for complex scenarios like demand forecasting or talent management.

Furthermore, this advantage extends to decision-making. By leveraging the advanced analytics and data management capabilities of BTP, business leaders gain access to real-time insights that were previously hidden in data silos. This shift from gut-based to data-driven decision-making allows enterprises to respond more agilely to market fluctuations. SAP BTP serves as the unified platform where developers and business users alike can leverage pre-built AI services to enhance the core functions of SAP S/4HANA, SuccessFactors, and other LoB solutions, ensuring that the enterprise remains competitive in a rapidly evolving digital economy.

NEW QUESTION # 21

Which of the following are key features of SAP BTP's Integration Suite? (Choose two).

- A. Restricted integration to SAP-only services.
- **B. Built-in API management for secure data exchange.**
- **C. Prebuilt connectors for SAP and third-party applications.**
- D. Manual data processing with no automation.

Answer: B,C

Explanation:

The SAP Integration Suite is designed to handle the complexities of a hybrid and heterogeneous IT landscape.

One of its most significant features is the availability of thousands of prebuilt connectors and integration flows for both SAP and third-party applications (such as Salesforce, ServiceNow, and various government portals). These "accelerators" significantly reduce the time and cost associated with integration projects, as developers do not have to build connections from scratch. This allows businesses to achieve a faster "time-to-value" when expanding their digital ecosystem.

Another critical feature is built-in API management. As enterprises move toward microservices and cloud-native applications, the number of APIs (Application Programming Interfaces) increases exponentially. SAP Integration Suite provides a centralized layer to govern, secure, and monitor these APIs. This ensures that data exchange between systems is not only efficient but also highly secure, protecting the enterprise from unauthorized access or data breaches. By combining prebuilt content with robust API governance, SAP BTP enables organizations to create a "composable enterprise" where different systems can be easily connected and reconfigured to meet changing business needs, moving away from the rigid, manual processes of the past.

NEW QUESTION # 22

Which SAP BTP services support AI-driven automation? (Choose two).

- A. SAP Business Network
- **B. SAP AI Core**

- C. SAP Business Process Intelligence
- D. SAP Concur

Answer: B,C

Explanation:

AI-driven automation on SAP BTP is achieved through a combination of foundational infrastructure and process analysis tools. SAP AI Core is a key service that provides a dedicated runtime for AI workloads. It allows developers to manage the entire lifecycle of machine learning models-from training to deployment- at scale. It is designed to handle large datasets and complex computations while ensuring that AI models are transparent and compliant with enterprise standards. By using SAP AI Core, businesses can embed predictive capabilities directly into their business logic.

Complementing this is SAP Business Process Intelligence (part of the SAP Signavio suite). This service uses AI to "mine" data from existing business processes to identify inefficiencies, bottlenecks, and manual tasks that are prime candidates for automation. It provides the "sight" to see where automation is needed, while SAP AI Core provides the "brain" to execute intelligent decisions. Together, these services allow an organization to move beyond simple task automation toward intelligent process transformation. SAP Concur and SAP Business Network, while benefiting from these technologies, are SaaS applications rather than the underlying services that facilitate the creation and management of AI-driven automation workflows within the BTP ecosystem.

NEW QUESTION # 23

Which market trend is driving the adoption of SAP BTP?

- A. Reduced emphasis on business automation.
- B. Increased need for data-driven decision-making.
- C. Declining use of cloud-based solutions.
- D. Decreasing focus on API-based integrations.

Answer: B

Explanation:

One of the most powerful market trends driving the global adoption of SAP BTP is the increased need for data-driven decision-making. In today's hyper-competitive landscape, "gut feeling" is no longer a viable strategy for business leaders. Organizations are sitting on mountains of data, but the challenge lies in extracting actionable insights from it. SAP BTP addresses this trend by providing a unified environment where data management, analytics, and AI converge. This allows businesses to transform raw data into a strategic asset, enabling more accurate forecasting, optimized operations, and enhanced customer experiences.

This trend is further accelerated by the "Digital Transformation" movement, where companies are moving away from monolithic, isolated systems toward agile, interconnected platforms. Businesses now demand real-time visibility across their entire value chain-from procurement to sales. SAP BTP's ability to integrate disparate systems and provide a "single source of truth" through SAP HANA Cloud and SAP Analytics Cloud directly addresses this market demand. As companies strive to become "Intelligent Enterprises," they rely on BTP to provide the technical infrastructure that supports continuous innovation, rapid automation, and the ability to pivot their business models based on data-driven evidence rather than historical assumptions.

NEW QUESTION # 24

.....

We have made classification to those faced with various difficulties, aiming at which we adopt corresponding methods to deal with. According to the statistics shown in the feedback chart, the general pass rate for latest C-BCBTP-2502 test prep is 98%, which is far beyond that of others in this field. In recent years, our C-BCBTP-2502 Exam Guide has been well received and have reached 99% pass rate with all our dedication. As one of the most authoritative question bank in the world, our study materials make assurance for you passing the C-BCBTP-2502 exam.
