Health-Fitness-and-Wellness Exam Question & Health-Fitness-and-Wellness New Practice Materials

Once downloaded from the website, you can easily study from the WGU Health, Fitness, and Wellness (HIO1) exam questions compiled by our highly experienced professionals as directed by the WGU Health-Fitness-and-Wellness exam syllabus. The WGU Health-Fitness-and-Wellness Dumps are given regular update checks in case of any update. We make sure that candidates are not

preparing for the WGU Health, Fitness, and Wellness (HIO1) exam from outdated and unreliable Health-Fitness-and-Wellness study material.

WGU Health, Fitness, and Wellness (HIO1) Sample Questions (Q22-Q27):

NEW QUESTION # 22

Which of the following have a positive impact on emotional health and wellness? Choose 3 answers.

- A. Supportive emotional environment
- B. Feelings of acceptance
- C. Treating self to shopping spree
- D. Realistic perceptions of success
- E. Dependable work schedule

Answer: A,B,D

Explanation:

Emotional health and wellness are strengthened by conditions that support stability, belonging, and balanced thinking. The three best choices are B (supportive emotional environment), D (feelings of acceptance), and E (realistic perceptions of success).

A supportive emotional environment includes safe relationships, respectful communication, and encouragement from family, friends, teachers, or teammates. Support helps people manage stress, recover from setbacks, and feel comfortable expressing emotions in healthy ways. Feelings of acceptance—being valued and included—reduce isolation and can improve self-esteem. Acceptance supports resilience because people are more likely to seek help, participate in activities, and maintain healthy relationships when they feel they belong.

Realistic perceptions of success are also key. Emotional wellness improves when goals and expectations are achievable and flexible. Realistic thinking helps prevent chronic disappointment, perfectionism, and harsh self-judgment. It encourages learning from mistakes and celebrating progress, which promotes motivation and healthier self-talk.

The other options are less reliable as "positive impact" factors. A dependable work schedule can help by providing structure, but it is not universally applicable (and for some people, work demands can increase stress). Treating yourself to a shopping spree may feel good briefly, but it is not a consistent wellness strategy and can sometimes create additional stress (financial pressure or guilt).

Wellness education emphasizes coping skills that build long-term stability—support networks, belonging, and realistic goal-setting—rather than short-term mood boosts.

NEW QUESTION # 23

Which action is an effective way of preventing the consumption of food-borne bacteria?

- A. Cook beef until it is at least medium rare
- B. Allow cooked food to remain at room temperature
- C. Microwave food until it is very hot
- D. Use a food thermometer and cooking temperature chart

Answer: D

Explanation:

The most reliable way to prevent consuming food-borne bacteria is to ensure food reaches a safe internal temperature, which is why using a food thermometer and a cooking temperature chart (C) is the best answer. Harmful bacteria can survive if food is undercooked, and appearance alone (color, texture, "hot enough," or cooking time) can be misleading. A thermometer directly measures whether the thickest part of the food has reached a temperature high enough to reduce pathogens to safe levels.

Option A sounds helpful, but "very hot" is vague and not measurable; microwaves can heat unevenly, leaving cold spots where bacteria survive. Microwaving can be safe when done properly, but without verifying temperature, it's not the most effective prevention strategy. Option B is unsafe: leaving cooked food at room temperature for extended periods allows bacteria to multiply rapidly. Option D can be risky because "medium rare" may not reach the internal temperature needed to reduce bacteria to safe levels for all people and situations—especially for ground meats, which generally require more thorough cooking because bacteria can be mixed throughout the product.

Health and wellness education emphasizes several food-safety habits: cook to safe temperatures, avoid the "danger zone" where bacteria multiply quickly (food left warm for too long), chill leftovers promptly, and reheat leftovers thoroughly. Among the listed options, the thermometer approach is the most precise and consistently recommended because it removes guesswork and directly supports safe eating.

NEW QUESTION # 24

Trying to understand the struggles that ELL students experience in a cohort is an example of which SEL competency?

- A. Social awareness
- B. Self-management
- C. Communication and leadership
- D. Executive function

Answer: A

NEW QUESTION # 25

Which immune system proteins recognize and inactivate invaders?

- A. Antibodies
- B. Cytokines
- C. Antigens
- D. Hormones

Answer: A

Explanation:

Antibodies are specialized proteins made by the immune system to recognize, bind to, and help neutralize harmful invaders such as bacteria, viruses, and other foreign substances. They are produced by B lymphocytes (B cells), which can develop into plasma cells that release large amounts of antibodies into the blood and lymph. Each antibody is designed to fit a specific target, called an antigen, much like a key fits a lock.

When antibodies bind to antigens on the surface of an invader, they help "inactivate" the threat in several important ways. First, they can neutralize pathogens directly by blocking their ability to enter body cells or release toxins. Second, antibodies can tag invaders for destruction—a process called opsonization—making it easier for immune cells such as macrophages and neutrophils to engulf and break down the pathogen. Third, antibodies can activate the complement system, a group of proteins that can puncture pathogen membranes or amplify immune responses.

It's important to distinguish antibodies from the other options. Antigens are not immune proteins that protect you; they are the foreign markers on pathogens that antibodies recognize. Cytokines are signaling proteins that coordinate immune activity (they "communicate" between cells rather than specifically binding invaders).

Hormones regulate body functions like metabolism, growth, and stress response, but they are not the primary proteins that recognize pathogens.

In health and wellness, strong immune function is supported by adequate sleep, balanced nutrition (especially protein, vitamins A/C/D, zinc), stress management, and regular physical activity—all of which help the body produce and regulate immune components, including antibodies.

NEW QUESTION # 26

Which term describes the amount of energy that can be derived from food?

- A. Vitamins
- B. Metabolism
- C. Nutrient
- D. Calories

Answer: D

Explanation:

Calories are the standard unit used to describe the amount of energy provided by food and drinks, so option B is correct. In nutrition education, calories represent how much potential energy the body can obtain from what you eat. Your body uses this energy to power essential functions such as breathing, circulation, maintaining body temperature, repairing tissues, and supporting movement and exercise.

Calories primarily come from macronutrients: carbohydrates, fats, and proteins (and also alcohol). Each macronutrient contributes a certain amount of energy per gram, and the total calorie content of a food depends on how much of these macronutrients it contains. When energy intake from calories matches energy needs, body weight tends to stay stable. When intake is consistently higher than needs, excess energy is stored (often as body fat). When intake is consistently lower than needs, the body draws on stored energy, which can lead to weight loss.

The other options are related concepts but don't mean "energy amount." A nutrient is a broad term for substances the body needs for health (including carbohydrates, fats, proteins, vitamins, minerals, and water).

Not all nutrients provide energy—vitamins and minerals, for example, support body processes but do not supply calories. Vitamins are micronutrients required in small amounts for functions like immunity, vision, and energy metabolism, but they are not a direct measure of energy. Metabolism refers to the body's chemical processes that convert food into energy and building blocks; it describes the process, not the unit of energy.

For fitness and health, focusing on both calorie balance and nutrient quality is important—choosing nutrient-dense foods helps support performance, recovery, and long-term wellness.

NEW QUESTION # 27

.....

From the time you purchase, use, and pass the Health-Fitness-and-Wellness exam, we will be with you all the time. You can seek our help anytime, anywhere. If you have experienced a very urgent problem while using Health-Fitness-and-Wellness exam simulating, you can immediately contact online customer service, you'd praise the staff of Health-Fitness-and-Wellness study engine, because they can solve any problems you have encountered while using Health-Fitness-and-Wellness exam simulating. All we do is just want you to concentrate on Health-Fitness-and-Wellness exam learning. Do not hesitate anymore. You will never regret buying Health-Fitness-and-Wellness study engine!

Health-Fitness-and-Wellness Exam Question: <https://www.actualcollection.com/Health-Fitness-and-Wellness-exam-questions.html>

In addition to the fast renewal of our Health-Fitness-and-Wellness exam prep, we also provide favorable prices to customers who buy our Health-Fitness-and-Wellness exam torrent, ActualCollection Health-Fitness-and-Wellness Exam Question are stable and reliable exam questions provider for person who need them for their exam, Health-Fitness-and-Wellness Exam Video Training, Health-Fitness-and-Wellness test material will improve the ability to accurately forecast the topic and proposition trend this year to help you pass the Health-Fitness-and-Wellness exam, So it is very important for you to prepare for the Health-Fitness-and-Wellness practice exam, you must pay more attention to the Health-Fitness-and-Wellness certification guide to help you.

Before you decide to buy, you can try a free trial version, so that you will know the quality of the WGU Health-Fitness-and-Wellness practice dumps, Adding Notebooks to a Stack.

In addition to the fast renewal of our Health-Fitness-and-Wellness exam prep, we also provide favorable prices to customers who buy our Health-Fitness-and-Wellness exam torrent, ActualCollection are stable Health-Fitness-and-Wellness and reliable exam questions provider for person who need them for their exam.

WGU Health-Fitness-and-Wellness Exam Dumps are updated on a Regular Basis

Health-Fitness-and-Wellness Exam Video Training, Health-Fitness-and-Wellness test material will improve the ability to accurately forecast the topic and proposition trend this year to help you pass the Health-Fitness-and-Wellness exam.

So it is very important for you to prepare for the Health-Fitness-and-Wellness practice exam, you must pay more attention to the Health-Fitness-and-Wellness certification guide to help you.
