Microsoft Information Protection Administrator Sample Questions (Q291-Q296):

NEW QUESTION # 291

You create a data loss prevention (DLP) policy that meets the following requirements:

Prevents guest users from accessing a sensitive document shared during a Microsoft Teams chat
Prevents guest users from accessing a sensitive document stored in a Microsoft Teams channel
Which location should you select for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Prevents guest users from accessing a sensitive document shared during a Microsoft Teams chat:

▼

- Exchange email
- OneDrive accounts
- SharePoint sites
- Teams chat and channel messages

Prevents guest users from accessing a sensitive document stored in a Microsoft Teams channel:

▼

- Exchange email
- OneDrive accounts
- SharePoint sites
- Teams chat and channel messages

Answer:

Explanation:

The screenshot shows two DLP rule configurations. The first rule is for 'Prevents guest users from accessing a sensitive document shared during a Microsoft Teams chat:'. The second rule is for 'Prevents guest users from accessing a sensitive document stored in a Microsoft Teams channel:'. In both rules, the 'OneDrive accounts' and 'SharePoint sites' options are highlighted with red boxes, indicating they are selected for the rule.

NEW QUESTION # 292

You have a Microsoft 365 E5 subscription that contains the resources shown in the following table.

Name	Type	Microsoft Location
Mail1	Email message	Microsoft Exchange Online
File1.docx	File	Microsoft SharePoint Online
File2.xlsx	File	Microsoft OneDrive

You have a retention label configured as shown in the following exhibit.

Define retention settings

When this label is applied to items, the content is retained and/or deleted based on the settings you choose here.

Retain items for a specific period

Labeled items will be retained for the period you choose.

Retention period

5 years

Start the retention period based on

When items were created

+ Create new event type

During the retention period

Retain items even if users delete

Users will be able to edit items and change or remove the label. If they delete items, we'll keep copies in a secure location. [Learn more](#)

Mark items as a record

At the end of the retention period

We'll delete items from where they're currently stored.

Trigger a disposition review

Do nothing

Items will be left in place. You'll have to manually delete them if you want them gone.

You publish the retention label and set the scope as shown in the following exhibit.

Choose locations

We'll publish the labels to the locations you choose.

All locations. Includes content in Exchange email, Office 365 groups, OneDrive and SharePoint documents.

Let me choose specific locations.

You apply the label to the resources.

Which items can you delete?

- A. Mail and File2.xlsx only
- **B. Mail, File1.docx, and File2.xlsx**
- C. Mail only
- D. Mail and File1.docx only
- E. File1.docx and File2.xlsx only

Answer: B

NEW QUESTION # 293

You need to implement a solution to encrypt email. The solution must meet the compliance requirements.

What should you create in the Exchange admin center and the Microsoft 365 compliance center? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Exchange admin center:

- A connector
- A DLP policy
- A mail flow rule
- An organization sharing relationship

Microsoft 365 compliance center:

- An auto-labeling policy
- A DLP policy
- A custom sensitive info type
- A sensitivity label

Answer:

Explanation:

Exchange admin center:

- A connector
- A DLP policy
- A mail flow rule
- An organization sharing relationship

Microsoft 365 compliance center:

- An auto-labeling policy
- A DLP policy
- A custom sensitive info type
- A sensitivity label

Explanation:

Exchange admin center:

- A connector
- A DLP policy
- A mail flow rule
- An organization sharing relationship

Microsoft 365 compliance center:

- An auto-labeling policy
- A DLP policy
- A custom sensitive info type
- A sensitivity label

Users must be able to manually select that email messages are sent encrypted. The encryption will use Office 365 Message Encryption (OME) v2. Any email containing an attachment that has the Fabrikam Confidential sensitivity label applied must be encrypted automatically by using OME.

NEW QUESTION # 294

You plan to create a custom sensitive information type that will use Exact Data Match (EDM). You need to identify what to upload to Microsoft 365, and which tool to use for the upload. What should you identify? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

The screenshot shows a Microsoft 365 compliance center interface. On the left is the Microsoft logo. On the right, there are two sections: 'Upload:' and 'Use:'. The 'Upload:' section has a dropdown menu with three options: 'Data hashes', 'Data in the XML format', and 'Digitally signed data'. The 'Use:' section has a dropdown menu with four options: 'Azure Storage Explorer', 'EDM upload agent', 'The Microsoft 365 compliance center', and 'The Set-DlpKeywordDictionary cmdlet'. The 'Data in the XML format' and 'EDM upload agent' options are highlighted with a grey background.

Answer:

Explanation:

This is a smaller version of the screenshot above, showing the same interface with the 'Data in the XML format' and 'EDM upload agent' options highlighted.

Explanation

Graphical user interface, text, application, chat or text message Description automatically generated

This is a larger, more detailed screenshot of the same interface. It shows the 'Upload:' and 'Use:' dropdown menus with their respective options. The 'Data in the XML format' and 'EDM upload agent' options are highlighted. The Microsoft logo is visible on the left side.

NEW QUESTION # 295

You need to be alerted when users share sensitive documents from Microsoft OneDrive to any users outside your company. What should you do?

- A. From the Microsoft 365 compliance center, create an insider risk policy.
- **B. From the Cloud App Security portal, create a file policy.**
- C. From the Exchange admin center, create a data loss prevention (DLP) policy.
- D. From the Azure portal, create an Azure Active Directory (Azure AD) Identity Protection policy.

Answer: B

Explanation:

File Policies allow you to enforce a wide range of automated processes using the cloud provider's APIs. Policies can be set to provide continuous compliance scans, legal eDiscovery tasks, DLP for sensitive content shared publicly, and many more use cases. Note:

There are several versions of this question in the exam. The question has two possible correct answers:

- From the Microsoft 365 compliance center, create a data loss prevention (DLP) policy.
- From the Cloud App Security portal, create a file policy.

Other incorrect answer options you may see on the exam include the following:

- From the Microsoft 365 compliance center, start a data investigation.
- From the Azure portal, create an Azure Information Protection policy.
