## 最新Arch-303題庫資訊 & Arch-303題庫資訊

目前，全球500強中的90%企業都在使用 Salesforce 公司的產品。Arch-303 認證是全球專業認證各領域中的權威認證。在IT世界裡，擁有 Salesforce Arch-303 認證已成為最合適的加更簡單的方法來達到成功。這意味著，考生應努力通過考試才能獲得認證。而 KaoGuTi 考題大師致力與為客戶提供 Arch-303 認證的全真考題及認證學習資料，能夠幫助妳一次通過 Arch-303 認證考試。

## 最新的 Salesforce Architect Arch-303 免費考試真題 (Q51-Q56):

### 問題 #51

The Client wishes to implement a third party integration that allows for free shipping If the customer Is a member of the third party service. When the customer's order is exported to the Order Management System (OMS) it also creates a custom object in order to track additional data before sending that order data to the third-party service as well.

What technical concern should the Architect raise to protect performance and stability of the site1?

- A. The customer's order data sent to a third-party and related security needs.
- B. The customer order quota and related retention or deletion needs.

- C. The custom object quota and related retention or deletion needs.
- D. The OMS having order data sent to a third party and related security needs.

答案： C

解題說明：

When integrating a third-party service that relies on custom objects in B2C Commerce, the primary technical concern is the impact on performance and site stability related to the usage of these objects. Important considerations include:

\* Custom object quota: Ensuring that the use of custom objects does not exceed platform limits, which could impact performance or even prevent new data from being stored.

\* Retention or deletion needs: Proper management of custom object lifecycle is crucial to prevent data bloat and maintain database performance, including strategies for timely deletion or archiving of old data.

Addressing these concerns is critical to maintaining the performance and stability of the site while integrating third-party services that require extensive data handling.

問題 #52

During a technical review, the Client raises a need to display product pricing on the Product Detail Page (PDP) with discounted values per promotion. The Client notes customers complained of bad user experiences in the past when they would add a product to the basket from the cached PDP and then see a higher price when they started checkout as the promotion had expired.

What should the Architect suggest be implemented for this given that performance should be minimally impact?

- A. Create a separate template or view based on the promotion.
- B. Modify the page to vary the cache by price and promotion.
- C. Remove caching of the product page during the promotion.
- D. Adjust the PDP to have a low caching period during the promotion.

答案： B

解題說明：

To address the issue of pricing discrepancies on the Product Detail Page (PDP) due to promotions expiring between the page view and checkout, the Architect should suggest modifying the page cache to vary by price and promotion (Answer B). This solution allows the cache to store different versions of the page based on the current price and applicable promotions. By doing so, it ensures that customers always see the most accurate pricing information depending on the active promotions at the time of their visit, thereby improving the user experience and reducing confusion at checkout. This method also minimizes the performance impact compared to completely disabling cache, as it still allows caching but in a more dynamically controlled manner.

問題 #53

The Client has just acquired a new brand and wants to integrate the new brand's current ecommerce site into a current realm as a new site. The acquisition has its own Enterprise Resource Planning (ERP) system for product data and inventory. The new site will use the existing realm's Order Management System (OMS) and Customer Relationship Management (CRM) system.

What two requirements does the Architect need to keep in mind when creating the technical specification document?

Choose 2 answers

- A. A new inventory Import Job must be created to manage inventory.
- B. A new order export job must be created to export orders.
- C. A new product Import Job must be created to manage products.
- D. A new customer export Job must be created to export customers.

答案： A,C

解題說明：

When integrating a new brand's ecommerce site into an existing realm, the architect needs to ensure that product data and inventory from the new brand's Enterprise Resource Planning (ERP) system are correctly managed within the realm. Therefore, creating new import jobs for products (Answer B) and inventory (Answer C) is essential. These import jobs will facilitate the synchronization of the new brand's product catalog and inventory levels with the existing Order Management System (OMS) and Customer Relationship Management (CRM) systems of the realm. Such integration is crucial for maintaining up-to-date product and inventory information across the systems, ensuring seamless operations and data consistency.

#### 問題 #54

The storefront integrates with a REST based Address verification service (AVS) that uses token based security. The sequence of calls in the API documentation for this AVS looks like the following

1. Client authentication call, which contains the merchantId and secret in a GET request and returns a token in the response.
2. Address verification call, which contains the token and the address to verify in a POST request.

Once the token is obtained, it is valid for hours and it is not needed to request a new one for subsequent address verification calls, the AVS charges for every request made no matter if it is client authentication call or address verification call.

Which three strategies could be applied to allow for efficient use of the service without compromising security? Choose 3 answers

- A. Obtain the token from a custom cache before making the client authentication call.
- B. Obtain the token from local storage of the browser and update it once it expires.
- C. Apply page caching to the client authentication controller that is used with AJAX.
- D. Use a job to store and update the token in a custom object that is used from the storefront code
- E. Use HTTPService caching for the client authentication call.

答案： A,D,E

解題說明：

To efficiently use the REST-based Address Verification Service (AVS) while maintaining security, it is crucial to manage token usage and refresh effectively. Using a custom cache to store the token (Answer C) prevents unnecessary authentication calls by reusing the valid token, thus reducing the number of chargeable requests. Implementing HTTPService caching for the client authentication call (Answer D) optimizes the performance by caching the response, thereby avoiding repetitive and unnecessary calls. Lastly, employing a scheduled job to regularly update and store the token in a custom object (Answer E) ensures that the token is always up-to-date and available for use without repeated authentication, thus optimizing the cost and efficiency of using the AVS.

#### 問題 #55

A business wants to migrate its customer service provider from provider A to provider B. Provider B offers a LINK cartridge to integrate with its commerce solution.

Which three artifacts need to be created by the Architect? Choose 3 answers

- A. Document the design of implementing a new B2C Commerce cartridge following the Industry standard best practices
- B. Document the data objects, the interface, and data synchronization frequency between the systems.
- C. Document how the customer online journey flows from landing on the page to placing of the order
- D. Document the customizations required on top of the LINK cartridge based on current commerce implementation and business needs.
- E. Document the data mapping between commerce and customer service provider.

答案： A,B,D

解題說明：

When integrating a new LINK cartridge for a customer service provider, the following documents are essential:

\* Option A (Document the design of implementing a new B2C Commerce cartridge following the industry standard best practices):

This ensures that the cartridge is implemented in a manner that is consistent with established best practices, enhancing maintainability and compatibility.

\* Option B (Document the data objects, the interface, and data synchronization frequency between the systems): It's crucial to define how data will flow between the new customer service provider and the commerce system, including the frequency of synchronization to ensure data integrity and timeliness.

\* Option D (Document the customizations required on top of the LINK cartridge based on current commerce implementation and business needs): Customizing the cartridge to fit the specific needs and existing setup of the commerce system ensures that the integration adds the intended value without disrupting existing operations.

These artifacts will guide the structured integration and customization of the LINK cartridge, ensuring it meets the business's operational and strategic needs.

#### 問題 #56

.....

我們KaoGuTi配置提供給你最優質的Salesforce的Arch-303考試考古題及答案，將你一步一步帶向成功，我們KaoGuTi Salesforce的Arch-303考試認證資料絕對提供給你一個真實的考前準備，我們針對性很強，就如同為你量身定做一般，你一定會成為一個有實力的IT專家，我們KaoGuTi Salesforce的Arch-303考試認證資料將是最適合你也是

你最需要的培訓資料，趕緊註冊我們KaoGuTi網站，相信你會有意外的收穫。

最新 Arch-303 題庫資訊: [https://www.kaoguti.com/Arch-303\\_exam-pdf.html](https://www.kaoguti.com/Arch-303_exam-pdf.html)

Salesforce 的 Arch-303 考古題覆蓋率高，可以順利通過認證考試，從而獲得證書，Salesforce Arch-303 考證 如果我們的軟體有任何更新版本，都會立即推送給客戶，在 IT 行業中 Salesforce Arch-303 認證考試是一個很重要的認證考試，但是通過 Salesforce Arch-303 認證考試是有一定難度的，選擇 Salesforce Arch-303 考古題可以保證你可以在短時間內增強考試知識，並順利高分通過考試，通過那些很多已經通過 Salesforce 的 Arch-303 認證考試的 IT 專業人員的回饋，他們的成功得益於我們網站提供的針對性測試練習題和答案給了他們很大幫助，節約了他們的寶貴的時間和精力，讓他們輕鬆順利地通過他們第一次參加的 Arch-303 - Salesforce Certified B2C Commerce Architect 認證考試，在 IT 世界裡，擁有 Salesforce Salesforce Certified B2C Commerce Architect - Arch-303 認證已成為最合適的加更簡單的方法來達到成功。

現在我已找到方向，我們還有很多東西可以研究，不過壹般情況下，他是不會隨便動用這門法術的，Salesforce 的 Arch-303 考古題覆蓋率高，可以順利通過認證考試，從而獲得證書，如果我們的軟體有任何更新版本，都會立即推送給客戶。

## Arch-303 考證 | 通過保證 | 退款保證

在 IT 行業中 Salesforce Arch-303 認證考試是一個很重要的認證考試，但是通過 Salesforce Arch-303 認證考試是有一定難度的，選擇 Salesforce Arch-303 考古題可以保證你可以在短時間內增強考試知識，並順利高分通過考試。

通過那些很多已經通過 Salesforce 的 Arch-303 認證考試的 IT 專業人員的回饋，他們的成功得益於我們網站提供的針對性測試練習題和答案給了他們很大幫助，節約了他們的寶貴的時間和精力，讓他們輕鬆順利地通過他們第一次參加的 Arch-303 - Salesforce Certified B2C Commerce Architect 認證考試。
