## Fortinet NSE 8 - Written Exam (NSE8_812) test for engine, NSE8_812 VCE test engine

Certification has become a prerequisite for employment and career growth in the Fortinet industry for reputable companies. To advance comfortably in your career, passing the NSE8_812 exam is a valuable validation of your expertise. However, many test takers struggle to find updated Fortinet NSE 8 - Written Exam (NSE8_812) (NSE8_812) dumps and fail to prepare effectively in a short period, resulting in a loss of time, money, and motivation.

Fortinet NSE8_812 Exam is a challenging certification exam that tests the competency of network security professionals in designing, implementing, and managing complex security solutions. NSE8_812 exam covers a wide range of topics, including network security design, implementation, and management, cloud security, endpoint security, and threat intelligence. Fortinet NSE 8 - Written Exam (NSE8_812) certification is highly regarded in the network security industry and can help professionals advance their careers, increase their earning potential, and gain recognition for their expertise.

## Fortinet NSE 8 - Written Exam (NSE8_812) Sample Questions (Q70-Q75):

**NEW QUESTION # 70**
Refer to the exhibits.

You are configuring a Let's Encrypt certificate to enable SSL protection to your website. When FortiWeb tries to retrieve the certificate, you receive a certificate status failed, as shown below.

Based on the Server Policy settings shown in the exhibit, which two configuration changes will resolve this issue? (Choose two.)

- A. Configure a TXT record of the domain and point to the IP address of the Virtual Server.
- B. Disable Redirect HTTP to HTTPS in the Server Policy.

- C. Remove the Web Protection Profile from this Server Policy.
- D. Enable HTTP service in the Server Policy.

**Answer: B,C**

## NEW QUESTION # 71

Which two statements are correct on a FortiGate using the FortiGuard Outbreak Protection Service (VOS)?
(Choose two.)

- A. The hash signatures are obtained from the FortiGuard Global Threat Intelligence database.
- B. The AV engine scan must be enabled to use the FortiGuard VOS feature
- C. The FortiGuard VOS can be used only with proxy-base policy inspections.
- D. If third-party AV database returns a match the scanned file is deemed to be malicious.
- E. The antivirus database queries FortiGuard with the hash of a scanned file

**Answer: A,E**

Explanation:
* C. The antivirus database queries FortiGuard with the hash of a scanned file. This is how the FortiGuard VOS service works. The FortiGate queries FortiGuard with the hash of a scanned file, and FortiGuard returns a list of known malware signatures that match the hash.
* E. The hash signatures are obtained from the FortiGuard Global Threat Intelligence database. This is where the FortiGuard VOS service gets its hash signatures from. The FortiGuard Global Threat Intelligence database is updated regularly with new malware signatures.

## NEW QUESTION # 72

Refer to The exhibit showing a FortiEDR configuration.
Based on the exhibit, which statement is correct?

- A. FortiEDR Collector will not collect OS Metadata.
- B. If an unresolved file rule is triggered, by default the file is logged but not blocked.
- C. If a malicious file is executed and attempts to establish a connection it will generate duplicate events.
- D. The presence of a cryptolocker malware at rest on the filesystem will be detected by the Ransomware Prevention security policy.

**Answer: B**

## NEW QUESTION # 73

Refer to the exhibit containing the configuration snippets from the FortiGate. Customer requirements:
* SSLVPN Portal must be accessible on standard HTTPS port (TCP/443)
* Public IP address (129.11.1.100) is assigned to portl
* Datacenter.acmecorp.com resolves to the public IP address assigned to portl The customer has a Let's Encrypt certificate that is going to expire soon and it reports that subsequent attempts to renew that certificate are failing.
Reviewing the requirement and the exhibit, which configuration change below will resolve this issue?

- A. □
- B. □
- C. □
- D. □

**Answer: B**

Explanation:
https://docs.fortinet.com/document/fortigate/7.4.1/administration-guide/822087/automatically-provision-a- certificate

## NEW QUESTION # 74

A customer wants to use the FortiAuthenticator REST API to retrieve an SSO group called SalesGroup. The following API call is being made with the 'curl' utility:

Which two statements correctly describe the expected behavior of the FortiAuthenticator REST API? (Choose two.)

- A. Only users with the "Full permission" role can access the REST API
- B. If the REST API web service access key is lost, it cannot be retrieved and must be changed.
- C. This API call will fail because it requires that API version 2
- D. The syntax is incorrect because the API calls needs the get method.

**Answer: C,D**

Explanation:

To retrieve an SSO group called SalesGroup using the FortiAuthenticator REST API, the following issues need to be fixed in the API call:

The API version should be v2, not v1, as SSO groups are only supported in version 2 of the REST API.

The HTTP method should be GET, not POST, as GET is used to retrieve information from the server, while POST is used to create or update information on the server. Therefore, a correct API call would look like this: curl -X GET -H "Authorization: Bearer <token>" https://fac.example.com/api/v2/sso/groups/SalesGroup References:
