NEW QUESTION # 74

The free mobility function allows users to obtain the consistent network access policy regardless of their location and IP address. Free mobility requires the network to be made up entirely of Huawei devices.

- A. True
- B. False

Answer: B

Explanation:

Explanation

The free mobility function allows users to obtain the consistent network access policy regardless of their location and IP address, but it does not require the network to be made up entirely of Huawei devices.

According to the Huawei CloudCampus Solution Description, free mobility is supported on a hybrid network consisting of Huawei and third-party devices, and the authentication point can be deployed on third-party devices.

NEW QUESTION # 76

Which of the following are the common deployment modes used by the CloudCampus Solution to Implement plug-and-play of devices?

- A. QR code scanning for deployment
- B. DHCP Option 148
- C. Registration query center deployment

Answer: A,B,C

Explanation:

Explanation

CloudCampus Solution is a cloud-based network management platform that provides plug-and-play of devices using three common deployment modes: QR code scanning for deployment, DHCP Option 148, and registration query center deployment. QR code scanning for deployment allows users to scan the QR code on the device label using a mobile app and automatically add the device to the cloud platform. DHCP Option 148 allows devices to obtain the cloud platform address from a DHCP server and automatically register with the cloud platform. Registration query center deployment allows devices to obtain the cloud platform address from a registration query center server and automatically register with the cloud platform. These deployment modes simplify the network configuration and management process and reduce the OPEX.
