It also covers key concepts such as cloud computing, software-defined infrastructure, and automation. Candidates who pass the exam will be able to demonstrate a deep understanding of these topics, making them highly valuable to organizations that use hybrid cloud solutions.

## HPE Hybrid Cloud Solutions Sample Questions (Q31-Q36):

### NEW QUESTION # 31

Which new feature is provided by the Storage Management utility v4?

- A. automatic installation of new recommended firmware versions
- B. automatic file classification
- C. autonomic
- D. easy switching of active firmware versions

**Answer: D**

Explanation:

Explanation

one of the topics covered in the module 4 of the Implementing HPE MSA Storage Solutions course is

"Explain the firmware update process on MSA". This suggests that the firmware update is a maintenance task that can be performed with the Storage Management utility v4.

### NEW QUESTION # 32

Your customer has run out of storage on their Virtual environment.

How does migrating to HPE GreenLake help this customer?

- A. by enabling the customer to use an installed buffer and only pay for what they use
- B. by allowing the customer to over-provision their storage
- C. by implementing a reserve level to ensure there is always storage available
- D. by automatically ordering more storage when capacity levels reach 90%

**Answer: A**

Explanation:

Explanation

HPE GreenLake for storage is a storage-as-a-service solution that provides a cloud-like experience for on-premises storage. The solution offers:

\* Workload-optimized data services for file, block, backup, and disaster recovery

\* A cloud-based management console for simplified operations and provisioning

\* A consumption-based model that aligns costs with usage

\* A buffer capacity that is installed but not activated until needed

\* A pay-per-use billing that only charges for the capacity used above the reserve level

By migrating to HPE GreenLake for storage, the customer can avoid running out of storage on their virtual environment by using the buffer capacity as needed and only paying for what they use. The customer can also benefit from the flexibility, scalability, and performance of the storage services offered by HPE GreenLake.

### NEW QUESTION # 33

Is HPE GreenLake a consumption-based model for IT resources?

- A. Yes
- B. No

**Answer: A**

Explanation:

HPE GreenLake is a consumption-based model that allows organizations to pay for their IT resources based on actual usage. It provides a flexible and scalable approach to IT resource provisioning, enabling organizations to align their IT spending with their business needs. HPE GreenLake provides a range of services, including infrastructure-as-a-service (IaaS), platform-as-a-service (PaaS), and software-as-a- service (SaaS).

### NEW QUESTION # 34

Your customer has a ProLiant DL380 Gen10 server. They have a health issue with one of the server's power supplies, and they want to download an Active Health System log on to create a support case.

How can they get the Active Health System Log? (Select two.)

- A. iLO Repository
- B. iLO web interface
- C. Smart Update Manager
- D. Service Pack for ProLiant
- E. cURL Utility

**Answer: B,E**

Explanation:

\* Understanding the Requirements:

The customer needs to download an Active Health System (AHS) log for a ProLiant DL380 Gen10 server to create a support case.

\* Log Access Options:

A. Service Pack for ProLiant: Used for firmware and driver updates but not specifically for downloading AHS logs.

B. Smart Update Manager: Similar to Service Pack, used for updates, not AHS log extraction.

C. iLO Web Interface: Provides direct access to AHS logs via the server's integrated lights-out management interface.

D. iLO Repository: A repository for firmware and software updates, not for extracting logs.

E. cURL Utility: Can be used to script and automate the download of AHS logs via the iLO RESTful API.

\* Why C and E are the Correct Answers:

C. iLO Web Interface: The iLO web interface provides an easy, GUI-based method to download the AHS log.

E. cURL Utility: Allows for automated and script-based retrieval of AHS logs, useful for integrating into support workflows.
