New Mule-101 Mock Test - Mule-101 Learning Mode

With the help of Salesforce certification, you can excel in the field of and can get a marvelous job in a well-known firm. If you prepare with PassReview, then your success is guaranteed. We offer money back guarantee for our customers. The whole material of the Salesforce Mule-101 dumps are related to the exam. It provides complete guidance how to prepare the exam. The Mule-101 Exam Dumps are highly useful and practical. You can be sure of your success in the first attempt. The comprehensive material of dumps and Mule-101 dumps are perfect for exam assistance.

Salesforce Certified MuleSoft Integration Foundations Sample Questions (Q10-Q15):

NEW QUESTION # 10
What is an example of data confidentiality?

- A. De-masking a person's Social Security number while inserting it into a database
- B. Encrypting a file containing personally identifiable information (PII)
- C. Signing a file digitally and sending it using a file transfer mechanism
- D. Providing a server's private key to a client for secure decryption of data during a two-way SSL handshake

Answer: B

Explanation:
Confidentiality: This security concept ensures that information is not made available or disclosed to unauthorized individuals, entities, or processes.
Encryption (Option A): Transforming readable data (plaintext) into unreadable data (ciphertext) is the primary technical control for confidentiality. 7If a file with PII is stolen but encrypted, the confidentiality is maintained89.10 Why others are incorrect:
Signing (C): Ensures Integrity (proving the data hasn't changed), not confidentiality (the data is still readable).
De-masking (B): Removes protection.
Providing Private Key (D): This is a severe security breach, not a protection mechanism.

NEW QUESTION # 11

What is a core pillar of the MuleSoft Catalyst delivery approach?

- A. Technology centralization
- B. Process thinking
- C. Business outcomes
- D. Scope reduction

Answer: C

Explanation:

MuleSoft Catalyst Pillars: The Catalyst methodology is built on three core pillars designed to drive successful digital transformation:
Business Outcomes: Defining clear KPIs and aligning technology with business goals6.
Technology Delivery: The actual implementation (Anypoint Platform).
Organizational Enablement: Building the C4E and training the team.
The Answer: "Business outcomes" is the only option listed that corresponds to one of these

NEW QUESTION # 12

A developer is examining the responses from a RESTful web service that is compliant with the Hypertext Transfer Protocol (HTTP/1.1) as defined by the Internet Engineering Task Force (IETF). 13 (The question asks to identify the code class for success)

- A. 3xx
- B. 4xx
- C. 5xx
- D. 2xx

Answer: D

Explanation:
Comprehensive and Detailed Explanation:
HTTP Status Codes: Understanding these is fundamental to MuleSoft integration.
2xx (Success - Answer B): The request was received, understood, and accepted. (e.g., 200 OK, 201 Created, 202 Accepted).
3xx (Redirection): Further action needs to be taken to complete the request (e.g., 301 Moved Permanently).
4xx (Client Error): The request contains bad syntax or cannot be fulfilled (e.g., 400 Bad Request, 401 Unauthorized, 404 Not Found).
5xx (Server Error): The server failed to fulfill an apparently valid request (e.g., 500 Internal Server Error, 502 Bad Gateway).
Context: When a Mule flow makes an HTTP Request, it checks these status codes to determine if the On Error scope should be triggered. By default, 4xx and 5xx trigger errors; 2xx indicates success.

NEW QUESTION # 13

A team has completed the build and test activities for a Mule application that implements a System API for its application network. Which Anypoint Platform component should the team now use to both deploy and monitor the System API implementation?

- A. API Manager
- B. Anypoint Exchange
- C. Design Center
- D. Runtime Manager

Answer: D

Explanation:
Runtime Manager: This is the interface within the Anypoint Control Plane used to manage the lifecycle of deployments5.
Capabilities:
Deploy: You upload the JAR file here to deploy it to CloudHub, Runtime Fabric, or On-Prem servers.
Monitor: Once deployed, it provides dashboards for CPU usage, Memory usage, and status (Started/Stopped).
Why others are incorrect:
API Manager: Manages policies (security) and gateways, not the deployment of the application artifact itself.
Design Center: For creating the app, not deploying it.

NEW QUESTION # 14

According to MuleSoft, which system integration term describes the method, format, and protocol used for communication between two systems? 4

- A. Message
- B. Interface
- C. Interaction
- D. Component

Answer: B

Explanation:
Comprehensive and Detailed Explanation:
The Interface: In system integration and MuleSoft terminology, the Interface is the contract that defines how two systems communicate. It specifies:
Protocol: How data is transmitted (e.g., HTTP, FTP, AMQP).
Format: The structure of the data (e.g., JSON, XML, CSV).
Method: The specific action (e.g., GET, POST).
Why other options are incorrect:
Message: This refers to the actual data payload (the content) being sent, not the rules of communication.
Component: This usually refers to a specific building block within the Mule flow (like a Logger or a Database connector) or a software module, not the communication definition itself.
Interaction: This describes the act of communicating, not the definition of the standard used.

NEW QUESTION # 15

......

Getting a Salesforce Mule-101 trusted certification is a way to prove your expertise and show you that you are ready all the time to take the additional responsibilities. The PassReview Mule-101 certification exam assists you to climb the corporate ladder easily and helps you to achieve your professional career objectives.
