It typically involves reviewing the current stage or release against plan, assessing risks, issues, and dependencies, and agreeing on corrective actions or decisions to keep the project on track.

While retrospectives (B and C) focus on reflecting and improving team practices, and team planning (A) looks ahead to upcoming work, progress reviews are focused on monitoring, control, and decision-making at the project or stage level.

In which step of the approach to issue management are options to resolve an issue evaluated?

- A. Capture

- C. Recommend

Answer: C

The Recommend step in issue management involves analyzing the issue and evaluating possible options to resolve it. At this stage, the project team or responsible individuals identify potential solutions, weigh their pros and cons, and recommend the best course of action to decision-makers.

Capture is the initial identification and recording of the issue, Decide involves making the final decision on the recommended solution, and Implement is the execution of the chosen resolution. Evaluating options thoroughly during the Recommend phase helps ensure informed decision-making and effective issue resolution.
