## **100% Pass Quiz 2026 International Code Council M2: High Hit-Rate Commercial Mechanical Inspector Reliable Test Syllabus**

The International Code Council M2 certification can play a crucial role in career advancement and increase your earning potential. By obtaining International Code Council M2 certification, you can demonstrate to employers your expertise and knowledge. The International Code Council world is constantly changing its dynamics. With the International Code Council M2 Certification Exam you can learn these changes and stay updated with the latest technologies and trends.

### **International Code Council Commercial Mechanical Inspector Sample Questions (Q21-Q26):**

#### **NEW QUESTION # 21**

The minimum dimension for rectangular air ducts used to supply combustion air for natural draft systems is \_\_\_\_\_ inches.

- A. 0
- B. 1
- **C. 2**
- D. 3

**Answer: C**

Explanation:

The IMC combustion-air provisions require openings used for combustion air to have a minimum cross-sectional dimension of 3 inches. Where ducts are used, they must be of the same cross-sectional area as the openings to which they connect. That makes 3 inches the correct answer, so Option B is correct.

#### **NEW QUESTION # 22**

Ducts shall not be permitted to be connected to:

- A. a high-static-pressure-type unit heater.
- B. a gravity-type warm-air furnace.
- C. an evaporative cooler.
- **D. a vented wall furnace.**

**Answer: D**

Explanation:

The IMC appliance provisions prohibit duct connection to a vented wall furnace. That makes Option B correct. The exam tests recognition of appliance-specific distribution restrictions rather than general duct rules.

#### **NEW QUESTION # 23**

What is the maximum distance allowed below the design flood elevation from which ventilation may be obtained?

- A. 0 inches

- B. 6 inches
- C. 2 feet
- **D. 1 foot**

**Answer: D**

Explanation:

This question appears to contain a wording issue. In ICC flood-related provisions tied to ventilation/flood openings, the governing limit is that the opening location is not more than 1 foot relative to the reference grade condition used for flood-opening compliance. That corresponds to 1 foot, so Option C is the best- supported answer.

#### **NEW QUESTION # 24**

The optional integral clearance reduction system is designed to meet which NFPA standard?

□

- A. 0
- **B. 1**
- C. 2
- D. 92A

**Answer: B**

Explanation:

Based on the specification sheet shown in the exhibit, the design features state that the optional integral clearance reduction system meets the requirements of NFPA 96 . Therefore, the correct answer is D .

#### **NEW QUESTION # 25**

Termination of vents for appliances listed for and installed outdoors that incorporate integral venting shall:

- A. terminate not less than 5 feet vertically above the highest connected appliance draft hood outlet or flue collar.
- **B. be installed in accordance with their listings and the manufacturer's installation instructions.**
- C. be installed in accordance with the design professional's plans as approved by the local building official.
- D. terminate not less than 5 feet vertically above the lowest connected appliance draft hood outlet or flue collar.

**Answer: B**

Explanation:

For appliances listed for outdoor installation and incorporating integral venting , the IMC requires them to be installed in accordance with their listings and the manufacturer's installation instructions . That matches Option C exactly.

#### **NEW QUESTION # 26**

.....

It-Tests has designed a International Code Council M2 pdf dumps format that is easy to use. Anyone can download Commercial Mechanical Inspector M2 pdf questions file and use it from any location or at any time. International Code Council PDF Questions files can be used on laptops, tablets, and smartphones. Moreover, you will get actual Commercial Mechanical Inspector M2 Exam Questions in this Commercial Mechanical Inspector M2 pdf dumps file.
