# Most-popular XSOAR-Engineer Study materials demonstrate the most accurate Exam Dumps - Test4Engine

It is seen as a challenging task to pass the XSOAR-Engineer exam. Tests like these demand profound knowledge. The Palo Alto Networks XSOAR-Engineer certification is absolute proof of your talent and ticket to high-paying jobs in a renowned firm. Palo Alto Networks XSOAR Engineer XSOAR-Engineer test every year to shortlist applicants who are eligible for the XSOAR-Engineer exam certificate.

Palo Alto Networks XSOAR-Engineer Exam Syllabus Topics:

Topic	Details
Topic 1	• Planning, Installation, and Maintenance: This domain covers system setup and administration including authentication configuration, engine deployment, dev • prod environment planning, Marketplace pack management, integration instance configuration, and system maintenance.
Topic 2	• Threat Intelligence Management: This domain focuses on threat intelligence operations including indicator creation and configuration, indicator relationships, enrichment with source reliability, external intelligence sharing, and exclusion list management.

Topic 3	• Use Case Planning and Development: This domain focuses on designing security use cases through incident and indicator lifecycle management, field and layout customization, classifier and mapper configuration, incident creation methods, pre • post-processing, and incident type configuration with playbooks, layouts, SLAs, and lists.
Topic 4	• Incident Interactions and Reporting: This domain covers incident operations including states and actions, War Room activities, incident relationships, and dashboard and report configuration for metrics and visualization.
Topic 5	• Playbook Development: This domain addresses automation through playbook creation including task configuration, context data manipulation, various task types, sub-playbooks with looping, filters and transformers, debugger usage, built-ins and scripts, automation script creation, and job management.

Palo Alto Networks XSOAR-Engineer Practice Test | XSOAR-Engineer Updated Testkings

Test4Engine guarantee the best valid and high quality XSOAR-Engineer study guide which you won't find any better one available. XSOAR-Engineer training pdf will be the right study reference if you want to be 100% sure pass and get satisfying results. From our XSOAR-Engineer free demo which allows you free download, you can see the validity of the questions and format of the XSOAR-Engineer actual test. In addition, the price of the XSOAR-Engineer dumps pdf is reasonable and affordable for all of you.

Palo Alto Networks XSOAR Engineer Sample Questions (Q125-Q130):

NEW QUESTION # 125
While testing a custom integration, an XSOAR engineer noticed that the incident fetch interval is missing.
How can this be fixed?

- A. Duplicate the integration. Edit the resulting copy and add incidentFetchInterval as a parameter. Save the integration. Configure the new integration instance with the interval required.
- B. Configure the application to send incidents on the required interval.
- C. Duplicate the integration. Add the interval in the code. Save the integration and Configure the new integration instance with the interval required.
- D. Define the Incident Fetch Interval when running the integration's commands.

Answer: D

NEW QUESTION # 126
Which three statements are true about the Marketplace? (Choose three.)

- A. Publishes content without additional review from the Cortex XSOAR team
- B. Enables users to participate in the community by sharing content
- C. Offers granularity in installation through content packs
- D. Allows uploading of content in additional languages
- E. Allows reverting back to a previous version of a content pack

Answer: B,C,E

NEW QUESTION # 127
At what stage during the incident lifecycle is an incident type assigned?

- A. Incident creation
- B. Classification

- C. Pre-processing
- D. Playbook execution

Answer: B

NEW QUESTION # 128
An engineer would like to present a trend using widgets to compare to a previous week's data. Which two methods will allow the engineer to meet the requirement? (Choose two.)

- A. Create a custom widget using a new incident query
- B. Create widget of type Line, check 'Display Trend' and define as 7 days ago
- C. Create widget of type Number, check 'Display Trend' and define as 7 days ago
- D. Create a custom widget using a script

Answer: B,D

NEW QUESTION # 129
Which command adds or updates a description to an incident that can be used within widgets?
Which command adds or updates a description to an incident that can be used within widgets?.

- A. !Set key-"description" value-This is an updated description.
- B. !setIncident description="This is an updated description.".
- C. !setIncident description=This is an updated description.
- D. !Set key="description" value="This is an updated description.".

Answer: B

Explanation:
The !setIncident command is the documented method for updating incident fields programmatically in Cortex XSOAR. The Admin Guide states that the syntax requires proper quoting for parameters, especially when assigning descriptive text that may include spaces. The correct syntax is:
!setIncident description="some text"
This updates the built-in description field at the incident level and allows widgets, dashboards, and reports to use the updated description because XSOAR widgets can read incident fields directly. OptionAuses correct syntax with quotes included.
Option B incorrectly uses !Set, which modifiescontext keys, not incident fields. Option C is invalid due to incorrect parameter formatting (hyphens instead of equals signs). Option D omits quotation marks, causing parsing errors in cases where the value includes spaces, verbs, or punctuation.
Thus, the only correct and fully documented method to update an incident's description so that it is available to widgets isA:
!setIncident description="...".
