SAP Certified Associate - SAP SuccessFactors People Analytics: Reporting Sample Questions (Q48-Q53):

NEW QUESTION # 48
You are using a pivot table in your canvas report but the report does NOT display the most recent data. What could be the reason?

- A. You are NOT using a template.
- B. You are using a query with a static date filter.
- C. You are using the percent of total option.
- D. You are using a wrong People Scope.

Answer: B

Explanation:
* Issue with Static Date Filters:
* If the query uses a static date filter (e.g., a specific range like "January 1, 2023, to March 31,
2023"), the report will not reflect the most recent data as the filter restricts results to the defined date range.
* Resolution:
* Update the query to use dynamic date filters (e.g., "Last 30 Days" or "Current Year") to ensure the pivot table includes the latest data.

NEW QUESTION # 49
In addition to any chart filter you may have applied to your chart, which other filters may be affecting the chart filter, due to the Cascading effect in a Story? Note: There are 2 correct answers to this question.

- A. Page
- B. Query
- C. Story
- D. Table

Answer: A,C

Explanation:
* Cascading Effect in Story Filters
* Story filters, page filters, and chart filters can influence each other due to cascading logic. Filters applied at higher levels (e.g., Story or Page) cascade down to affect lower levels (e.g., charts).
* Explanation of Correct Answers
* B (Page): Filters applied at the page level affect all charts on that page.
* C (Story): Filters applied at the story level cascade to all pages and charts within the story.
* Why Other Options are Incorrect
* A (Table): Table filters do not cascade to charts.
* D (Query): Query filters are independent and do not cascade.

NEW QUESTION # 50

In Query Designer, you are trying to create a conditional expression to relabel a field. You create the following expression:
IF([User#Basic User Information#Gender] = "M" , "Male" : "Female") You received an error message saying the formula could NOT be computed. Which symbol in your expression is causing the error?

- A. :
- B. ,
- C. #
- D. "

Answer: A

Explanation:
* Understanding the Query Designer Expression SyntaxIn SAP SuccessFactors People Analytics Query Designer, conditional expressions are used to transform or relabel fields based on logical conditions.
These expressions rely on specific syntax that must be adhered to strictly. The issue in this scenario arises from the use of an incorrect separator in the conditional statement.
* Analyzing the Given ExpressionThe expression provided:
IF([User#Basic User Information#Gender] = "M" , "Male" : "Female")
contains a colon (:) as the separator between "Male" and "Female". However, the correct syntax requires the use of a comma (,) instead of the colon.
* Correct Syntax Format for Conditional ExpressionsThe correct format for conditional expressions in SAP SuccessFactors People Analytics IF(Condition, Value_if_True, Value_if_False) Applying this to the provided example, the correct expression should be:
IF([User#Basic User Information#Gender] = "M", "Male", "Female")
* Root Cause of the ErrorThe colon (:) is not recognized as a valid syntax separator in the Query Designer's conditional expression format. As a result, the formula cannot be computed, and an error is generated.
* Resolving the IssueReplace the colon (:) with a comma (,), ensuring the conditional expression adheres to the correct syntax. The updated expression would look like this:
IF([User#Basic User Information#Gender] = "M", "Male", "Female")
* ValidationOnce corrected, the expression can be tested in Query Designer to confirm it computes without errors and provides the expected output.

* Explanation of Correct Answers
* Option A: Correct, as reordering columns is a standard customization feature.
* Option C: Correct, because column width adjustment is supported for better layout and content display.
* Option D: Correct, since column headers can be edited to reflect data labels better.
* Explanation of Incorrect Options
