We have the first-rate information safety guarantee system for the buyers who buy the C_S4PM2_2507 questions and answers of our company, we can ensure that the information of your name, email, or product you buy. We respect the private information of every customer, and we won't send the junk information to you to bother. Besides, you will get C_S4PM2_2507 Questions and answers downloading link within ten minutes, and our system will send you the update version to your mailbox.

SAP C_S4PM2_2507 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Project Management: This section of the exam assesses the capabilities of SAP Project Leads and focuses on the project management principles required to execute successful SAP implementations. It includes planning, scope management, risk assessment, stakeholder coordination, and performance monitoring. Candidates are expected to apply project management techniques that ensure timely delivery, resource optimization, and alignment with SAP Activate and Rise methodologies.
Topic 2	<ul style="list-style-type: none"> Rise with SAP Methodology: This domain measures the skills of SAP Solution Architects and covers the Rise with SAP approach that supports customers in their business transformation journey. It focuses on understanding SAP's Business Transformation as a Service (BTaaS) model, key components such as business process intelligence, cloud infrastructure, and the transformation framework. Candidates are expected to understand how to align the Rise with SAP methodology with customer-specific business goals and outcomes.
Topic 3	<ul style="list-style-type: none"> Implementing S 4HANA Cloud Private Edition: This domain assesses the skills of SAP Implementation Consultants and focuses on deploying and configuring the SAP S 4HANA Cloud Private Edition. It includes understanding system architecture, integration scenarios, data migration strategies, and extensibility options. Candidates must demonstrate their ability to manage deployment processes and use available tools to ensure smooth migration from legacy systems to S 4HANA Cloud Private Edition.

Topic 4	<ul style="list-style-type: none"> Organizational Change Management: This section of the exam evaluates the expertise of Change Management Specialists and focuses on managing SAP implementation's human and organizational aspects. It covers stakeholder engagement, communication planning, and resistance management. The goal is to ensure that candidates understand how to prepare, support, and sustain organizational readiness during digital transformation projects driven by SAP technologies.
Topic 5	<ul style="list-style-type: none"> SAP Activate Methodology: This section of the exam measures the skills of SAP Project Managers and covers the fundamental principles of the SAP Activate Methodology used for implementing S 4HANA solutions. It focuses on the agile project delivery framework, including phases such as Prepare, Explore, Realize, and Deploy. Candidates are tested on their ability to apply best practices, accelerators, and guided configuration tools to ensure a structured and efficient implementation approach.

SAP Certified Associate - Managing SAP S/4HANA Cloud Private Edition Projects Sample Questions (Q25-Q30):

NEW QUESTION # 25

What is the SAP Business Suite?

- A. A complete list of business processes available to all SAP customers
- B. A robust set of features tailored to simplify the customer experience
- C. A set of solutions that connect and optimize every function across the customer's enterprise
- D. A full-scale arrangement of products designed to improve customer outcomes

Answer: C

NEW QUESTION # 26

What is the purpose of the "RISE with SAP system transition workbench"?

- A. To provide a single point of entry for migrating systems to the RISE with SAP environment.
- B. To manage and monitor SAP systems running on-premises.
- C. To provide access to SAP support resources and documentation.
- D. To offer a marketplace for purchasing SAP software licenses.

Answer: A

NEW QUESTION # 27

Which of the following are captured in a completed Digital Discovery Assessment? Note: There are 2 correct answers to this question.

- A. SAP Fiori application extensions
- B. Known integration requirements
- C. Business role requirements
- D. Target customer go-live date

Answer: B,C

Explanation:

The Digital Discovery Assessment (DDA) is part of the early discovery and scoping process for SAP S/4HANA Cloud projects. It captures the customer's business priorities, scope, and key requirements to support solution design and project planning.

A). Known integration requirements

The assessment records any known or expected integration requirements, helping identify connections to other systems or external applications early in the project.

B). Business role requirements

It also captures business role requirements to define which roles and user responsibilities are needed to support the processes included in the solution scope.

Other options:

* C. SAP Fiori application extensions: These are identified later in the design phase, not during DDA.

* D. Target customer go-live date: This may be noted in project planning but is not part of the formal DDA deliverables.

NEW QUESTION # 28

How would you describe the different dimensions of SAP's organizational change management framework?

Note: There are 3 correct answers to this question.

- A. Change leadership involves activities to enable all management levels to handle the cloud implementation and deal with resistance.
- **B. Change realization includes activities to realize the business benefits associated with the cloud implementation.**
- **C. Change effectiveness contains activities that can be applied to evaluate the impact of change management interventions.**
- D. Change strategy covers activities to set up change management properly.
- **E. Change communication encompasses activities to provide relevant project information to the different stakeholder groups at the right time.**

Answer: B,C,E

NEW QUESTION # 29

Which functions of the System View Dashboard in SAP Cloud ALM help maintain a clean core and support upgrades for SAP S/4HANA? Note: There are 3 correct answers to this question.

- A. Detailed Cost Analysis of Upgrades: Provide detailed cost breakdown and cost analysis.
- **B. Tool readiness: Verify that essential tools for clean-core data collection are active (for example, SAP EarlyWatch Alerts).**
- C. Performance Benchmarking: Compare performance against Industry Peers.
- **D. Version insights: Ensure your installed SAP S/4HANA product version is up to date.**
- **E. Upgrade preparation: Assess your current extensions to anticipate and mitigate potential upgrade risks.**

Answer: B,D,E

Explanation:

Step 1 - Understanding the question

This question asks about the System View Dashboard in SAP Cloud ALM and how it helps maintain a clean core and support upgrades for SAP S/4HANA.

A "clean core" means keeping the SAP system as standard as possible, reducing unnecessary custom code or modifications that can complicate upgrades.

Step 2 - Evaluate each option

Option A: Upgrade preparation: Assess your current extensions to anticipate and mitigate potential upgrade risks.

This is correct.

The System View Dashboard helps identify extensions and modifications that might impact system upgrades.

It provides visibility into the system landscape and highlights potential upgrade risks due to custom code or integrations.

Option B: Detailed Cost Analysis of Upgrades: Provide detailed cost breakdown and cost analysis.

This is incorrect.

The System View Dashboard does not perform cost analysis. Its purpose is monitoring system health, readiness, and upgrade-related insights, not financial evaluation.

Option C: Performance Benchmarking: Compare performance against industry peers.

This is incorrect.
