Our FlashArray-Implementation-Specialist free demo provides you with the free renewal in one year so that you can keep track of the latest points happening in the world. As the questions of exams of our FlashArray-Implementation-Specialist exam torrent are more or less involved with heated issues and customers who prepare for the exams must haven't enough time to keep trace of exams all day long, our FlashArray-Implementation-Specialist Practice Test can serve as a conducive tool for you make up for those hot points you have ignored. Therefore, you will have more confidence in passing the exam, which will certainly increase your rate to pass the FlashArray-Implementation-Specialist exam.

You can write down your doubts or any other question of our Pure Storage Certified FlashArray Implementation Specialist test questions. We warmly welcome all your questions. Our online workers are responsible for solving all your problems with twenty four hours service. You still can enjoy our considerate service after you have purchased our FlashArray-Implementation-Specialist test guide. If you don't know how to install the study materials, our professional experts can offer you remote installation guidance. Also, we will offer you help in the process of using our FlashArray-Implementation-Specialist Exam Questions. Also, if you have better suggestions to utilize our study materials, we will be glad to take it seriously.

New Dumps FlashArray-Implementation-Specialist Discount | High Pass-Rate Pure Storage FlashArray-Implementation-Specialist: Pure Storage Certified FlashArray Implementation Specialist 100% Pass

Free update for 365 days are available for FlashArray-Implementation-Specialist exam dumps, that is to say, if you buy FlashArray-Implementation-Specialist study guide materials from us, you can get the latest information for free in the following year. Besides, FlashArray-Implementation-Specialist exam dumps are compiled by experienced experts, and they are quite familiar with the exam center, and therefore the quality and exam dumps can be guaranteed. And we have online and offline chat service stuff for FlashArray-Implementation-Specialist Exam Materials, they have professional knowledge for the exam dumps, and if you have any questions about FlashArray-Implementation-Specialist exam materials, just consult us.

Pure Storage Certified FlashArray Implementation Specialist Sample Questions (Q114-Q119):

NEW QUESTION # 114

Which PCIe slot must be used for a SAS HBA on R4B revision controllers?

- A. PCIe slot 4
- B. **PCIe slot 1**
- C. PCIe slot 0

Answer: B

Explanation:

While modern FlashArrays (like the XR4 and XL series) primarily use NVMe-oF/RoCE for backend connectivity, specific configurations or legacy support scenarios may still require a SAS HBA (Serial Attached SCSI Host Bus Adapter), for example, when connecting to older SAS-based expansion shelves during a migration or hybrid configuration.

For R4B revision controllers (a specific hardware revision of the Gen 4 controller), the strict hardware addressing map requires that any SAS HBA be installed in PCIe Slot 1.

Slot 1 provides the specific PCIe lane routing and BIOS interrupts required for the legacy SAS controller to be recognized and function without conflicting with the native NVMe fabric.

Installing the card in Slot 0 (typically reserved for RoCE/Ethernet backend) or Slot 4 would likely result in the card being ignored by Purity or causing boot errors due to resource conflict.

NEW QUESTION # 115

After upgrading Purity during a new installation, which command should an Implementation Engineer run to determine what version of Purity will be loaded at the next boot of the FlashArray?

- A. pureversion -a
- B. purearray list --controller
- C. **pureboot list**

Answer: C

Explanation:

The pureboot list command shows the versions of Purity installed and indicates which version will be loaded on the next system boot.

NEW QUESTION # 116

A customer has ordered several FlashArrays and wants to have ActiveCluster configured. What is the maximum quantity of arrays supported with ActiveCluster?

- A. 0
- B. 1
- C. 2

Answer: A

Explanation:

FlashArray ActiveCluster is designed for synchronous replication between two FlashArray systems, enabling active-active configurations across two sites. This setup allows both arrays to serve I/O simultaneously, providing high availability and zero RPO (Recovery Point Objective). Each array in the ActiveCluster configuration maintains identical volume identities, ensuring seamless access for hosts regardless of the array they connect to. The configuration supports metro-area clustering, with a maximum round-trip latency of 11 milliseconds between arrays. Additionally, the Pure1 Cloud Mediator or an on-premises mediator is utilized to manage failover and prevent split-brain scenarios, eliminating the need for a third site or external gateway.

While ActiveCluster supports a two-site configuration, it does not support additional arrays within the same synchronous setup. For scenarios requiring protection across more than two sites, asynchronous replication solutions like ActiveDR™ can be employed. ActiveDR allows for asynchronous replication to a third site, providing broader disaster recovery capabilities. Therefore, the maximum number of arrays supported in a single ActiveCluster configuration is two.

NEW QUESTION # 117

At the completion of an upgrade, which command is used to send phonehome logs?

- A. purelogs --send-all
- B. purearray phonehome --send-logs
- C. **purearray phonehome --send-today**

Answer: C

Explanation:

At the completion of an upgrade, the correct command to manually trigger the upload of the relevant logs is `purearray phonehome --send-today`.

Purpose: This specific argument (`--send-today`) instructs the array to bundle and upload all log files generated within the current 24-hour window. This is the standard procedure post-upgrade because it ensures that all logs capturing the pre-upgrade state, the upgrade process itself, and the immediate post-upgrade health checks are transmitted to Pure Support.

Verification: This allows the Support team to validate that the upgrade completed successfully and that no dormant issues were triggered during the controller failovers.

Syntax: Option A (`purelogs`) is not a valid command. Option B (`--send-logs`) is a generic approximation, but the specific "today" flag is the best practice command cited in upgrade checklists to avoid uploading gigabytes of historical data irrelevant to the immediate event.

NEW QUESTION # 118

Which enablement feature will cause Mirrored Write statistics to appear in the Analysis section of the FlashArray Purity 6.x GUI?

- A. ActiveDR
- B. FA File
- C. ActiveCluster (AC)

Answer: C

Explanation:

ActiveCluster (AC) is the enablement feature that introduces Mirrored Write statistics into the Analysis section of the Purity GUI. ActiveCluster provides synchronous replication (active-active) between two FlashArrays. In this configuration, every write request from a host must be committed to the NVRAM of both arrays before an acknowledgement is sent back to the host. This ensures zero Recovery Point Objective (RPO). Because this synchronous process introduces a latency component related to the network round-trip and the remote array's acknowledgement, Purity exposes a specific metric called "Mirrored Write" latency.

This metric allows administrators to distinguish between the local array's write processing time and the time spent waiting for the replication partner. It is critical for troubleshooting performance in stretched-cluster environments; if write latency spikes, the "Mirrored Write" stat helps determine if the bottleneck is the inter-site link (WAN) or the remote array. Neither FA File (NAS services) nor ActiveDR (asynchronous/near-sync replication) generate this specific synchronous write metric in the Analysis dashboard.

NEW QUESTION # 119

.....

Once you pass the exam and obtain the FlashArray-Implementation-Specialist certificate, your life will take place great changes. On one hand, your job career will become more promising. All tasks will be finished excellently and efficiently because you have learned many useful skills from our FlashArray-Implementation-Specialist training guide. On the other hand, you will get more opportunities to be employed by the big company and get a brighter future with the FlashArray-Implementation-Specialist certification.

FlashArray-Implementation-Specialist Reliable Exam Papers: <https://www.passtorrent.com/FlashArray-Implementation-Specialist-latest-torrent.html>

Using PassTorrent FlashArray-Implementation-Specialist Reliable Exam Papers can quickly help you get the certificate you want, Above all, using PassTorrent FlashArray-Implementation-Specialist Reliable Exam Papers you do not spend a lot of time and effort to prepare for the exam, And our FlashArray-Implementation-Specialist practice braindumps are perfect in every detail, Our company attaches great importance to overall services, if there is any problem about the delivery of FlashArray-Implementation-Specialist exam materials, please let us know, a message or an email will be available, The real and top-notch Pure Storage FlashArray-Implementation-Specialist exam questions are being offered in three different formats.

This data enables automation of vulnerability management, security measurement, FlashArray-Implementation-Specialist and compliance, Svore and her Microsoft's colleagues have been investigating many possible applications of quantum computing, including machine learning.

Use Valid Pure Storage FlashArray-Implementation-Specialist Dumps PDF And Overcome Your Fear Of Taking Exam

Using PassTorrent can quickly help you get the certificate FlashArray-Implementation-Specialist Reliable Exam Papers you want, Above all, using PassTorrent you do not spend a lot of time and effort to prepare for the exam.

And our FlashArray-Implementation-Specialist Practice Braindumps are perfect in every detail, Our company attaches great importance to overall services, if there is any problem about the delivery of FlashArray-Implementation-Specialist exam materials, please let us know, a message or an email will be available.

The real and top-notch Pure Storage FlashArray-Implementation-Specialist exam questions are being offered in three different formats.
