CCAAK Valid Test Practice | Valid CCAAK Vce

If you have bought the CCAAK exam questions before, then you will know that we have free demos for you to download before your purchase. Free demos of our CCAAK study guide are understandable materials as well as the newest information for your practice. Under coordinated synergy of all staff, our CCAAK Practice Braindumps achieved a higher level of perfection by keeping close attention with the trend of dynamic market.

Confluent CCAAK Exam Syllabus Topics:

Topic	Details
Topic 1	• Apache Kafka® Fundamentals: This section of the exam measures skills of a Kafka Administrator and covers core concepts such as Kafka architecture, components, and data flow. It assesses the candidate's understanding of topics like topics and partitions, brokers, producers, consumers, and message retention.
Topic 2	• Apache Kafka® Cluster Configuration: This section of the exam measures skills of a Kafka Administrator and includes configuring broker properties, tuning for performance, managing topic-level settings, and applying best practices for production-grade environments.
Topic 3	• Observability: This section of the exam measures skills of a Site Reliability Engineer and focuses on monitoring Kafka clusters. It assesses knowledge of metrics, logging, and alerting tools, including how to use them to maintain cluster health and performance visibility.
Topic 4	• Deployment Architecture: This section of the exam measures skills of a Kafka Administrator and covers different Kafka deployment topologies. It evaluates understanding of high availability, disaster recovery, multi-data center replication, and the roles of Zookeeper or KRaft in the cluster architecture.
Topic 5	• Troubleshooting: This section of the exam measures skills of a Kafka Administrator and includes diagnosing common issues in Kafka clusters. It covers problem areas such as performance bottlenecks, message delivery failures, replication issues, and consumer lag, along with techniques to resolve them effectively.

Valid CCAAK Vce | CCAAK Latest Materials

Our CCAAK study material is the most popular examination question bank for candidates. CCAAK study material has helped thousands of candidates successfully pass the exam and has been praised by all users since it was appearance. CCAAK study material has the most authoritative test counseling platform, and each topic in CCAAK Study Materials is carefully written by experts who are engaged in researching in the field of professional qualification exams all the year round. They have a very keen sense of change in the direction of the exam, so that they can accurately grasp the important points of the exam.

Confluent Certified Administrator for Apache Kafka Sample Questions (Q47-Q52):

NEW QUESTION # 47
Which statements are correct about partitions? (Choose two.)

- A. A partition in Kafka will be represented by a single segment on a disk.
- B. A partition size is determined after the largest segment on a disk.
- C. A partition is comprised of one or more segments on a disk.
- D. All partition segments reside in a single directory on a broker disk.

Answer: C,D

NEW QUESTION # 48
A customer has a use case for a ksqlDB persistent query. You need to make sure that duplicate messages are not processed and messages are not skipped.
Which property should you use?

- A. ksql.streams auto.offset.reset=latest
- B. ksql.fail.on.production.error=false
- C. processing.guarantee=exactly_once
- D. ksql.streams auto offset.reset=earliest

Answer: C

Explanation:
processing.guarantee=exactly_once ensures that messages are processed exactly once by ksqlDB, preventing both duplicates and message loss.

NEW QUESTION # 49
You have a Kafka cluster with topics t1 and t2. In the output below, topic t2 shows Partition 1 with a leader "-1".
What is the most likely reason for this?
...
$ kafka-topics --zookeeper localhost:2181 --describe --topic t1
Topic:t1 PartitionCount 1 ReplicationFactor 1 Configs:
Topic: t1 Partition: 0 Leader: 0 Replicas: 0 Isr: 0
$ kafka-topics --zookeeper localhost:2181 --describe --topic t2
Topic:t2 PartitionCount 2 ReplicationFactor 1 Configs:
Topic: t2 Partition: 0 Leader: 0 Replicas: 0 Isr: 0
Topic: t2 Partition: 1 Leader: -1 Replicas: 1 Isr:

- A. Compression has been enabled on Broker 1.
- B. Broker 1 failed.
- C. Leader shows "-1" while the log cleaner thread runs on Broker 1.
- D. Broker 1 has another partition clashing with the same name.

Answer: B

Explanation:
A Leader of -1 indicates that no broker is currently the leader for that partition. This usually happens when the only replica for that partition is unavailable, often due to the associated broker (in this case, Broker 1) failing or being offline. Kafka cannot elect a leader if no replica is in the in-sync replica (ISR) list, which leads to leader = -1.

NEW QUESTION # 50
Which option is a valid Kafka Topic cleanup policy? (Choose two.)

- A. compact
- B. delete
- C. cleanup
- D. default

Answer: A,B

Explanation:
The delete policy deletes old log segments when they exceed the retention period or size.
The compact policy retains only the latest record for each key, enabling efficient key-based storage.

NEW QUESTION # 51
A broker in the Kafka cluster is currently acting as the Controller.
Which statement is correct?

- A. It can have topic partitions.
- B. It is responsible for sending leader information to all producers.
- C. All consumers are allowed to fetch messages only from this server.
- D. It is given precedence for replication to and from replica followers.

Answer: A

Explanation:
The Controller broker is a regular broker that also takes on additional responsibilities for managing cluster metadata, such as leader elections and partition assignments. It still hosts topic partitions and participates in replication like any other broker.

NEW QUESTION # 52
......

Our desktop-based Confluent Certified Administrator for Apache Kafka (CCAAK) practice exam software needs no internet connection. The web-based Confluent Certified Administrator for Apache Kafka (CCAAK) practice exam is similar to the desktop-based software. You can take the web-based Confluent Certified Administrator for Apache Kafka (CCAAK) practice exam on any browser without needing to install separate software. In addition, all operating systems also support this web-based Confluent CCAAK Practice Exam. Both Confluent Certified Administrator for Apache Kafka (CCAAK) practice exams track your performance and help to overcome mistakes. Furthermore, you can customize your Building Confluent Certified Administrator for Apache Kafka (CCAAK) practice exams according to your needs.
