

350-501 Authentic Exam Questions - Reasonable 350-501 Exam Price

BONUS!!! Download part of BraindumpsPrep 350-501 dumps for free: <https://drive.google.com/open?id=16gFvoZDAYuadIXsVx1ICfK-AoMQmswEv>

No doubt the Implementing and Operating Cisco Service Provider Network Core Technologies (350-501) certification exam is a challenging exam that always gives a tough time to their candidates. However, with the help of BraindumpsPrep Cisco Exam Questions, you can prepare yourself quickly to pass the Implementing and Operating Cisco Service Provider Network Core Technologies exam. The BraindumpsPrep Cisco 350-501 Exam Dumps are real, valid, and updated Cisco 350-501 practice questions that are ideal study material for quick Implementing and Operating Cisco Service Provider Network Core Technologies exam dumps preparation.

Cisco 350-501 certification exam is designed for professionals who are looking to validate their skills and knowledge in implementing and operating Cisco Service Provider Network Core Technologies. 350-501 exam covers a wide range of topics related to service provider networking, including network automation, routing protocols, VPN services, and network security. It is an ideal certification for professionals working in service provider organizations or those who have an interest in service provider technology.

Topics Tested in the Cisco 350-501 Exam

The Cisco 350-501 exam focuses on five major topics and requires the candidates to demonstrate the following skills:

- Describing and configuring the VPN services alongside implementing different multicast and QoS solutions;
- Gaining expertise in implementing the MPLS infrastructure together with describing segment routing and traffic engineering;
- Configuring different software related to assurance and automation as well as understanding what is the role that the NSO

architecture has for the organization's systems.

- Implementing different networking technologies such as the IPv6 and IPv4, BPP, or OSPF;
- Describing the service provider virtualization and architecture as well as knowing how to work with the Cisco network software architecture;

Cisco 350-501 Exam is a challenging certification that is highly valued in the IT industry. It is an essential qualification for professionals who are looking to advance their careers in service provider networking. Implementing and Operating Cisco Service Provider Network Core Technologies certification can open doors to job opportunities in service provider companies, network operations centers, and other related fields.

Pass Guaranteed 2026 Cisco 350-501 Marvelous Authentic Exam Questions

Our 350-501 learning question can provide you with a comprehensive service beyond your imagination. 350-501 exam guide has a first-class service team to provide you with 24-hour efficient online services. Our team includes industry experts & professional personnel and after-sales service personnel, etc. Industry experts hired by 350-501 Exam Guide helps you to formulate a perfect learning system, and to predict the direction of the exam, and make your learning easy and efficient. Our staff can help you solve the problems that 350-501 test prep has in the process of installation and download.

Cisco Implementing and Operating Cisco Service Provider Network Core Technologies Sample Questions (Q455-Q460):

NEW QUESTION # 455

Refer to the exhibit:

What does this value mean when it is received in XML?

- **A. It means a data field is blank**
- B. It indicates a value assigned by a network administrator to tag a route
- C. It shows the ending of the script
- D. It indicates a break in a sequence

Answer: A

NEW QUESTION # 456

Refer to the exhibit. Users on a LAN connected to R2 frequently open high-traffic connections with a server connected to R1. During heavy usage periods, the link between R1 and R2 becomes congested.

Which action must the engineering team take to improve performance on the link while still allowing traffic to flow?

- A. Implement FIFO on R1 and R2 to queue traffic through the congested link so that all traffic can pass
- **B. Implement traffic policing on the network with CBWFQ to drop unnecessary traffic that exceeds a given threshold**
- C. Implement LLQ with a strict policy on the network to ensure that all traffic from the server is sent to the users without interruption
- D. Implement traffic shaping on R2 to control the timing of data transmission between R1 and R2 for traffic identified in a class map

Answer: B

NEW QUESTION # 457

What should a network engineer consider before implementing segment routing?

- **A. It is a source-based routing technique.**
- B. It is an MPLS-based routing technique.
- C. It is a destination-based routing technique.
- D. It is a multicast-based routing technique.

Answer: A

Explanation:

Segment Routing (SR) is a source-based routing technique where the source node defines the entire path that a packet should take through the network. This is achieved by encoding the path as a list of segments in the packet header, eliminating the need for per-flow state in intermediate nodes.

It provides scalability, flexibility, and simplified traffic engineering compared to traditional MPLS.

Before implementing SR, network engineers must ensure the network supports the necessary protocols and configurations for SR.

NEW QUESTION # 458

Refer to the exhibit.

A network engineer must implement SNMPv3 on a Cisco IOS XR router running BGP. The engineer configures SNMPv3 to use SHA for authentication and AES for privacy on the routers, which are in a different data center in the same exchange as other routers. The engineer must also verify the associated MIB view family name, storage type, and status. Which set of actions meets these requirements?

- A. Add configuration `snmp-server user AuthUser group2 remote 10.1.1.1 v3 auth sha and use show snmp engineid to verify the configuration.`
- B. Add configuration `snmp-server user UserJustMe GrpMonitoring v3 auth sha AuthPass1 priv aes 128 PrivPass2` and use `show snmp view` to verify the configuration.
- C. Add configuration `snmp-server user AuthUser group2 remote 10.1.1.1 v3 auth sha` and use `show snmp mib` to verify the configuration.
- D. Add configuration `snmp-server user UserJustMe GrpMonitoring v3 auth sha AuthPass1 priv 3des 128 PrivPass2` and use `show snmp interface` to verify the configuration.

Answer: A

NEW QUESTION # 459

What is a characteristic of data modeling language?

- A. It separates configuration and state data.
- B. It replaces SNMP.
- C. It ensures devices are individually configured.
- D. It provides an interface for state data.

Answer: A

NEW QUESTION # 460

.....

For candidates who are going to buy 350-501 learning materials online, they may have the concern about the money safety. We apply international recognition third party for payment, therefore if you choose us, your safety of money and account can be guaranteed. Moreover, we have a professional team to compile and verify the 350-501 Exam Torrent, therefore the quality can be guaranteed. We offer you free demo to have a try before buying, and you know the content of the complete version through the free demo. We have professional service staff for 350-501 exam dumps, and if you have any questions, you can have a conversation with us.
