

Exams-boost Cisco 350-901 Exam Questions are Available in Three Different Formats

Achieve success by using our corrected Cisco 350-901 exam questions 2024. We offer success guarantee with our updated 350-901 dumps.

Cisco 350-901 Exam Questions [Rectified 2024] - Get Ready For The Exam

Are you taking the Developing Applications using Cisco Core Platforms and APIs Exam and want to ensure perfect preparation for the 350-901 Cisco Certified DevNet Professional exam? CertsLink [Cisco 350-901 exam questions](#) preparation can help you get there with ease. CertsLink Cisco 350-901 exam questions is a comprehensive learning package that offers the 350-901 Cisco Certified DevNet Professional exam real questions and answers with key features so that you can prepare for the 350-901 Developing Applications using Cisco Core Platforms and APIs Exam smoothly.

Real Cisco 350-901 Exam Questions In The PDF Format

The Cisco Certified DevNet Professional 350-901 exam questions are available in pdf format, which makes it convenient for you to save the Cisco 350-901 pdf to any device such as desktop, mac, smartphone, laptop, and tablet. It also means that the Cisco 350-901 exam questions is easily accessible no matter where you are, so you can prepare for your 350-901

What's more, part of that Exams-boost 350-901 dumps now are free: https://drive.google.com/open?id=1k_JDqSeYwFiyCoOpezKoFZ_sMkRDmXFe

The study system of our company will provide all customers with the best study materials. If you buy the 350-901 latest questions of our company, you will have the right to enjoy all the 350-901 certification training materials from our company. More importantly, there are a lot of experts in our company; the first duty of these experts is to update the study system of our company day and night for all customers. By updating the study system of the 350-901 Training Materials, we can guarantee that our company can provide the newest information about the 350-901 exam for all people.

Cisco 350-901 (Developing Applications using Cisco Core Platforms and APIs (DEVCOR)) Certification Exam is designed for professionals who want to gain expertise in developing applications using Cisco platforms and APIs. Cisco is a well-known name in the IT industry, and this certification is a testament to the quality of the training and the skills that the candidates possess.

Cisco 350-901 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Identify The Secret Storage Approach Relevant To A Given ScenarioConstruct An Application That Consumes A REST API That Supports Pagination
Topic 2	<ul style="list-style-type: none">Implement Mitigation Strategies For OWASP Threats (Such As XSS, CSRF, And SQL Injection)Configure Application Specific SSL Certificates

Topic 3	<ul style="list-style-type: none"> • Describe The Benefits Of Continuous Testing And Static Code Analysis In A CI Pipeline • Utilize Docker To Containerize An Application
Topic 4	<ul style="list-style-type: none"> • Identify A Configuration Management Solution To Achieve Technical And Business Requirements • Describe The Tenets Of The "12-Factor App"
Topic 5	<ul style="list-style-type: none"> • Utilize RESTCONF To Configure A Network Device Including Interfaces, Static Routes, And Vlans (IOS XE Only)
Topic 6	<ul style="list-style-type: none"> • Construct A Python Script Using The Cisco DNA Center Apis To Retrieve And Display Wireless Health Information
Topic 7	<ul style="list-style-type: none"> • Explain Data Privacy Concerns Related To Storage And Transmission Of Data • Explain Considerations Of Model-Driven Telemetry
Topic 8	<ul style="list-style-type: none"> • Evaluate An Application Design And Implementation Considering Observability • Implement Robust REST API Error Handling For Time Outs And Rate Limits
Topic 9	<ul style="list-style-type: none"> • Evaluate An Application Design Considering High-Availability And Resiliency • Explain Architectural Patterns
Topic 10	<ul style="list-style-type: none"> • Describe Distributed Applications Related To The Concepts Of Front-End, Back-End, And Load Balancing
Topic 11	<ul style="list-style-type: none"> • Describe How End-To-End Encryption Principles Apply To Apis • Implement Control Flow Of Consumer Code For Unrecoverable REST API Errors

Hot Valid 350-901 Test Cost Pass Certify | Reliable Valid 350-901 Study Notes: Developing Applications using Cisco Core Platforms and APIs (DEVCOR)

Under the tremendous stress of fast pace in modern life, sticking to learn for a 350-901 certificate becomes a necessity to prove yourself as a competitive man. Nowadays, people in the world gulp down knowledge with unmatched enthusiasm, they desire new things to strength their brains. Our 350-901 Practice Questions have been commonly known as the most helpful examination support materials and are available from global internet storefront. As long as you study with our 350-901 exam questions, you are going to pass the exam without doubt.

To prepare for the Cisco 350-901 Certification Exam, candidates can take advantage of various resources such as Cisco's official study materials, practice exams, and training courses. These resources provide candidates with the necessary knowledge and skills needed to pass the certification exam and enhance their expertise in developing applications using Cisco platforms and APIs.

Cisco Developing Applications using Cisco Core Platforms and APIs (DEVCOR) Sample Questions (Q246-Q251):

NEW QUESTION # 246

Refer to the exhibit. A software engineer develops an application that has a microservices architecture. The microservices must communicate with an API. The engineer creates a Dockerfile for the application and deploys the file to a pre-production environment. After the first API request, a microservice stops and the engineer discovers an error in the log file. What is the cause of this issue?

- A. The API is not authorized to access the resource.
- B. The API failed to find the resource.
- C. The API does not understand the request.
- D. The API failed to complete the request.

Answer: B

Explanation:

In the log, there is a 400HTTP status code returned in response to the API request (GET /snmp-interfaces/devices/by-id/2768). This typically indicates that the server couldn't find the requested resource, which suggests that the API failed to find the resource. This could mean that either the resource was missing or incorrectly referenced.

NEW QUESTION # 247

Refer to the exhibit.

An engineer creates an application that leverages the Ansible framework to provision CPE endpoints that have configuration changes. The application contains an Ansible playbook named provision_cpes.yml that uses the ansible.builtin.script Ansible module to execute these two Python scripts:

* gather_and_create.py. which creates a JSON file named bios.json that contains the CPE models and their respective IOS file information

* load_and_parse.py. which loads the file data and parses it for later consumption After several successful runs, the application fails.

During a review of the Ansible execution logs, the engineer discovers an error output that indicates that one of the stages failed.

What is the cause of this issue?

- A. provision_cpes.yml Ansible playbook
- **B. gather_and_create.py Python script**
- C. load_and_parse.py Python script
- D. ansible builtin script Ansible module

Answer: B

NEW QUESTION # 248

Which security approach should be used for developing a REST API?

- A. Utilize CORS headers
- B. Add an API key to each URL string
- C. Use custom security relevant HTTP response codes
- **D. Utilise TLS for end to end encryption**

Answer: D

NEW QUESTION # 249

Refer to the exhibit.

Refer to the exhibit The Python code manages a Cisco CSR 1000V router Which code snippet must be placed in the blank in the code to update the current configuration of the targeted resource?

- A.
- **B.**
- C.
- D.

Answer: B

NEW QUESTION # 250

A web application is susceptible to cross-site scripting.

Which two methods allow this issue to be mitigated? (Choose two.)

- A. Encrypt user input on the client side.
- B. Use AES encryption to secure the script.
- **C. Limit user input to acceptable characters.**
- D. Use only drop downs.
- **E. Remove all HTML/XML tags from user input.**

Answer: C,E

Explanation:

To mitigate this attack, the easiest way is to escape any user input, both when receiving it from the user and when sending data to other users. For example, replacing the < character with < or < for the web content would disable all HTML tags. In Python, this can be done with the standard `html.escape()` and `html.unescape()` functions. Sometimes some HTML tags are acceptable, so escaping them all is not an option. In this case, sanitization is a suitable solution.

Sanitization processes untrusted user input and runs it through the filter, which allows valid content but strips anything that is not permitted. For example, it may allow <A>, , HTML tags but strip any other tags.
