## 100% Pass Lpi - Reliable 101-500 - LPIC-1 Exam 101, Part 1 of 2, version 5.0 Reliable Dump

The Lpi 101-500 certification is on trending nowadays, and many Lpi aspirants are trying to get it. Success in the 101-500 test helps you land well-paying jobs. Additionally, the 101-500 certification exam is also beneficial to get promotions in your current company. But the main problem that every applicant faces while preparing for the 101-500 Certification test is not finding updated LPIC-1 Exam 101, Part 1 of 2, version 5.0 (101-500) practice questions.

## Lpi LPIC-1 Exam 101, Part 1 of 2, version 5.0 Sample Questions (Q103-Q108):

### NEW QUESTION # 103

To allow a regular user account to mount and unmount a filesystem (for instance, a cdrom or floppy), which option will need to be added to the corresponding line in /etc/fstab?

- A. alluser
- B. auto
- C. user
- D. nouidchk

**Answer: C**

**NEW QUESTION # 104**

When given the following command line.

```
echo "foo bar" | tee bar | cat
```

Which of the following output is created?

- A. cat
- B. foo
- **C. foo bar**
- D. bar
- E. tee bar

**Answer: C**

**NEW QUESTION # 105**

Which option must be listed in /etc/fstab to activate user quotas automatically?

- A. quotaon
- B. user
- **C. usrquota**
- D. quota

**Answer: C**

**NEW QUESTION # 106**

Which of the following vi commands deletes two lines, the current and the following line?

- A. 2d
- **B. 2dd**
- C. de12
- D. d2
- E. dd2

**Answer: B**

Explanation:

Explanation

The correct answer is C, 2dd. This command will delete two lines, the current and the following line, in vi editor. The syntax of the command is:

```
[number]dd
```

The number specifies how many lines to delete, starting from the current line. The dd command deletes the lines and puts them in a buffer, which can be pasted later with the p command. If no number is given, the command will delete only the current line.

The other commands are incorrect for the following reasons:

\* A, d2: This command will delete two characters, not two lines. The syntax of the command is:

```
d[motion]
```

The motion specifies how many characters to delete, starting from the current cursor position. The 2 motion means two characters to the right. The d command deletes the characters and puts them in a buffer, which can be pasted later with the p command.

\* B, 2d: This command is incomplete and will not work. The d command requires a motion argument to specify how many characters to delete. The 2 argument is only a number, not a motion. The command will wait for another keystroke to complete the motion.

\* D, dd2: This command will delete the current line and then move the cursor two lines down. The syntax of the command is:

```
dd[number]
```

The dd command deletes the current line and puts it in a buffer, which can be pasted later with the p command.

The number specifies how many lines to move the cursor down, after deleting the current line. If no number is given, the command will move the cursor to the next line.

\* E, de12: This command will delete from the current cursor position to the end of the word, and then move the cursor to the 12th

line. The syntax of the command is:

`d[motion][number]`

The `d` command deletes the characters specified by the motion and puts them in a buffer, which can be pasted later with the `p` command. The `e` motion means the end of the word. The number specifies the line number to move the cursor to, after deleting the characters.

### NEW QUESTION # 107

Consider the following output from the command `ls -li`:

```
525385 -rw-rw-r-- 2 1000 1000 0 Feb 12 19:44 a.txt
526255 lrwxrwxrwx 1 1000 1000 5 Feb 12 19:44 b.txt -> a.txt
```

How would a new file named `c.txt` be created with the same inode number as `a.txt` (Inode 525385)?

`ln -h a.txt c.txt`

- A. `ln a.txt c.txt`
- B. `ln c.txt a.txt`
- C. `ln -i 525385 c.txt`
- **D. `ln -fc.txt a.txt`**
- E.

**Answer: D**

### NEW QUESTION # 108

.....

101-500 questions & answers cover all the key points of the real test. With the 101-500 training pdf, you can get the knowledge you want in the actual test, so you do not need any other study material. If the 101-500 exam is coming and the time is tense, it is better to choose our 101-500 Test Engine dumps. 101-500 test engine can simulate the actual test during the preparation and record the wrong questions for our reviewing. You just need 20-30 hours for preparation and feel confident to face the 101-500 actual test.
