C-S4EWM-2023 Free Dump Download, New C-S4EWM-2023 Test Voucher

First of all, we have the best and most first-class operating system, in addition, we also solemnly assure users that users can receive the information from the C-S4EWM-2023 certification guide within 5-10 minutes after their payment. Second, once we have written the latest version of the C-S4EWM-2023 certification guide, our products will send them the latest version of the C-S4EWM-2023 Test Practice question free of charge for one year after the user buys the C-S4EWM-2023 exam questions. Last but not least, our perfect customer service staff will provide users with the satisfaction in the hours.

SAP C-S4EWM-2023 Exam Syllabus Topics:

Topic	Details
Topic 1	• Inbound Processes (Value Added Services, Cross-docking, Quality Management): This topic includes executing inbound processes with value added services (VAS) or deconsolidation, and setting up deliveries for cross-docking (CD) or quality inspection (QIE).
Topic 2	• Warehouse Management (Monitor - Cockpit): This topic involves monitoring warehouse activities using the Warehouse Management Monitor, Warehouse Cockpit, and analytical apps.
Topic 3	• Managing Clean Core: It covers evaluating and applying clean core principles to ERP to maximize business process agility, reduce adaptation efforts, and accelerate innovation.
Topic 4	• Outbound Processes (Wave Management, Cross-docking, Production Integration): This topic covers combining outbound deliveries using wave management, packing and kitting in outbound processes, and staging products for production.

Topic 5	• Warehouse Structure, Resource Management and SAP EWM Master Data: This topic encompasses defining the warehouse structure and setting up resource management, along with creating SAP EWM master data like storage bins and products, packaging specifications, supply chain units, and business partners.
Topic 6	• Warehouse Processing, Warehouse Task and Order Creation, Strategies: This topic includes defining warehouse process types and setting up determination, as well as defining putaway and picking strategies.
Topic 7	• Shipping and Receiving: It focuses on configuring Yard Management, SAP Dock Appointment Scheduling, and using the Shipping Cockpit.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management Sample Questions (Q42-Q47):

NEW QUESTION # 42
What can you do with a hot-spot in the warehouse management monitor?

- A. Call the corresponding user interface on the selected object
- B. Change from the list view to the form view of the selected object
- C. Call a method to perform actions on the selected object
- D. Create a basic measurement service

Answer: A

Explanation:
Comprehensive and Detailed In-Depth Explanation:
Hotspots in the SAP EWM warehouse management monitor (/SCWM/MON) are interactive links on objects (e.g., warehouse tasks, bins). Option A ("Call the corresponding user interface on the selected object") is correct because clicking a hotspot navigates to the detailed UI for that object (e.g., warehouse task details).
Options B, C, and D are incorrect: methods are executed via actions, not hotspots (B); view changes are manual (C); and measurement services are configured separately (D).

NEW QUESTION # 43
What information is used to determine the availability group? Note: There are 3 correct answers to this question.

- A. Stock type role
- B. Warehouse number
- C. Plant
- D. Storage location
- E. Non-location-dependent stock type

Answer: B,C,D

Explanation:
Comprehensive and Detailed In-Depth Explanation:
The availability group in SAP EWM defines how stock is grouped for availability checks and is critical for inventory management integration with SAP S/4HANA. It is determined by the plant, storage location, and warehouse number. Option A ("Storage location") is correct because it specifies the physical or logical location within a plant, influencing stock availability. Option D ("Plant") is correct as it's the organizational unit tying inventory to a specific facility. Option E ("Warehouse number") is correct because it links the availability group to a specific EWM-managed warehouse. Stock type role (B) and non-location-dependent stock type (C) influence stock categorization but are not directly used to define the availability group; they are subordinate to the plant/storage location/warehouse structure. This configuration is maintained in SPRO:
SCM Extended Warehouse Management > Goods Receipt Process > Configure Availability Group.

NEW QUESTION # 44
Which stocks can be displayed in the SAP Extended Warehouse Management warehouse management monitor? Note: There are 2

correct answers to this question.

- A. Stock on resources
- B. Stock in transit
- C. Stock in transportation units
- D. Stock at third party

Answer: A,C

NEW QUESTION # 45
Which stocks can be displayed in the SAP Extended Warehouse Management warehouse management monitor? Note: There are 2 correct answers to this question.

- A. Reserved stock
- B. Stock on resources
- C. Stock in transit
- D. Stock in transportation units

Answer: A,B

Explanation:
Comprehensive and Detailed In-Depth Explanation:
The warehouse management monitor in SAP EWM provides visibility into various stock types. Option C ("Reserved stock") is correct as it shows stock allocated for specific tasks or orders, viewable under nodes like "Stock and Bin" in transaction /SCWM/MON. Option D ("Stock on resources") is correct because it displays stock currently handled by resources (e.g., forklifts), also accessible in the monitor. Option A ("Stock in transit") is managed between warehouses and not typically detailed in the EWM monitor, while option B ("Stock in transportation units") relates to transportation management, not warehouse stock visibility.

NEW QUESTION # 46
Which of the following are types of data contained in SAP S/4HANA Cloud? Note: There are 3 correct answers to this question.

- A. Organization
- B. Master
- C. Transaction
- D. Configuration
- E. Business

Answer: A,B,C

Explanation:
Comprehensive and Detailed In-Depth Explanation:
SAP S/4HANA Cloud, including EWM, manages various data types. Option A ("Transaction") is correct for operational data (e.g., warehouse tasks), option C ("Master") is correct for foundational data (e.g., material master), and option D ("Organization") is correct for structural data (e.g., warehouse number), all integral to EWM and configured via master data and transaction processing. Option B (configuration) is a setup activity, not a data type, and option E (business) is too vague.

NEW QUESTION # 47
......

The SAP C-S4EWM-2023 exam questions in the web-based practice test are real and accurate. This SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management (C-S4EWM-2023) practice exam is compatible with Mac, Linux, iOS, Android, and Windows.
