High-quality Interactive L4M1 EBook - 100% Pass L4M1 Exam

Our experts have worked hard for several years to formulate L4M1 exam braindumps for all examiners. Our L4M1 study materials not only target but also cover all knowledge points. And our practice materials also have a statistical analysis function to help you find out the deficiency in the learning process of L4M1 practice materials, so that you can strengthen the training for weak links. In this way, you can more confident for your success since you have improved your ability.

CIPS Scope and Influence of Procurement and Supply Sample Questions (Q10-Q15):

NEW QUESTION # 10

- (a) Outline FIVE procedures that could be included in the procurement policy manual. (15 marks)
- (b) Analyse how TWO Of these procedures can positively influence procurement activities and organisational outcomes for BetaCo. (10 marks)

BetaCo Inc.

BetaCo Inc. is a medium-sized electronics design and manufacturing company that sells audio equipment to event management customers for use in stadiums and festivals. BetaCo has significantly increased its sales over the last five years and is now looking to establish more contracts with new customers. BetaCo Inc. is aware that new customers will require it to have robust procurement processes in place that minimise organisational risk.

Currently, all procurement activities are dealt with by BetaCo's small, customer-orientated project teams. Each project team makes its own procurement decisions with limited central oversight and does not follow standardised processes. This type of activity has resulted in BetaCo frequently encountering overspending on projects, and senior management is concerned that there is a lack of control over what products and services the project teams buy. In addition, suppliers regularly complain that their invoices are not paid on time, which has caused issues for future purchases.

To address these challenges, BetaCo has decided to create a centralised procurement and supply management department. BetaCo has recently appointed Pat Kennedy as its procurement and supply manager. BetaCo has also recruited three senior buyers, five buyers and two assistant buyers, who will join the company in the next few months.

Pat's first task is to establish a procurement policy manual. The manual will contain a set of procedures that can be followed by the new procurement team and it will control the company's procurement activities to ensure that the issues BetaCo is facing are effectively managed.

Answer:

Explanation:

See the solution in Explanation part below.

Explanation:

(a) Five Procedures to Include in BetaCo's Procurement Policy Manual

- * Purchase Requisition and Approval Procedure

- * All procurement requests must be formally submitted through standardized purchase requisition forms and approved by designated authorities before any purchase action is taken.

- * This ensures control over spending and adherence to budgets.

- * Supplier Selection and Evaluation Procedure

- * A structured process to identify, assess, and approve suppliers based on criteria such as quality, reliability, price, and compliance with BetaCo's standards.

- * Supplier performance should be regularly reviewed to maintain quality and reliability.

- * Purchase Order (PO) Management Procedure

- * Clear guidelines on raising, issuing, and tracking purchase orders to suppliers, ensuring orders are placed only after necessary approvals and conform to agreed terms.

- * Purchase orders serve as formal contracts protecting both BetaCo and suppliers.

- * Invoice Processing and Payment Procedure

- * Defines steps for receiving, verifying, and authorizing supplier invoices, followed by timely payment according to agreed payment terms.

- * This avoids late payments and maintains good supplier relationships.

- * Conflict of Interest and Ethics Compliance Procedure

- * Policies requiring employees to declare any conflicts of interest and adhere to ethical standards in procurement activities to ensure transparency and fairness.

- * This prevents fraud, corruption, and protects BetaCo's reputation.

(b) Analysis of How TWO Procedures Positively Influence Procurement Activities and Organisational Outcomes for BetaCo

1. Purchase Requisition and Approval Procedure

- * Positive Influence on Procurement Activities: Introducing a formal purchase requisition and approval procedure provides BetaCo with much-needed control and oversight over spending, addressing the current issue of overspending by project teams. It ensures that all procurement requests are validated against project budgets and company policies before any purchase commitment is made.

- * Impact on Organisational Outcomes: This procedure supports financial discipline and accountability, reducing uncontrolled expenditures and improving cost management. It also creates a clear audit trail for procurement decisions, helping senior management monitor and enforce compliance, thus reducing organisational risk.

2. Invoice Processing and Payment Procedure

- * Positive Influence on Procurement Activities: By implementing a standardized invoice verification and timely payment procedure, BetaCo can resolve the existing problem of late payments to suppliers.

This ensures invoices are matched to purchase orders and delivery notes, approved promptly, and paid within agreed terms.

* **Impact on Organisational Outcomes:** Timely payments strengthen supplier relationships, enhancing trust and reliability in supply continuity, which is critical for BetaCo's growing customer base and production needs. It also helps avoid disputes or disruptions caused by delayed payments, contributing to smoother operations and better supplier cooperation.

Conclusion:

For BetaCo, incorporating structured procurement procedures into the policy manual is essential for centralising control, improving transparency, and reducing risks associated with decentralized procurement activities. Specifically, purchase requisition and approval alongside invoice processing procedures will directly address current challenges, leading to improved financial control, supplier relationships, and operational efficiency, ultimately supporting BetaCo's growth ambitions and reputation.

NEW QUESTION # 11

Analyse FIVE different sources of added value in procurement and supply.
(25 marks)

Answer:

Explanation:

See the solution in Explanation part below.

Explanation:

In procurement and supply, adding value means going beyond simple cost savings to enhance the overall contribution of procurement to the organization's objectives. Added value can be generated in multiple ways, impacting cost, quality, efficiency, innovation, and sustainability. Below are five key sources of added value in procurement and supply, analysed in detail:

1. Cost Reduction and Cost Avoidance

* **Definition:** Cost reduction involves lowering the actual purchase price of goods or services, while cost avoidance refers to actions that prevent costs from increasing in the future.

* **Explanation:** Through effective supplier negotiations, competitive tendering, bulk purchasing, and long-term contracts, procurement can achieve significant cost savings. Cost avoidance can come from proactive management of risks, improving contract terms, or optimizing specifications to prevent future price hikes.

* **Impact:** This directly improves the organization's profitability by reducing expenditure without compromising quality or service levels.

* **Example:** Renegotiating supplier contracts to achieve better rates or standardizing materials to reduce complexity and cost.

2. Improved Quality and Performance

* **Definition:** Enhancing the quality of goods and services procured to meet or exceed organizational needs.

* **Explanation:** Procurement contributes added value by specifying and sourcing higher quality materials or services that reduce defects, returns, and downtime. Better quality improves customer satisfaction and product reliability.

* **Impact:** Higher quality inputs lead to better outputs, reducing internal failures and enhancing brand reputation.

* **Example:** Working with suppliers to implement quality assurance processes or selecting suppliers with robust certification and testing capabilities.

3. Innovation and Supplier Collaboration

* **Definition:** Encouraging suppliers to contribute innovative ideas, technologies, or processes that benefit the organization.

* **Explanation:** Procurement can create value by fostering collaborative relationships with suppliers to drive product innovation, process improvements, and new market opportunities. Early supplier involvement can reduce development times and costs.

* **Impact:** Innovation enhances competitive advantage, supports new product development, and can open up new revenue streams.

* **Example:** Joint development projects with suppliers or using supplier expertise to redesign components for cost efficiency and performance improvement.

4. Risk Management and Supply Continuity

* **Definition:** Identifying and mitigating risks in the supply chain to ensure uninterrupted supply.

* **Explanation:** Procurement adds value by assessing supplier reliability, geopolitical risks, financial stability, and logistical challenges to minimize disruptions. Contingency planning and diversified sourcing reduce vulnerability.

* **Impact:** Reliable supply chains prevent costly production stoppages and reputational damage, contributing to operational resilience.

* **Example:** Developing dual sourcing strategies or monitoring supplier performance and compliance continuously.

5. Sustainability and Corporate Social Responsibility (CSR)

* **Definition:** Integrating environmental and social considerations into procurement decisions.

* **Explanation:** Procurement adds value by selecting suppliers who comply with sustainability standards, ethical labor practices, and environmental regulations. This aligns with organizational CSR goals and reduces negative impacts.

* **Impact:** Enhances brand image, meets regulatory requirements, and can reduce waste and resource consumption.

* **Example:** Choosing suppliers with certified green practices or implementing circular economy principles in supply chains.

Conclusion:

Added value in procurement and supply extends beyond price savings to include quality enhancement, innovation, risk mitigation, and sustainability. By strategically managing supplier relationships and aligning procurement activities with organizational goals,

procurement professionals can deliver significant and measurable benefits that improve competitive advantage and organizational performance.

NEW QUESTION # 12

Provide a definition of a stakeholder (5 points) and describe 3 categories of stakeholders (20 points).

Answer:

Explanation:

See the solution in Explanation part below.

Explanation:

Essay Plan:

Definition of Stakeholder- someone who has a 'stake' or interest in the company. A person or organisation who influences and can be influenced by the company.

Categories of stakeholders:

- 1) Internal Stakeholders- these people work inside the company e.g. employees, managers etc
- 2) Connected- these people work with the company e.g. suppliers, mortgage lenders
- 3) External Stakeholders - these people are outside of the company e.g. the government, professional bodies, the local community.

Example Essay:

A stakeholder is an individual, group, or entity that has a vested interest or concern in the activities, decisions, or outcomes of an organization or project. Stakeholders are those who can be affected by or can affect the organization, and they play a crucial role in influencing its success, sustainability, and reputation.

Understanding and managing stakeholder relationships is a fundamental aspect of effective organizational governance and decision-making and there are several different types of stakeholders.

Firstly, internal stakeholders are those individuals or groups directly connected to the daily operations and management of the organization. Internal stakeholders are key to success and are arguably more vested in the company succeeding. They may depend on the company for their income / livelihood. Anyone who contributes to the company's internal functions can be considered an internal stakeholder for example:

This category includes

- 1) Employees: With a direct influence on the organization's success, employees are critical internal stakeholders. Their engagement, satisfaction, and productivity impact the overall performance.
- 2) Management and Executives: The leadership team has a significant influence on the organization's strategic direction and decision-making. Their decisions can shape the company's future.

Secondly, connected stakeholders are those individuals or groups whose interests are tied to the organization but may not be directly involved in its day-to-day operations. Connected stakeholders work alongside the organisation and often have a contractual relationship with the organisation. For example, banks, mortgage lenders, and suppliers. These stakeholders have an interest in the business succeeding, but not as much as internal stakeholders. It is important to keep these stakeholders satisfied as the organisation does depend on them to some extent. For example, it is important that the organisation has a good relationship with their bank / mortgage provider/ supplier as failing to pay what they owe may result in the stakeholders taking legal action against the organisation.

This category includes:

- 1) Shareholders/Investors: Holding financial stakes in the organization, shareholders seek a return on their investment and have a vested interest in the company's financial performance.
- 2) Suppliers and Partners: External entities providing goods, services, or collaboration. Their relationship with the organization impacts the quality and efficiency of its operations.

Lastly external stakeholders are entities outside the organization that can influence or be influenced by its actions. This category includes anyone who is affected by the company but who does not contribute to internal operations. They have less power to influence decisions than internal and connected stakeholders. External stakeholders include the government, professional bodies, pressure groups and the local community. They have quite diverse objectives and have varying ability to influence the organisation. For example, the government may be able to influence the organisation by passing legislation that regulates the industry but they do not have the power to get involved in the day-to-day affairs of the company. Pressure groups may have varying degrees of success in influencing the organisation depending on the subject matter. This category includes:

- 1) Customers: With a direct impact on the organization's revenue, customers are vital external stakeholders. Their satisfaction and loyalty are crucial for the company's success.
- 2) Government and Regulatory Bodies: External entities overseeing industry regulations. Compliance with these regulations is crucial for the organization's reputation and legal standing.

In conclusion, stakeholders are diverse entities with a vested interest in an organization's activities. The three categories-internal, connected and external -encompass various groups that significantly influence and are influenced by the organization. Recognizing and addressing the needs and concerns of stakeholders are vital for sustainable and responsible business practices.

Tutor Notes

- The above essay is pretty short and to the point and would pass. If you want to beef out the essay you can include some of the following information for a higher score:
- Stakeholders can be harmed by, or benefit from the organisation (can affect and be affected by the organisation). For example a stakeholder can be harmed if the organisation becomes involved in illegal or immoral practices- e.g. the local community can suffer if the organisation begins to pollute the local rivers.
- The local community can also benefit from the organisation through increased employment levels.
- CSR argues organisations should respect the rights of stakeholder groups
- Stakeholders are important because they may have direct or indirect influence on decisions
- The public sector has a wider and more complex range of stakeholders as they're managed on behalf of society as a whole. They're more likely to take a range of stakeholder views into account when making decisions. However, these stakeholders are less powerful - i.e. they can't threaten market sanctions, to withdraw funding, or to quit the business etc.
- The essay doesn't specifically ask you to Map Stakeholders, but you could throw in a cheeky mention of Mendelow's Stakeholder Matrix, perhaps in the conclusion. Don't spend time describing it though- you won't get more than 1 point for mentioning it. You'd be better off spending your time giving lots and lots of examples of different types of stakeholders.
- Study guide p. 58

NEW QUESTION # 13

Describe the CIPS Code of Conduct providing examples of how an organisation can ensure compliance with the standard (25 points)

Answer:

Explanation:

See the solution in Explanation part below.

Explanation:

How to approach this question:

- This is the type of question you either know or you don't. You can't really guess it. So do memorise it.

There's not really a shortcut here.

- The CIPS Code of Conduct is an ethical standard and framework which is used profession-wide. The purpose is to standardise ethics across the profession.

- There are 5 aspects to the Code of Conduct: enhance and protect the standing of the profession, promote the eradication of unethical business practices, maintain integrity in all business relationships, enhance proficiency and stature of the profession and ensure full compliance with law and regulations.

Example Essay:

The Chartered Institute of Procurement & Supply (CIPS) Code of Conduct is a comprehensive set of principles and standards that guide the ethical conduct of procurement and supply professionals. Adhering to this code is crucial for maintaining integrity, transparency, and responsible behaviour within the procurement profession. Here's an overview of the CIPS Code of Conduct along with examples of how organizations can ensure compliance with these standards:

1 - Enhance and protect the standing of the profession.

This means don't bring the profession into disrepute by your actions, don't accept gifts or offers of hospitality and to be aware that behaviour outside work reflects one's reputation as a professional. An organisation can implement training programs to educate procurement professionals about the importance of maintaining high standards of professionalism and integrity in their interactions with suppliers and stakeholders.

2 - Promote the eradication of unethical business practices.

This means fostering awareness of human rights, fraud and corruption issues in business relationships, responsibly managing business relationships if unethical practices come to light, undertaking due diligence (in respect to forced labour, fraud, corruption) and continually develop one's own personal knowledge of ethical issues. Promoting the eradication of unethical business practices requires a comprehensive and proactive approach from organizations. This involves having a strong CSR policy, having whistleblowing protection and reporting mechanisms, and conducting due diligence on the supply chain.

3 - Maintain integrity in all business relationships.

An organisation can show compliance with this by; rejecting improper business practices, never using authority for personal gain, declaring conflicts of interest, giving accurate information, not breaching confidentiality, striving for genuine, fair and transparent competition and being truthful about skills and experience. An example of this is for an organisation to sever ties with unethical businesses. One notable example of a retailer terminating a relationship with a supplier due to ethical reasons is the case of H&M and its decision to cut ties with a Chinese yarn producer in Xinjiang province. H&M, a global fashion retailer, announced in early 2021 that it would no longer source cotton from Xinjiang due to concerns over forced labour and human rights abuses associated with cotton production in the region.

4 - Enhance proficiency and stature of the profession.

Activities which would demonstrate compliance with this includes: Continual development of knowledge and skills, fostering the highest standards of competence in staff members at the organisation and optimising the responsible use of resources. For

procurement staff, this could involve becoming MCIPS qualified, and even once qualified, completing routine CPD (Continued Professional Development) to ensure their knowledge and skills remain updated and relevant. They should also strive to share their knowledge with the wider organisation.

5 - Ensure full compliance with law and regulations.

An organisation can demonstrate compliance with the standard by proving they: follow the law in all countries they do business in, fulfilling all contractual obligations and following the CIPS guidance on professional practice. Compliance can include aspects of fiduciary responsibility such as paying the correct level of tax and filing returns on time, as well as compliance to legislation such as the Health and Safety at Work Act 1974 and the Equalities Act 2000.

In conclusion, the CIPS Code of Conduct is a voluntary standard for organisations to follow but it sets a high standard for the industry. By following the CIPS Code of Conduct organisations can enhance their reputation and levels of trust among stakeholders, as well as being reassured that following these clear ethical guidelines contribute to a positive workplace culture, boosting employee morale and commitment by fostering a sense of shared values.

Tutor Notes:

- Under the previous syllabus CIPS asked this question a lot. If you memorise one thing from the study guide I'd recommend it be this. Even if it doesn't come up as a stand-alone question, you can work it into more general essays about ethics- so it is useful to know.

- For a top score, try to give deep examples. So where you have said 'responsibly managing business relationships' you could explain what this means in practice- by ensuring fair contract terms are put in place, holding suppliers to account when they do something wrong and not exploiting smaller suppliers. Where you have said 'complete Due Diligence' you could mention that this would be completed before awarding a contract to a supplier and would involve looking at a supplier's history and supply chain to ensure that they have not been involved in any crimes (fraud etc) or unethical behaviour (such as polluting the environment).

The more in depth you go, the more you show the examiner your understanding, and the higher you'll score.

- p. 137 or here: Cips Code of Conduct | CIPS Note the study guide talks on p. 132 about the CIPS Code of Ethics, which is slightly different. The Code of Conduct is the main one to learn.

NEW QUESTION # 14

What is a Code of Ethics? What should an Ethical Policy Contain? What measures can an organisation take if there is a breach of their Ethical Policy? (25 points)

Answer:

Explanation:

See the solution in Explanation part below.

Explanation:

- Firstly give a short definition of Code of Ethics: a document that sets out moral principles or values about what is right and wrong.
- What an Ethical Policy should contain: Condition of workers, Environment, H+S, Discrimination, Gift / Bribery Policy, Whistleblowing, Confidentiality, Fair Dealings, Declaration of Conflict of Interests. You won't have time to go into depth on all of these, so pick a few where you want to give an example.

- Measures to take if there is a breach: depending on what the breach is and who breached it this could include: education/ training, sanctions, blacklisting, reporting to authorities, publicise the issue, use a performance improvement plan, issue warnings, dismissal.

Example Essay:

A code of ethics is a formal document or set of principles that outlines the values, ethical standards, and expected conduct for individuals within an organization. It serves as a guide for employees and stakeholders, shaping their behaviour and decision-making to align with the organization's ethical framework. It may take the form of a Mission Statement, Core Values, Specific Guidelines or established reporting mechanisms. The purpose of the Code is to establish standards, promote integrity, mitigate risks and build trust- with both internal and external stakeholders.

A Code of Ethics may contain the following:

- Condition of workers - stating what the company will provide to the employees to make sure the environment is safe. This could include the physical environment but also hours worked, opportunities for breaks etc. Depending on the sector it could detail shift patterns, expectations regarding overtime and compensation.
- Environment - this section would discuss compliance with legislation regarding pollution, disposal of waste materials etc. Depending on the company's goals- they may have higher commitments to the environment than those imposed by the government. Additional commitments may include NetZero targets or the use of renewable sources of energy.
- H+S- Health and Safety. Ensuring that the working environment is free of hazards and that workers have the training and equipment they need to complete the work safely. E.g. PPE
- Discrimination- a promise not to discriminate based on any characteristic. Aligns with the Equalities Act.

Policy should include how the company would handle situations, for example if an employee reports an issue of discrimination or harassment. This may involve the use of a whistleblowing hotline or details on how to contact HR.

- Gift / Bribery Policy - this area of the code of conduct would explain whether the company allows staff members to receive gifts

(e.g. from suppliers) and the processes to complete if they do (e.g. return the item, complete an internal document, donate the gift to charity). Different companies and industries will have different rules surrounding this, the Public Sector is much more likely to reject gifts from suppliers for example.

- Declaration of conflict of interests- this explains what staff should do if there is a conflict. For example if they are running a tender and their father owns one of the suppliers who is bidding for the work. The conflict of interest policy will explain what the person should do, how to report it and have mechanisms in place to ensure that nothing untoward could come of the situation. This may be having another member of staff mark the tender to ensure unbiasedness.

Measures to take in case of a breach

A response to a breach will depend on who breached the policy - whether this is an employee or a supplier. It will also depend on the severity of the breach.

Remedies for a supplier breach could include: education / training if the breach is minor. Supplier development if the relationship with the supplier is very important (for example if there are no other suppliers the buyer could turn to) and the breach is minor. If the breach is major such as fraud or misappropriation of funds, a buyer could look to issue sanctions, claim damages and dismiss the supplier. There could be options to claim liquidated damages if this is included in the contract. For very serious offenses the buyer may blacklist the supplier- never use them ever again and could also report the issue to the police if the breach is also criminal (e.g. modern slavery or fraud).

Remedies for an employee breach could include: for minor breaches training may be required, particularly if it was a junior member of the team and it was an innocent mistake like forgetting to fill out a form when they received a Gift. The employee could be carefully monitored and put on an Improvement Plan. If internal issues are found, such as several staff are breaching the Code of Ethics, senior management could look to review policies to make sure issues are being flagged and responded to in the best way. Employees who fail to follow the Ethical Policy, either through routinely failing to adhere to it or through a major breach could be dismissed from the organisation. There would need to be strong evidence of this.

In conclusion it is important for all organisations regardless of size of industry to have an Ethics Policy.

Sharing the code of ethics with staff is a fundamental step in embedding ethical principles into the organizational culture. Regular communication and training reinforce these principles, fostering a shared commitment to ethical behaviour across all levels of the organization.

Tutor Notes

- In an essay like this it's always a good example to use examples. They can be hypothetical - you don't have to know any company's Ethics policy off by heart. E.g. If a supplier breached a buyer's Ethical Policy by employing Child Labour in their factories, an appropriate measure for the buyer to take would be to cancel the contract and find another supplier. This is because not only is Child Labour illegal, the buyer will not want to be associated with this supplier as it will have negative repercussions on their image. The best response would therefore be to distance themselves from the supplier.

- Code of Ethics and an Ethics Policy are the same thing. Just different language. The terms can be used interchangeably

- Study guide p. 128

NEW QUESTION # 15

.....

The Web-Based CIPS L4M1 practice test evaluates your Scope and Influence of Procurement and Supply exam preparation with its self-assessment features. With this computer-based program, you may automate the entire CIPS exam testing procedure. The web-based CIPS L4M1 practice test elegantly designed interface is compatible with all browsers, including Internet Explorer, Safari, Opera, Google Chrome, and Mozilla Firefox. It will make practice and preparation for the CIPS L4M1 Exam more intelligent, quick, and simple. So, you can be confident that you will find all you need to know to pass the CIPS L4M1 exam questions on the first try.
