

# 100% Pass Quiz 2026 Oracle High Pass-Rate Reliable 1Z0-1072-25 Test Price

BTW, DOWNLOAD part of PassSureExam 1Z0-1072-25 dumps from Cloud Storage: [https://drive.google.com/open?id=1Je-q3Vd7e3tGKn1jjO8r7pF7rM15QV\\_Q](https://drive.google.com/open?id=1Je-q3Vd7e3tGKn1jjO8r7pF7rM15QV_Q)

Compared with other education platform on the market, PassSureExam is more reliable and highly efficiently. It provide candidates who want to pass the 1Z0-1072-25 exam with high pass rate study materials, all customers have passed the exam in their first attempt. They all need 20-30 hours to learn on our website can pass the exam. 1Z0-1072-25 Exam Dump is really a high efficiently exam tool that can help you save much time and energy to do other things.

We are well-known for our wonderful performance on pushing more and more candidates to pass their 1Z0-1072-25 exams and achieve their dreaming certifications. There is no exaggeration to say that with our 1Z0-1072-25 study materials for 20 to 30 hours, you will be ready to pass your 1Z0-1072-25 Exam. Since our 1Z0-1072-25 exam torrent is designed on the purpose to be understood by our customers all over the world, it is compiled into the simplest language to save time and efforts.

## 1Z0-1072-25 Pdf Free | 1Z0-1072-25 Real Dumps

PassSureExam IT expert team take advantage of their experience and knowledge to continue to enhance the quality of exam training materials to meet the needs of the candidates and guarantee the candidates to pass the Oracle Certification 1Z0-1072-25 Exam which is they first time to participate in. Through purchasing PassSureExam products, you can always get faster updates and more accurate information about the examination. And PassSureExam provide a wide coverage of the content of the exam and convenience for many of the candidates participating in the IT certification exams except the accuracy rate of 100%. It can give you 100% confidence and make you feel at ease to take the exam.

## Oracle 1Z0-1072-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Compute: This section measures skills of cloud architects responsible for designing scalable and resilient infrastructure, covering compute instance configuration, autoscaling policies, and OS management. It evaluates understanding of OCI compute image options, infrastructure maintenance processes, and strategies for optimizing instance performance across availability domains.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Identity and Access Management (IAM): This domain validates skills of security architects implementing granular access controls, emphasizing IAM policy creation, compartment organization, and dynamic group configuration. It covers identity domain management, network source restrictions, and tag-based access mechanisms to enforce least-privilege principles across OCI resources</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Networking: Targeting network architects designing secure cloud architectures, this domain focuses on Virtual Cloud Network (VCN) implementation, including subnet design, IP address management, and routing through gateways (NAT, service, internet). It assesses expertise in VPN</li> <li>FastConnect deployment, DNS configuration, load balancer setup, and advanced tools like Network Path Analyzer for troubleshooting latency or connectivity issues.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Storage: Designed for storage administrators managing enterprise data solutions, this section tests proficiency in deploying Block</li> <li>File</li> <li>Object Storage with lifecycle management, cross-region replication, and tiered storage strategies. It includes configuring volume groups, snapshots, versioning, and security controls while analyzing storage performance metrics and cost optimization techniques.</li> </ul>

## Oracle Cloud Infrastructure 2025 Architect Associate Sample Questions (Q43-Q48):

### NEW QUESTION # 43

Which statement is NOT true about the Oracle Cloud Infrastructure (OCI) Object Storage service?

- A. Object Storage resources can be shared across tenancies.
- B. Object lifecycle rules can be used to archive or delete objects.
- C. Immutable option for data stored in Object Storage can be set via retention rules.
- D. Object Versioning is enabled at the namespace level.

**Answer: A**

Explanation:

Oracle Cloud Infrastructure (OCI) Object Storage is a scalable, highly durable service that allows you to store any type of data in a secure and cost-effective manner. The correct and incorrect statements regarding OCI Object Storage are as follows:

A . Immutable Option: You can indeed set an immutable option for data in Object Storage using retention rules. This feature ensures that once data is written, it cannot be modified or deleted until the retention period expires, making it ideal for regulatory compliance.

C . Object Lifecycle Rules: Object lifecycle policies allow you to automate the archiving or deletion of objects based on their age or other criteria, helping manage storage costs and data retention efficiently.

D . Object Versioning: Versioning is enabled at the bucket level, not the namespace level. However, once enabled for a bucket, it helps retain, retrieve, and restore every version of every object stored in that bucket.

B . Object Storage Sharing Across Tenancies: This statement is not true. OCI Object Storage buckets and objects are specific to a tenancy and cannot be shared across different tenancies directly. Access to Object Storage resources is controlled within a single tenancy through IAM policies.

Relevant OCI Documentation:

[OCI Object Storage Overview](#)

[Object Lifecycle Management](#)

These references provide details on how Object Storage functions and the features available.

### NEW QUESTION # 44

How will moving a database instance to a different compartment impact user access?

- A. Access will be revoked for all users.
- B. IAM policies are not tied to compartments.
- C. Compartments prevent resource movement.
- D. Compartments are not covered by IAM policies.

**Answer: A**

Explanation:

In Oracle Cloud Infrastructure (OCI), when you move a database instance to a different compartment, the following impact on user access occurs:

**Impact of Moving Resources:** When you move a resource, like a database instance, to a different compartment, the IAM policies that grant access to that resource in the original compartment no longer apply. This effectively revokes access for users or groups unless equivalent policies are in place in the new compartment.

**Restoring Access:** To restore access, you would need to create new IAM policies in the destination compartment that grant the necessary permissions to the users or groups who need access.

Relevant OCI Documentation:

[Managing Compartments](#)

[Moving Resources](#)

These resources provide detailed steps on how compartment changes impact resource access and management.

**NEW QUESTION # 45**

Which statement is true about File System Replication in Oracle Cloud Infrastructure (OCI)?

- A. You can replicate the data in one file system to another file system only in the same region.
- B. You cannot specify a replication interval when you create the replication resource.
- C. Only a file system that has been exported can be used as a target file system.
- D. You can replicate the data in one file system to another file system in the same region or a different region.

**Answer: D**

Explanation:

File System Replication in Oracle Cloud Infrastructure (OCI) allows you to replicate data from one file system to another either within the same region or across different regions. This capability is particularly useful for disaster recovery, data protection, and global data distribution scenarios.

**Cross-Region Replication:** The replication feature enables you to create a copy of your file system in a different region, ensuring that your data is available even in the event of a regional failure.

**Same-Region Replication:** You also have the option to replicate data within the same region, which can be useful for scenarios such as high availability and local backups.

**NEW QUESTION # 46**

Which Traffic Management Steering Policy facilitates the distribution of DNS traffic based on the geographical location of end users?

- A. Proximity Steering
- B. IP Prefix Steering
- C. ASN Steering
- D. Geolocation Steering

**Answer: D**

Explanation:

Geolocation Steering in OCI's Traffic Management Steering Policy allows you to distribute DNS traffic based on the geographical location of the end users. This method helps direct users to the nearest regional endpoint, optimizing latency and improving user experience.

**Use Cases:** Geolocation Steering is commonly used to deliver region-specific content, comply with data residency laws, or optimize service performance by directing traffic to the closest available servers.

## NEW QUESTION # 47

What is the primary function of the Network Path Analyzer (NPA) tool provided by Oracle Cloud Infrastructure (OCI)?

- A. Optimizing network performance by dynamically adjusting routing paths based on traffic patterns
- B. Providing real-time monitoring of network traffic to detect security threats and unauthorized access attempts
- **C. Collecting and analyzing network configuration to identify virtual network configuration issues impacting connectivity**
- D. Sending actual traffic between source and destination to diagnose connectivity issues

**Answer: C**

Explanation:

The primary function of the Network Path Analyzer (NPA) tool in Oracle Cloud Infrastructure (OCI) is to help users troubleshoot and diagnose network connectivity issues by analyzing the network path between a source and a destination within OCI. The tool collects and analyzes the configuration of the virtual network, identifying any misconfigurations or issues that might impact connectivity.

NPA Usage: The Network Path Analyzer allows administrators to trace the network path and check for issues such as incorrect security list rules, route table misconfigurations, or any other factors that could prevent network traffic from reaching its destination.
