ExamDumpsVCE help you to find real ECCouncil 212-82 exam preparation process in a real environment. If you are a beginner, and if you want to improve your professional skills, ExamDumpsVCE ECCouncil 212-82 exam braindumps will help you to achieve your desire step by step. If you have any questions about the exam, ExamDumpsVCE the ECCouncil 212-82 will help you to solve them. Within a year, we provide free updates. Please pay more attention to our website.

The Certified Cybersecurity Technician certification process involves taking the exam after completing the required training. The training can be obtained through various means, such as online courses or classroom instruction. The training covers all the topics included in the exam and is designed to prepare individuals to pass the exam and obtain the certification.

ECCouncil 212-82 certification exam is a multiple-choice exam that consists of 50 questions. 212-82 exam duration is 2 hours, and a passing score of 70% or higher is required to obtain the certification. 212-82 Exam covers various topics such as network security, threat management, vulnerability assessment, and incident response. Upon passing the exam, individuals will have demonstrated their knowledge and skills in cybersecurity and will receive the CCT certification. Certified Cybersecurity Technician certification is valid for three years, after which individuals will need to renew their certification to stay up to date with the latest industry trends and best practices.

## 212-82 Exam Pattern

However, you should keep in mind that to get success in the 212-82 certification exam is not a simple and easy task. A lot of effort, commitment, and in-depth Certified Cybersecurity Technician (212-82) exam questions preparation is required to pass this 212-82 Exam. For the complete and comprehensive Certified Cybersecurity Technician (212-82) exam dumps preparation you can trust valid, updated, and 212-82 Questions which you can download from the ExamDumpsVCE platform quickly and easily.

The CCT exam is ideal for individuals who are starting their career in cybersecurity and want to establish their foundational skills. 212-82 Exam is also suitable for IT professionals who want to transition into the cybersecurity field. Certified Cybersecurity Technician certification exam validates the individual's skills and knowledge in cybersecurity fundamentals, which are vital for organizations looking to hire cybersecurity professionals. In addition, the CCT certification provides a pathway for individuals to advance their cybersecurity career through further certification and training. Overall, the CCT certification is an excellent starting point for individuals who are interested in a career in cybersecurity.

## ECCouncil Certified Cybersecurity Technician Sample Questions (Q161-Q166):

### NEW QUESTION # 161

A large multinational corporation is in the process of upgrading its network infrastructure to enhance security and protect sensitive data. As part of the upgrade, the IT team is considering implementing stateful multilayer inspection firewalls and application-level gateway firewalls.

How do stateful multilayer inspection firewalls differ from application-level gateway firewalls in terms of their packet filtering capabilities and the layers of the OSI model they inspect?

- A. Stateful multilayer inspection firewalls focus on inspecting packets at the application layer, while application-level gateway firewalls primarily filter packets at the network layer.
- B. Stateful multilayer inspection firewalls filter traffic based on specified application rules, applications, or protocols, while application-level gateway firewalls allow unknown traffic up to level 2 of the network stack.
- C. Stateful multilayer inspection firewalls are more expensive and require competent personnel to administer them, while application-level gateway firewalls evaluate network packets for valid data at the application layer.
- **D. Stateful multilayer inspection firewalls track and maintain session information between hosts, while application-level gateway firewalls control input, output, and access across applications or services.**

**Answer: D**

### NEW QUESTION # 162

An organization hired a network operations center (NOC) team to protect its IT infrastructure from external attacks. The organization utilized a type of threat intelligence to protect its resources from evolving threats. The threat intelligence helped the NOC team understand how attackers are expected to perform an attack on the organization, identify the information leakage, and determine the attack goals as well as attack vectors.

Identify the type of threat intelligence consumed by the organization in the above scenario.

- A. Strategic threat intelligence
- B. Tactical threat intelligence
- **C. Technical threat intelligence**
- D. Operational threat intelligence

**Answer: C**

### NEW QUESTION # 163

An IoT device placed in a hospital for safety measures has sent an alert to the server. The network traffic has been captured and stored in the Documents folder of the "Attacker Machine-1". Analyze the IoTdeviceTraffic.pcapng file and identify the command the IoT device sent over the network.

- A. High\_Tempe
- B. Low\_Temp e
- **C. Temp\_High**

- D. Tempe\_Low

**Answer: C**

Explanation:

The IoT device sent the command Temp\_High over the network, which indicates that the temperature in the hospital was above the threshold level. This can be verified by analyzing the IoTdeviceTraffic.pcapng file using a network protocol analyzer tool such as Wireshark. The command Temp\_High can be seen in the data field of the UDP packet sent from the IoT device (192.168.0.10) to the server (192.168.0.1) at 12:00:03.

#### NEW QUESTION # 164

Jase, a security team member at an organization, was tasked with ensuring uninterrupted business operations under hazardous conditions. Thus, Jase implemented a deterrent control strategy to minimize the occurrence of threats, protect critical business areas, and mitigate the impact of threats. Which of the following business continuity and disaster recovery activities did Jase perform in this scenario?

- A. Response
- B. Restoration
- C. Prevention
- D. Recovery

**Answer: C**

Explanation:

Prevention is the business continuity and disaster recovery activity performed by Jase in this scenario. Prevention is an activity that involves implementing a deterrent control strategy to minimize the occurrence of threats, protect critical business areas, and mitigate the impact of threats. Prevention can include measures such as backup systems, firewalls, antivirus software, or physical security.

#### NEW QUESTION # 165

A disgruntled employee transferred highly confidential tender data of upcoming projects as an encoded text. You are assigned to decode the text file snitch.txt located in the Downloads folder of the Attacker Machine and determine the value of the greenfarm project in dollars. Hint 1: All the cryptography tools are located at "Z:\CCT-Tools\CCT Module 14 Cryptography". Hint 2: If required, you can use sniffer@123 as the password to decode the file. (Practical Question)

- A. 0
- B. 9S000
- C. 1
- D. 2

**Answer: C**

#### NEW QUESTION # 166
