Efficient 100% Free SC-300 – 100% Free Examcollection Free Dumps | Test SC-300 Dump

As a responsible company, we don't ignore customers after the deal, but will keep an eye on your exam situation. Although we can assure you the passing rate of our SC-300 study materials nearly 100 %, we can also offer you a full refund if you still have

concerns. If you try our SC-300 Study Materials but fail in the final exam, we can refund the fees in full only if you provide us with a transcript or other proof that you failed the exam.

To prepare for the Microsoft SC-300 Certification Exam, candidates should have a solid understanding of identity and access management concepts and Microsoft technologies. Microsoft provides a range of training resources to help candidates prepare for the exam, including online courses, practice tests, and study guides. Candidates can also attend training courses and workshops offered by Microsoft partners.

Microsoft Identity and Access Administrator Sample Questions (Q319-Q324):

NEW QUESTION # 319

You use Azure Monitor to analyze Azure Active Directory (Azure AD) activity logs.

You receive more than 100 email alerts each day for failed Azure AD user sign-in attempts.

You need to ensure that a new security administrator receives the alerts instead of you.

Solution: From Azure AD, you create an assignment for the Insights at administrator role.

Does this meet the goal?

- A. No
- B. Yes

Answer: A

Explanation:

According to the Microsoft SC-300 study guide and Microsoft Learn documentation on Azure Monitor and Azure AD integration, the Insights Administrator role provides permissions to access Azure AD insights, reports, and monitoring data - but it does not control alert delivery or action groups in Azure Monitor.

The problem states that the administrator is receiving too many alert emails generated by Azure Monitor for failed sign-ins, and the goal is to redirect these alerts to another administrator.

However, assigning the Insights Administrator role only allows the new user to view and analyze sign-in logs or usage reports; it does not affect alert notifications or recipients configured within Azure Monitor's action group system.

Therefore, this action does not meet the goal, since alert delivery is controlled at the Azure Monitor action group level, not by Azure AD roles.

Correct Answer: B. No

NEW QUESTION # 320

You need to meet the technical requirements for the probability that user identities were compromised.

What should the users do first, and what should you configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

☐

Answer:

Explanation:

☐

NEW QUESTION # 321

You have an Azure subscription that contains a virtual machine named VM1. VM1 has the following configurations:

* Private IP address: 172.16.1.5

* Public IP address 10.1.143.16U5

* System-assigned managed identity status: On

You install an app named App1 on VM1.

You need to configure App1 to request a managed identity app-only access token. Which IP address should App1 use for the request?

- A. 172.16.1.5
- B. 169.254.169.254
- C. 10.1.143.16.25
- D. 127.0.0.1

Answer: B

NEW QUESTION # 322

You have an Azure subscription that contains a resource group named RG1. RG1 contains two virtual machines named VM1 and VM2 that have Microsoft Entra ID login enabled.

The subscription contains the users shown in the following table.

Which users can sign in to VM1, and which users can sign in to VM2? To answer, select the appropriate options in the answer area.

NOTE:

Each correct selection is worth one point.

Which users can sign in to VM1, and which users can sign in to VM2? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 323

Your company requires that users request access before they can access corporate applications.

You register a new enterprise application named MyApp1 in Azure Active Directory (Azure AD) and configure single sign-on (SSO) for MyApp1.

Which settings should you configure next for MyApp1?

- A. Self-service
- B. Application proxy
- C. Provisioning
- D. Roles and administrators

Answer: A

Explanation:

Users can self-discover apps, users can request access for app, can configure list of individuals to approve or require business approval before granting access to application.
