TestValid is a leading platform that has been helping the Nutanix NCP-CN-6.10 exam candidates for many years. Over this long

time period, countless Nutanix NCP-CN-6.10 exam candidates have passed their dream Nutanix Certified Professional - Cloud Native v6.10 (NCP-CN-6.10) certification and they all got help from valid, updated, and real Nutanix Certified Professional - Cloud Native v6.10 (NCP-CN-6.10) exam questions. So you can also trust the top standard of Nutanix NCP-CN-6.10 exam dumps and start NCP-CN-6.10 practice questions preparation without wasting further time.

Nutanix Certified Professional - Cloud Native v6.10 Sample Questions (Q99-Q104):

NEW QUESTION # 99

A Platform Engineer would like to install some NKP applications, but with a few modifications to the default configuration specs of some of the components. Additionally, Velero itself can be disabled, as the company already utilizes a different backup utility for Kubernetes. Which procedure would the engineer utilize to accomplish these goals when deploying the applications?

- A. Execute `nkp install kommander --init` to an output file. Set the custom specs for the components to be modified in the output file. Deploy the NKP applications using the `nkp install kommander` command, specifying the output file. Once the NKP applications install has completed, execute `kubectl delete hr -n kommander velero`.
- **B. Execute `nkp install kommander --init` to an output file. Disable Velero in the output file and set the custom specs for the components to be modified. Deploy the NKP applications using the `nkp install kommander` command, specifying the output file.**
- C. Execute `nkp config kommander`. Disable Velero in the resulting output file and set the custom specs for the components to be modified. Deploy the NKP applications using the `nkp install kommander` command, specifying the output file.
- D. Execute `nkp config kommander --init` to an output file. Disable Velero in the output file and set the custom specs for the components to be modified. Deploy the applications using the `helm install` command, specifying the output file.

Answer: B

NEW QUESTION # 100

In a telecom company, two teams were working on the development of two different applications:

ApplicationA

ApplicationB

ApplicationA's development team was excited about the release of their new functionality.

However, upon deploying their application, they noticed that performance was slow. After investigating, they discovered that the ApplicationB team was consuming the majority of the cluster's resources, affecting all other teams. How can this problem be mitigated?

- A. Setting up Network Policies
- **B. Implementing Quotas and Limit Ranges**
- C. Configuring RBAC
- D. Implementing Continuous Deployment (CD)

Answer: B

NEW QUESTION # 101

A company has been modernizing on cloud-native platforms for the past few years and has been running some small consumer support utilities on their production NKP cluster. After a thorough testing and QA cycle with simulated workloads on a development cluster, the company is ready to bring their online retail application into the fold. While they have sufficient system resources to scale the NKP cluster properly from a performance standpoint, they also want to ensure they properly scale their monitoring stack's resource settings to retain a sufficient amount of data to see how overall system resource utilization trends for the NKP cluster over several months' time with the added workloads. Which NKP Platform Application component should the company be most concerned with adjusting, and how should their Platform Engineer adjust it?

- A. Adjust the number of replicas for the Fluent Bit deployment, as well as increase the amount of storage available for use by the NKP cluster.
- B. Adjust the number of replicas for the Prometheus deployment, as well as increase the amount of storage available for use by the NKP cluster.
- C. Adjust the resource settings for Fluent Bit by increasing its container resource limits and memory settings, as well as its storage.
- **D. Adjust the resource settings for Prometheus by increasing its container resource limits and memory settings, as well as its**

storage.

Answer: D

NEW QUESTION # 102

A Platform Engineer for an organization needs to deploy NKP into AWS while using custom credentials for authenticating. Which flag should the engineer use when starting to bootstrap the cluster installation?

- A. `--cloud-credentials=<my-profile>
`
- B. `--with-aws-bootstrap-credentials=true
`
- C. `--aws-access-key=<aws access="" key=""> --aws-secret-key=<aws secret="" key=""></aws></aws></my-profile></my-profile>`
- **D. `--aws-profile=<my-profile>
`**

Answer: D

NEW QUESTION # 103

A Platform Engineer is deploying a new NKP cluster that has internet connectivity. Now, a Cloud Administrator and Security Administrator are discussing the security of communications between the NKP Kubernetes cluster and the container registry. The engineer proposes to have an on- prem private registry.

What is the most significant reason that the engineer should create a private registry instead of configuring a secure connection between the NKP cluster and Github (SaaS)?

- A. NKP requires specific registry versions.
- B. Private registry license is included with NKP.
- C. NKP cannot connect to public clouds.
- **D. Private registry provides security and privacy.**

Answer: D
