

Updated 2V0-15.25 CBT - High 2V0-15.25 Quality

1. During VMware Cloud Foundation (VCF) deployment, which component validates the prerequisites and generates a deployment parameter workbook?

- A. SDDC Manager
- B. Cloud Builder
- C. NSX Manager
- D. vSphere Lifecycle Manager

Answer: B

2. Which tool is primarily used to scale-out a VCF instance by adding new workload domains?

- A. vSphere Client
- B. SDDC Manager
- C. NSX-T Manager
- D. HCX

Answer: B

3. When upgrading from VCF 8.x to VCF 9.0, which of the following must be upgraded first?

- A. vCenter Server
- B. NSX Manager
- C. SDDC Manager
- D. ESXi Hosts

Answer: C

4. What is required before converting an existing vSphere environment into a VCF workload domain?

- A. vSAN enabled cluster
- B. Distributed vSwitch created
- C. Active Directory integrated
- D. Dedicated NSX Edge cluster

Answer: A

5. Which log bundle is collected to troubleshoot failed workload domain creation in VCF?

- A. NSX logs
- B. vSphere logs
- C. SDDC Manager logs
- D. HCX logs

Answer: C

6. Which type of workload domain is mandatory in every VCF deployment?

- A. VI Workload Domain
- B. Management Workload Domain
- C. Edge Workload Domain
- D. vSAN Workload Domain

Answer: B

7. Which component is automatically deployed during the creation of a new workload domain?

Everyone wants to have a good job and decent income. But if they don't have excellent abilities and good major knowledge they are hard to find a decent job. Passing the test 2V0-15.25 certification can make you realize your dream and find a satisfied job. Our study materials are a good tool that can help you pass the exam easily. You needn't spend too much time to learn it. Our 2V0-15.25 Exam Guide is of high quality and if you use our product the possibility for you to pass the exam is very high.

As is known to us, there are three different versions about our VMware Cloud Foundation 9.0 Support guide torrent, including the PDF version, the online version and the software version. The experts from our company designed the three different versions of 2V0-15.25 test torrent with different functions. According to the different function of the three versions, you have the chance to choose the most suitable version of our 2V0-15.25 study torrent. For instance, if you want to print the 2V0-15.25 study materials, you can download the PDF version which supports printing. By the PDF version, you can print the VMware Cloud Foundation 9.0 Support guide torrent which is useful for you. If you want to enjoy the real exam environment, the software version will help you solve your problem, because the software version of our 2V0-15.25 Test Torrent can simulate the real exam environment. In a word, the three different versions will meet your all needs; you can use the most suitable version of our 2V0-15.25 study torrent according to your needs.

High 2V0-15.25 Quality, Reliable 2V0-15.25 Test Experience

Now in this time so precious society, I suggest you to choose ValidTorrent which will provide you with a short-term effective training, and then you can spend a small amount of time and money to pass your first time attend VMware Certification 2V0-15.25

Exam

VMware Cloud Foundation 9.0 Support Sample Questions (Q31-Q36):

NEW QUESTION # 31

An administrator needs to confirm which account initiates tasks from VMware Cloud Foundation (VCF) Operations. As a test, a virtual machine (VM) is powered on/off through VCF Operations.

In the vCenter task pane, what account would be the initiator of the task?

- A. The service account between vCenter and SDDC Manager.
- B. The credentials of the logged in user.
- C. The service account between VCF Operations and vCenter.
- D. The administrator@vsphere.local account.

Answer: C

Explanation:

When VMware Cloud Foundation Operations performs actions on vCenter—such as powering on or off a VM—the tasks are initiated through an integration service account, not the identity of the user logged into the VCF Operations UI. VCF Operations connects to vCenter using a configured collector or integration credential, typically a service account defined during initial setup. VCF documentation clarifies that all automated or orchestrated tasks originating from VCF Operations use this trusted account to ensure consistent auditing, RBAC enforcement, and operational isolation from user identities. Therefore, in the vCenter task pane, the "Initiated By" field always reflects the VCF Operations # vCenter service account, even if the end-user triggered the action indirectly.

Option A is incorrect because the logged-in user does not directly interface with vCenter.

Option C refers to SDDC Manager's integration account, which is unrelated to VCF Operations workflows.

Option D (administrator@vsphere.local) appears only when vCenter's built-in admin performs the action.

NEW QUESTION # 32

An administrator is asked to create a second provider gateway (provider gateway 02) in VMware Cloud Foundation (VCF) Automation Region-A.

After launching the Create Provider Gateway workflow in the VCF Automation Provider Management Portal, no Tier-0 Gateway is available for assignment.

How would you resolve this issue?

- A. Log into the NSX Manager, create a new TO Gateway.
- B. Retry the Create Provider Gateway workflow.
- C. Log into the NSX Manager, create a new Tier-1 Gateway.
- D. Create a new Region.

Answer: A

Explanation:

In VMware Cloud Foundation 9.0, a Provider Gateway in VCF Automation is always backed by an existing Tier-0 or Tier-0 VRF gateway in NSX. When the administrator launches the Create Provider Gateway workflow and no Tier-0 gateways appear for assignment, this indicates that VCF Automation cannot discover any valid Tier-0 gateways in the associated region.

The VMware Cloud Foundation 9.0 documentation explicitly states that before adding a Provider Gateway, an administrator must first create an Active-Standby Tier-0 Gateway in NSX Manager. The Provider Gateway workflow only lists Tier-0 gateways that already exist and are properly configured in NSX. If none are present, the list will be empty.

From the documentation: "To add a provider gateway, first you must create an Active Standby tier-0 gateway in the NSX Manager associated with the region to back it." Provider gateways in VCF Automation are discovered from these preexisting Tier-0 gateways and cannot be created until they exist.

Creating a Tier-1 gateway (Option B) does not satisfy the requirement because Provider Gateways must map specifically to Tier-0, not Tier-1. Retrying the workflow (Option D) will not resolve the issue because the Tier-0 backing resource is missing. Creating a new region (Option A) is unnecessary unless required for other organizational reasons, and it still would not produce a Tier-0 gateway.

Therefore, the correct and verified solution is to log in to NSX Manager and create the required Tier-0 gateway, after which it will appear in the Provider Gateway creation workflow.

NEW QUESTION # 33

An Administrator has been tasked with creating a new VMware Cloud Foundation (VCF) Automation Region named Region-2. The following information has been provided:

- * The current environment has two workload domains named WLD1 and WLD2.
- * The workload domains share one NSX Local Manager deployment.
- * A VCF Automation Region named region-1 exists that uses the shared NSX Local Manager deployment.

When creating the second Region in VCF Automation, the administrator sees "No results" when attempting to select a NSX Local Manager for the Region. What should the Administrator do to resolve this issue?

- A. Deploy an additional vSphere cluster in WLD1.
- B. Add an additional NSX Edge Cluster In WLD1.
- **C. Deploy a third workload domain that includes a new, dedicated NSX Local Manager deployment.**
- D. Ensure that that the NSX Manager is deployed in HA mode.

Answer: C

Explanation:

In VMware Cloud Foundation (VCF) Automation, each Automation Region must be associated with a dedicated NSX Local Manager. A single NSX Local Manager instance cannot be reused across multiple Automation Regions.

In the provided scenario:

- * The existing environment has WLD1 and WLD2, both sharing one NSX Local Manager.
- * Region-1 in VCF Automation already consumes this shared NSX Local Manager.
- * When creating Region-2, the interface shows "No results" when selecting an NSX Local Manager.

This behavior matches documented VCF Automation constraints: an NSX Local Manager can only be mapped to a single Automation Region. Once it is consumed by one region, it is not available for any additional region.

To create a second region (Region-2), a new NSX Local Manager instance must exist in the environment.

The only supported method to obtain a new NSX Local Manager is to deploy a new workload domain, because NSX Local Manager is deployed as part of every VI Workload Domain.

Thus, the administrator must deploy a new (third) workload domain, which includes its own NSX Local Manager package, allowing Region-2 to be created successfully.

NEW QUESTION # 34

An administrator is adding a vSphere Supervisor using VMware NSX classic to an existing VMware Cloud Foundation (VCF) cluster using Distributed Connectivity. When attempting to enable the vSphere Supervisor for the domain the cluster shows up as incompatible with the reason:

No valid edge cluster for VDS 50 Ob 4d 9a cb 32 62 4d - 76 78 6b 92 cd 87 c4 5a Why is the cluster showing up as incompatible?

- **A. The WCPReady tag has not been assigned to the NSX Edge Cluster.**
- B. The NSX Edge transport nodes have been deployed as large.
- C. vSphere Supervisor requires Central Connectivity.
- D. AVI load balancing has not been enabled for the NSX Edge Cluster.

Answer: A

Explanation:

A Comprehensive and Detailed Explanation: When enabling vSphere Supervisor with NSX Classic (using the traditional NSX-T Data Center networking stack rather than the newer NSX VPC mode), the vSphere Workload Management wizard filters the list of available NSX Edge Clusters to ensure they are explicitly designated for use with Kubernetes workloads.

The "WCPReady" Tag Requirement: The primary mechanism vCenter uses to identify a valid, compatible Edge Cluster for Workload Management is a specific tag on the NSX Edge Cluster object. This tag must be WCPReady (case-sensitive).

Symptoms: If this tag is missing-which often happens if the Edge Cluster was created manually in NSX Manager rather than through the SDDC Manager automation-the validation process will fail to find any usable clusters. This results in the specific error message: "No valid edge cluster for VDS [UUID]", or simply an empty list of compatible clusters in the wizard.

Resolution: The administrator must log in to the NSX Manager, navigate to System > Fabric > Nodes > Edge Clusters, select the target cluster, and manually add the tag WCPReady (often with the scope "Created for", though the tag itself is the critical filter).

Why other options are incorrect:

B: Large Edge nodes are actually a requirement for vSphere Supervisor (Small/Medium are typically unsupported for this role), so deploying them as Large would make the cluster compatible, not incompatible.

C: vSphere Supervisor fully supports Distributed Connectivity (connecting directly to the VDS), so Central Connectivity is not a

hard requirement causing this specific error.

D: While AVI (NSX Advanced Load Balancer) is a supported load balancer, the "No valid edge cluster" error occurs during the Edge Cluster discovery phase, preceding the load balancer configuration.

NEW QUESTION # 35

A user wishes to publish a VMware Cloud Foundation (VCF) Operations Orchestrator workflow to their VCF Automation project catalog, but is blocked from publishing any workflows.

The following information has been provided:

* In the VCF Automation Organization portal, the user cannot see the Workflows option under Content Hub.

* The organization is not a Provider Consumption Organization.

Which are the two likely causes of this issue? (Choose two.)

- A. The user is logged in the Project Advanced User rights
- **B. An embedded VCF Operations Orchestrator is not integrated with their Organization.**
- C. The user is logged in with Project Administrator rights.
- D. The user is logged in with Project User rights.
- **E. An external VCF Operations Orchestrator is not integrated with their Organization.**

Answer: B,E

Explanation:

In VMware Cloud Foundation 9.0, publishing a VCF Operations Orchestrator workflow to a VCF Automation project catalog requires that the Organization has a valid integration with VCF Operations Orchestrator. The question states that the user cannot see the Workflows option under Content Hub, and the organization is not a Provider Consumption Organization (PCO). According to the VCF 9.0 documentation, only organizations with VCF Operations Orchestrator integration are allowed to publish workflows into the catalog. Both embedded and external orchestrator integrations must be configured depending on the environment. If no orchestrator (embedded or external) is integrated with the organization, workflows cannot be listed or published. This aligns with the documented VCF Automation and VCF Operations Orchestrator design requirements, which specify that workflow publishing is only available when the orchestrator instance is properly registered.

Additionally, user role permission issues could prevent workflow visibility, but the key blockers described in the scenario are the missing workflow section and the organization type. Because the organization is not a PCO, advanced provider features—including workflow publishing—are disabled unless a proper orchestrator integration exists. Therefore, the two most likely causes are:

* A: An external VCF Operations Orchestrator is not integrated with their Organization.

* D: An embedded VCF Operations Orchestrator is not integrated with their Organization.

These two conditions directly match the documented behavior in VMware Cloud Foundation 9.0.

NEW QUESTION # 36

.....

Do you want to find a high efficiency way to prepare for 2V0-15.25 exam test? As we all know, high efficiency will produce unbelievable benefits. With our VMware 2V0-15.25 study pdf, you can make full use of your spare time. If you are tired of screen reading, you can print 2V0-15.25 Pdf Dumps into papers. You take your spare time to prepare and study. You will get your 2V0-15.25 exam certification with less time investment. Come on, everyone, Choose 2V0-15.25 test dumps, you will succeed.

High 2V0-15.25 Quality: <https://www.validtorrent.com/2V0-15.25-valid-exam-torrent.html>

VMware Updated 2V0-15.25 CBT They are quite convenient, Now, please take 2V0-15.25 practice torrent as your study material, and pass with it successfully, With the help of 2V0-15.25 guide questions, you can conduct targeted review on the topics which to be tested before the exam, and then you no longer have to worry about the problems that you may encounter a question that you are not familiar with during the exam, It's important for the safety of the website while buying the 2V0-15.25 exam bootcamp online.

You can configure this to match the requirements of the connected 2V0-15.25 device, No company that I know of, including Nokia, currently uses this title, They are quite convenient.

Now, please take 2V0-15.25 practice torrent as your study material, and pass with it successfully, With the help of 2V0-15.25 guide questions, you can conduct targeted review on the topics which to be tested before the exam, and then you no longer have to worry about the problems that you may encounter a question that you are not familiar with during the exam.

VMware - 2V0-15.25 - Marvelous Updated VMware Cloud Foundation 9.0 Support CBT

It's important for the safety of the website while buying the 2V0-15.25 exam bootcamp online, If you are looking for a one-stop guide for the preparation of Professional Level Exams 2V0-15.25 exam, this book is the answer.
