100% Pass 2026 Realistic Positive Professional-Cloud-DevOps-Engineer Feedback - Valid Dumps Google Cloud Certified - Professional Cloud DevOps

Engineer Exam Book

As long as you buy our Professional-Cloud-DevOps-Engineer practice materials and take it seriously consideration, we can promise that you will pass your Professional-Cloud-DevOps-Engineer exam and get your certification in a short time. We can claim that if you study with our Professional-Cloud-DevOps-Engineer Guide quiz for 20 to 30 hours, you will be confident to pass the exam for sure. So choose our exam braindumps to help you review, you will benefit a lot from our Professional-Cloud-DevOps-Engineer study guide.

Google Cloud Certified - Professional Cloud DevOps Engineer Exam Sample Questions (Q199-Q204):

NEW QUESTION # 199

You support a service with a well-defined Service Level Objective (SLO). Over the previous 6 months, your service has consistently met its SLO and customer satisfaction has been consistently high. Most of your service's operations tasks are automated and few repetitive tasks occur frequently. You want to optimize the balance between reliability and deployment velocity while following site reliability engineering best practices. What should you do? (Choose two.)

- A. Increase the service's deployment velocity and/or risk.
- **B. Get the product team to prioritize reliability work over new features.**
- C. Make the service's SLO more strict.
- D. Shift engineering time to other services that need more reliability.
- **E. Change the implementation of your Service Level Indicators (SLIs) to increase coverage.**

Answer: B,E

NEW QUESTION # 200

You work for a global organization and run a service with an availability target of 99% with limited engineering resources. For the current calendar month you noticed that the service has 99.5% availability.

You must ensure that your service meets the defined availability goals and can react to business changes including the upcoming launch of new features. You also need to reduce technical debt while minimizing operational costs. You want to follow Google-recommended practices. What should you do?

- A. Add N+1 redundancy to your service by adding additional compute resources to the service
- **B. Identify, measure and eliminate toil by automating repetitive tasks**
- C. Allocate available engineers to the feature backlog while you ensure that the service remains within the availability target
- D. Define an error budget for your service level availability and minimize the remaining error budget

Answer: B

NEW QUESTION # 201

You support the backend of a mobile phone game that runs on a Google Kubernetes Engine (GKE) cluster.

The application is serving HTTP requests from users. You need to implement a solution that will reduce the network cost. What should you do?

- A. Configure your Kubernetes cluster as a Private Cluster.
- B. Configure the VPC as a Shared VPC Host project.
- **C. Configure your network services on the Standard Tier.**
- D. Configure a Google Cloud HTTP Load Balancer as Ingress.

Answer: C

Explanation:

The Standard Tier network service offers lower network costs than the Premium Tier. This is the correct option to reduce the network cost for the application.

NEW QUESTION # 202

You are designing a deployment technique for your applications on Google Cloud. As part of your deployment planning, you want to use live traffic to gather performance metrics for new versions of your applications. You need to test against the full production load before your applications are launched. What should you do?

- A. Use canary testing with continuous deployment.
- B. Use A/B testing with blue/green deployment.
- C. Use canary testing with rolling updates deployment.
- **D. Use shadow testing with continuous deployment.**

Answer: D

NEW QUESTION # 203

You encountered a major service outage that affected all users of the service for multiple hours. After several hours of incident management, the service returned to normal, and user access was restored. You need to provide an incident summary to relevant stakeholders following the Site Reliability Engineering recommended practices. What should you do first?

- **A. Develop a post-mortem to be distributed to stakeholders.**
- B. Call individual stakeholders to explain what happened.
- C. Send the Incident State Document to all the stakeholders.
- D. Require the engineer responsible to write an apology email to all stakeholders.

Answer: A

NEW QUESTION # 204

.....

Three versions of Professional-Cloud-DevOps-Engineer test materials are available. You can choose the one you prefer to have a practice. Professional-Cloud-DevOps-Engineer PDF version is printable, and if you prefer to practice on paper, this version will be your best choice. You can print them into hard one, and take them with you. Professional-Cloud-DevOps-Engineer Soft test engine can stimulate the real exam environment, and this version will help you to relieve your nerves. Professional-Cloud-DevOps-Engineer Online test engine supports all web browsers, with this version you can have a brief review of what you have finished last time.
