# The Open Group TOGAF Business Architecture Foundation Exam Sample Questions (Q42-Q47):

**NEW QUESTION # 42**
Which of the following best describes the purpose of a Compliance Assessment?

- A. To ensure that architecture information is communicated to the right stakeholders at the right time.
- B. To govern the architecture throughout its implementation process.
- C. To show progression of change from the Baseline Architecture to the Target Architecture.
- D. To provide a high-level view of the end architecture product.

**Answer: B**

**NEW QUESTION # 43**
In what TOGAF ADM phase is the information map linked to other business blueprints?

- A. Preliminary Phase
- B. Phase E
- C. Phase A
- D. Phase B

**Answer: B**

Explanation:
Phase E Explanation of Correct answer: In Phase E (Opportunities and Solutions) of the TOGAF Explanation:ADM, the information map is linked to other business blueprints such as the Business Capability Map, the Value Stream Map, and the Business Process Model Phase E Explanation of Correct answer: In Phase E (Opportunities and Solutions) of the TOGAF Explanation:ADM, the information map is linked to other business blueprints such as the Business Capability Map, the Value Stream Map, and the Business Process Model2. This helps to identify and prioritize opportunities for business improvement and transformation2.
In the TOGAF Architecture Development Method (ADM), the information map is linked to other business blueprints during Phase B, Business Architecture. This phase involves the development of a business architecture to support an agreed Architecture Vision.

It is during this phase that the information architecture is developed in detail, which involves mapping the information to the business, hence linking the information map to other business blueprints.

## NEW QUESTION # 44

Complete the sentence. The TOGAF standard covers the development of four architecture domains. Business.
Data. Technology and_____.

- A. Segment
- B. Transition
- C. Capability
- D. Application

**Answer: D**

Explanation:
The TOGAF standard covers the development of four architecture domains: Business, Data, Technology, and Application. The Application Architecture domain defines the applications required to process the data and support the business functions.
The TOGAF standard describes the development of four architecture domains, which are considered its pillars. These are Business, Data, Technology, and Application. The Application Architecture domain provides a blueprint for the individual application systems to be deployed, their interactions, and their relationships to the core business processes of the organization.

## NEW QUESTION # 45

Which of the following describes the concept of an Enterprise Architecture Capability?

- A. The ability to follow general rules and guidelines that relate to Enterprise Architecture work and that enable decision-making.
- B. The ability to distinguish between different types of architectural assets that exist at different levels of abstraction in the enterprise.
- C. The ability to develop, use and sustain the architecture of a particular enterprise using architecture to govern change.
- D. The ability to strike a balance between positive and negative outcomes resulting from the realization of opportunities.

**Answer: C**

## NEW QUESTION # 46

Which of the following is a difference between an organization map and an organization chart?

- A. An organization map describes the complex interactions and relationship within an organization.
- B. An organization map reduces the time, cost, and risk of business operations.
- C. An organization map highlights where in the organization that stakeholder concerns are not being addressed by a business architecture.
- D. An organization map improves the ability to deliver information within the organization by highlighting the consumers.

**Answer: A**

Explanation:
An organization map provides a detailed representation of the complex interactions and relationships within an organization, going beyond the hierarchical structure shown in an organization chart. It includes the connections and dependencies between different business units, teams, and roles, offering a more comprehensive view of how the organization operates and collaborates to achieve its objectives.
