As we all know, the examination fees about D-ISM-FN-01 exam test is too expensive, so many IT candidates want to get the most valid and useful D-ISM-FN-01 study material and expect to pass the actual test at first attempt. BraindumpsIT provide you with the latest D-ISM-FN-01 exam prep study material which can ensure you 100% pass. The quality & service of D-ISM-FN-01 exam dumps will give you a good shopping experience. The quality and quantities are controlled by strict standards. BraindumpsIT has IT experts handling the latest IT information so as to adjust the outline for the exam dumps at the first time, thus to ensure the EMC D-ISM-FN-01 training exam cram shown front of you is the latest and most relevant.

Our D-ISM-FN-01 exam materials are compiled by experts and approved by the professionals who are experienced. They are revised and updated according to the pass exam papers and the popular trend in the industry. The language of our D-ISM-FN-01 exam torrent is simple to be understood and our D-ISM-FN-01 test questions are suitable for any learners. Only 20-30 hours are needed for you to learn and prepare our D-ISM-FN-01 Test Questions for the exam and you will save your time and energy. No matter you are the students or the in-service staff you are busy in your school learning, your jobs or other important things and can't spare much time to learn.

New D-ISM-FN-01 Dumps Ebook - D-ISM-FN-01 Top Questions

The Dell Information Storage and Management Foundations v2 Exam (D-ISM-FN-01) product can be easily accessed just after purchasing it from BraindumpsIT. You can receive free EMC Dumps updates for up to 1 year after buying material. The 24/7 support system is also available for you, which helps you every time you get stuck somewhere. Many students have studied from the BraindumpsIT Dell Information Storage and Management Foundations v2 Exam (D-ISM-FN-01) practice material and rated it positively because they have passed the D-ISM-FN-01 certification exam on the first try.

EMC Dell Information Storage and Management Foundations v2 Exam Sample Questions (Q43-Q48):

NEW QUESTION # 43

Question:

What describes an incident in a storage infrastructure?

- A. Any event that prevents corrections of known errors
- B. Any action that may impact the functionality of the system
- C. Unknown root cause of one or more disruptions to service
- D. Support request to help access an IT resource

Answer: C

Explanation:

An incident is an unplanned disruption of a service or a reduction in its quality, often with an unknown root cause.

Incidents require immediate action to restore service.

Example: SAN switch port down, unexpected storage latency.

* Support requests are typically service requests, not incidents.

* Impact actions are more about changes, not incidents.

* Events preventing corrections might be problems, not incidents.

NEW QUESTION # 44

Question:

What is the first step in a machine learning process?

- A. Collecting the datasets
- B. Selecting the type of learning
- C. Analyzing the data
- D. Training the model

Answer: A

Explanation:

Collecting the datasets is the first step in any machine learning (ML) process. Without data, the ML system cannot function. Steps include:

1##Collecting datasets:Gathering data relevant to the problem to train and validate the ML model.

2##Analyzing data:Cleaning and exploring data for patterns.

3##Selecting learning type:Deciding between supervised, unsupervised, or reinforcement learning.

4##Training the model:Using the data to build predictive models.

NEW QUESTION # 45

Question:

Which layer of the OSI model does a router primarily operate at?

- A. Layer 2
- B. Layer 4
- C. Layer 3
- D. Layer 7

Answer: C

Explanation:

Routers are networking devices that determine the optimal path for data packets to travel across networks.

They primarily operate at Layer 3 of the OSI model, known as the Network Layer. This layer is responsible for logical addressing and routing, enabling data to move between different networks.

* Layer 2 (Data Link Layer):Handles physical addressing and is the primary domain of switches.

* Layer 3 (Network Layer):Manages logical addressing (IP addresses) and routing; the main operational layer for routers.

* Layer 4 (Transport Layer):Ensures reliable data transfer but is not the primary layer for routers.

* Layer 7 (Application Layer):Interfaces with end-user applications; not relevant to routing functions.

NEW QUESTION # 46

Question:

A customer uses FCIP to connect local and remote FC SANs. The remote SAN is replicated to and used to store daily backup data. Latency over the IP WAN increases to unacceptable levels during peak replication periods. No other data transfer services using the WAN experience the same latency problem.

What is the likely cause of the data replication performance issue?

- A. FCIP gateway FC ports set to TE_Port mode
- B. IP packet segmentation
- C. FCIP gateway FC ports set to EX_Port mode
- D. Ethernet frame segmentation

Answer: B

Explanation:

IP packet segmentation can cause replication performance issues over the WAN.

Since FCIP tunnels FC frames over IP networks, if the IP packet size exceeds the MTU, packets are fragmented and reassembled, increasing latency.

* TE_Port mode is used for trunking, not related to packet fragmentation.

* EX_Port mode is used for inter-switch connectivity (FCR).

* Ethernet frame segmentation is not relevant in FCIP tunneling.

Reference:Dell Information Storage and Management Foundations 2023 Study Guide, Section: FCIP and IP WAN Connectivity.

NEW QUESTION # 47

Question:

An IT team needs to connect a compute system to a switch in their SAN. What is the port type?

- A. F_port
- B. E_Port
- C. N_port
- D. G_port

Answer: A

Explanation:

An F_port (Fabric port) is used on a Fibre Channel switch to connect N_ports (Node ports) on end devices like servers and storage arrays.

* N_port: On the compute system (HBA).

* F_port: On the switch, accepting N_port connections.

* E_port: For switch-to-switch ISL (Inter-Switch Link) connections.

* G_port: A generic port that can operate as either an F_port or an E_port (not the direct answer in this scenario).
