## Questions (Q95-Q100):

### NEW QUESTION # 95

Routing is a part of customer communication that connects the customer with an appropriate automated resource or agent.

- A. True
- B. False

**Answer: A**

Explanation:

Routing is a part of customer communication that connects the customer with an appropriate automated resource or agent. Routing is a process that determines how to handle incoming interactions based on various criteria, such as customer profile, agent skills, queue availability, etc. Routing can direct interactions to different resources, such as IVR menus, chatbots, voicebots, agents, queues, etc. Routing can also optimize the customer experience and the contact center performance by matching each interaction with the best available resource. ### NEW QUESTION # 96

Why are Divisions important in an organization?

- A. Divisions are used to divide interactions equally between 2 or more queues.
- B. Divisions define which users can be assigned to queues.
- C. Divisions allow the organization to control which roles can be assigned to users.
- D. Divisions allow grouping and segregation of objects while keeping them inside the same organization.

**Answer: D**

Explanation:

Divisions are important in an organization because they allow grouping and segregation of objects while keeping them inside the same organization. A division is a logical container that holds various objects in Genesys Cloud CX, such as users, queues, flows, etc. Divisions enable administrators to control access and visibility of these objects based on roles and permissions. For example, administrators can use divisions to separate different business units or teams within an organization and assign different roles and permissions to each division. ### NEW QUESTION # 97

What do a Service Level of 80 and a Service Level Target of 20 for Voice interactions mean?

- A. 80% of calls must be answered within 20 seconds.
- B. 80 calls must be answered every 20 seconds.
- C. 20 chats and calls must be answered in 80 seconds.
- D. 80% of agents must answer calls within 20 seconds.

**Answer: A**

Explanation:

A service level of 80 and a service level target of 20 for voice interactions mean that 80% of calls must be answered within 20 seconds. Service level is a metric that measures how well a contact center meets its customer service goals. Service level is calculated by dividing the number of interactions answered within a specified time threshold (service level target) by the total number of interactions offered in a given period. For example, if a contact center receives 100 calls in an hour and answers 80 calls within 20 seconds, then its service level is  $80/100 = 0.8$  or 80%.
