100% 유효한 AZ-305최고품질 인증시험공부자료 최신덤프

IT업계에 종사하는 분들은 치열한 경쟁을 많이 느낄것입니다. 치열한 경쟁속에서 자신의 위치를 보장하는 길은 더 많이 배우고 더 많이 노력하는것 뿐입니다.국제적으로 인정받은 IT인증자격증을 취득하는것이 제일 중요한 부분이 아닌가 싶기도 합니다. 다른 분이 없는 자격증을 내가 소유하고 있다는 생각만 해도 뭔가 안전감이 느껴지지 않나요? 더는 시간낭비하지 말고 Itcertkr의Microsoft인증 AZ-305덤프로Microsoft인증 AZ-305시험에 도전해보세요.

Microsoft AZ-305(Designing Microsoft Azure Infrastructure Solutions) 시험은 Microsoft Azure에서 실행되는 솔루션을 설계하고 구현하는 데 필요한 기술과 지식을 검증하기 위해 설계되었습니다. 이 시험은 Azure에서 실행되는 솔루션을 설계하고 구현하는 경험이 있는 후보자 및 Azure 서비스, Azure 워크로드, 보안 및 거버넌스에 능숙한 후보자를 대상으로 합니다. 이 시험은 Azure 컴퓨팅, 스토리지 및 네트워킹 솔루션을 설계하고 구현하는 부분과 Azure 보안 및 거버넌스 솔루션을 설계하고 구현하는 부분으로 구성됩니다.

마이크로소프트 AZ-305 시험은 Azure 인프라 솔루션을 디자인하고자 하는 전문가들을 위한 종합 자격증 시험입니다. 이 시험은 Azure 솔루션을 디자인, 구현 및 모니터링하는 데 필요한 지식과 기술을 테스트합니다.

최신 Microsoft Azure Solutions Architect Expert AZ-305 무료샘플문제 (Q277-Q282):

질문 # 277

Your organization has developed and deployed several Azure App Service Web and API applications. The applications use Azure Key Vault to store several authentication, storage account, and data encryption keys.

Several departments have the following requests to support the applications:

Department	Request
Security	- Review membership of administrative roles and require to provide a justification for continued membership - Get alerts about changes in administrator assignments. - See a history of administrator activation, including which changes administrators made to Azure resources.
Development	Enable the applications to access Azure Key Vault and retrieve keys for use in code.
Quality Assurance	Receive temporary administrator access to create and configure additional Web and API applications in the test environment.

You need to recommend the appropriate Azure service for each department request.

What should you recommend? To answer, configure the appropriate options in the dialog box in the answer area.

NOTE:Each correct selection is worth one point.

Department	Azure Service
Security	▼ Azure AD Privileged Identity Management Azure AD Managed Service Identity Azure AD Connect Azure AD Identity Protection
Development	▼ Azure AD Privileged Identity Management Azure AD Managed Service Identity Azure AD Connect Azure AD Identity Protection
Quality Assurance	▼ Azure AD Privileged Identity Management Azure AD Managed Service Identity Azure AD Connect Azure AD Identity Protection

정답:

설명:

Department	Azure Service
Security	▼ Azure AD Privileged Identity Management Azure AD Managed Service Identity Azure AD Connect Azure AD Identity Protection
Development	▼ Azure AD Privileged Identity Management Azure AD Managed Service Identity Azure AD Connect Azure AD Identity Protection
Quality Assurance	▼ Azure AD Privileged Identity Management Azure AD Managed Service Identity Azure AD Connect Azure AD Identity Protection

Explanation

Text Description automatically generated with medium confidence

Department	Azure Service
Security	▼ - Azure AD Privileged Identity Management - Azure AD Managed Service Identity - Azure AD Connect - Azure AD Identity Protection
Development	▼ - Azure AD Privileged Identity Management - Azure AD Managed Service Identity - Azure AD Connect - Azure AD Identity Protection
Quality Assurance	▼ - Azure AD Privileged Identity Management - Azure AD Managed Service Identity - Azure AD Connect - Azure AD Identity Protection

질문 # 278

You have an Azure subscription that contains resources in three Azure regions.

You need to implement Azure Key Vault to meet the following requirements:

- In the event of a regional outage, all keys must be readable.
- All the resources in the subscription must be able to access Key Vault.
- The number of Key Vault resources to be deployed and managed must be minimized.

How many instances of Key Vault should you implement?

- A. 0
- **B. 1**
- C. 2
- D. 3

정답: B

설명:

The contents of your key vault are replicated within the region and to a secondary region at least 150 miles away but within the same geography. This maintains high durability of your keys and secrets. See the Azure paired regions document for details on specific region pairs.

Example: Secrets that must be shared by your application in both Europe West and Europe North. Minimize these as much as you can. Put these in a key vault in either of the two regions.

Use the same URI from both regions. Microsoft will fail over the Key Vault service internally.

<https://docs.microsoft.com/en-us/azure/key-vault/general/disaster-recovery-guidance>

질문 # 279

You plan to migrate data to Azure.

The IT department at your company identifies the following requirements:

- The storage must support 1 PB of data.
 - The data must be stored in blob storage.
 - The storage must support three levels of subfolders.
 - The storage must support access control lists (ACLs).
- You need to meet the requirements.

What should you use?

- A. a premium storage account that is configured for files shares and supports large file shares
- B. a premium storage account that is configured for block blobs
- C. a premium storage account that is configured for page blobs
- **D. a general purpose v2 storage account that has hierarchical namespace enabled**

정답: D

설명:

Microsoft recommends that you use a GPv2 storage account for most scenarios. It supports up to 5 PB, and blob storage including Data Lake storage.

Note: A key mechanism that allows Azure Data Lake Storage Gen2 to provide file system performance at object storage scale and prices is the addition of a hierarchical namespace. This allows the collection of objects/files within an account to be organized into a hierarchy of directories and nested subdirectories in the same way that the file system on your computer is organized. With a hierarchical namespace enabled, a storage account becomes capable of providing the scalability and cost-effectiveness of object storage, with file system semantics that are familiar to analytics engines and frameworks.

Reference:

<https://docs.microsoft.com/en-us/azure/storage/common/storage-account-overview>

<https://docs.microsoft.com/en-us/azure/storage/blobs/data-lake-storage-namespace>

질문 # 280

You have an Azure subscription named Sub1 that is linked to an Azure AD tenant named contoso.com.

You plan to implement two ASP.NET Core apps named App1 and App2 that will be deployed to 100 virtual machines in Sub1.

Users will sign in to App1 and App2 by using their contoso.com credentials.

App1 requires read permissions to access the calendar of the signed-in user. App2 requires write permissions to access the calendar of the signed-in user.

You need to recommend an authentication and authorization solution for the apps. The solution must meet the following requirements:

* Use the principle of least privilege.

* Minimize administrative effort

What should you include in the recommendation? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

정답:

설명:

You have the resources shown in the following table.

CDB1 hosts a container that stores continuously updated operational data..

You are designing a solution that will use AS! to analyze the operational data daily.

You need to recommend a solution to analyze the data without affecting the performance of the operational data store.

What should you include in the recommendation?

- 정답: D**
