Interactive SC-401 Questions, SC-401 Certification Book Torrent

If you prepare SC-401 real exam with our training materials, we guarantee your success in the first attempt. Our test engine enables you practice SC-401 exam questions in the mode of the formal test and enjoy the atmosphere of the actual test. Our SC-401 Practice Test is a way of exam simulation that will mark your mistakes and remind you when you practice dump next time.

Microsoft Administering Information Security in Microsoft 365 Sample Questions (Q163-Q168):

NEW QUESTION # 163

You have Microsoft 365 E5 tenant that has a domain name of 86s40q.ofimicrosoft.com. The tenant contains the users shown in the following table.

☐ You have a published sensitivity label.

The Access control settings for the sensitivity label are configured as shown in the exhibit (Click the Exhibit tab.)

☐ For each of the following statements, select Yes if the statement is true. Otherwise, select No.

Answer:

Explanation:

☐ Explanation:

☐

NEW QUESTION # 164

You have a Microsoft 365 E5 subscription that contains a trainable classifier named Trainable1. You plan to create the items shown in the following table.

Which items can use Trainable 1?

- A. Label1, Label2, Policy1, and DLP1
- **B. Label2, Policy1, and DLP1 only**
- C. Label2 only
- D. Label1 and Label2 only
- E. Label1 and Policy1 only

Answer: B

Explanation:

A trainable classifier in Microsoft Purview is used to automatically identify and classify unstructured data based on content patterns. The classifier can be used in:

1. Retention Labels (Label2) # Supported

Trainable classifiers can be linked to retention labels to automatically classify and apply retention policies to documents.

2. Retention Label Policies (Policy1) # Supported

Retention label policies define how and where retention labels are applied, including automatically using trainable classifiers.

3. Data Loss Prevention (DLP) Policies (DLP1) # Supported

Trainable classifiers can be used in DLP policies to detect and protect sensitive content automatically.

NEW QUESTION # 165

You have a Microsoft 365 tenant

You need to create a new sensitive info type for items that contain the following:

* An employee ID number that consists of the hire date of the employee followed by a three digit number

* The words "Employee", "ID", or "Identification" within 300 characters of the employee ID number What should you use for the primary and secondary elements? To answer, select the appropriate options in the answer area NOTE: Each correct selection is worth one point

Answer:

Explanation:

Explanation:

Step 1 - Requirement

We need a custom sensitive information type (SIT) that detects:

An employee ID number in a specific format # hire date + three digits.

This is a pattern-based requirement.

Specific keywords within 300 characters of that ID # "Employee", "ID", or "Identification".

This is a keyword proximity requirement.

Step 2 - Sensitive info type elements in Microsoft 365

When creating custom SITs, you define primary and secondary elements:

Primary element # The main pattern or data to detect (the most defining factor).

Secondary element # Supporting evidence that must be found near the primary element to increase confidence.

Available elements:

Regular expression # Used to define patterns such as date + digits (for employee ID).

Keyword list # Used for lists of words/phrases like "Employee", "ID", "Identification".

Functions # Used for built-in validators like credit card checksum, not relevant here.

Reference: Create a custom sensitive information type in Microsoft 365 Step 3 - Apply to scenario Employee ID pattern (hire date + 3 digits) # Needs a regular expression # This must be the Primary element.

Keywords ("Employee", "ID", "Identification") within 300 characters # A keyword list # This must be the Secondary element.

NEW QUESTION # 166

HOTSPOT

You have a Microsoft SharePoint Online site that contains the following files.

Users are assigned roles for the site as shown in the following table.

Which files can User1 and User2 open? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Let's break it down:

File1.docx # DLP action = None

No DLP restrictions, so it is fully accessible to both User1 (owner) and User2 (member).

File2.docx # DLP action = Matched by DLP

"Matched" means the DLP policy detected sensitive content but has not blocked access. Instead, it may generate an alert or policy tip.

Both User1 and User2 can still open this file.

File3.docx # DLP action = Blocked by DLP

"Blocked" means the DLP policy actively restricts access or sharing of the file.

User2 (member) cannot open this file.

However, User1 (site owner) can open it because site collection admins and owners always retain full control over content, even if a DLP rule applies.

Ref: Microsoft Purview DLP policy tips and enforcement

DLP policies do not prevent SharePoint/OneDrive site collection admins (owners) from accessing content.

Final Answer Table:

User1 (Site Owner): File1.docx, File2.docx, File3.docx

User2 (Site Member): File1.docx, File2.docx

NEW QUESTION # 167

You have a Microsoft 365 E5 subscription that contains a Microsoft SharePoint Online site named Site1.

Site1 contains the files shown in the following table.

In the Microsoft Purview portal, you create a content search named Content1 and configure the search conditions as shown in the following exhibit.

Which files will be returned by Content1?

- A. File3.docx only
- B. File2.docx only
- C. File1 .docx, File2.docx, and File3.docx
- D. File1.docx and File2.docx only
- E. File1 .docx and File3.docx only

Answer: A

NEW QUESTION # 168

.....

With the cumulative effort over the past years, our SC-401 study guide has made great progress with passing rate up to 98 to 100 percent among the market. A lot of professional experts concentrate to making our SC-401 preparation materials by compiling the content so they have gained reputation in the market for their proficiency and dedication. About some esoteric points, they illustrate with examples for you on the SC-401 Exam Braindumps.

Interactive SC-401 Questions: <https://www.exams4collection.com/SC-401-latest-braindumps.html>

Our experts have devised a collection of exams like SC-401 practice tests for the candidates who want to guarantee the highest percentage in the real exam, The best approach to finding Administering Information Security in Microsoft 365 (SC-401) exam dumps is to check the Exams4Collection that is offering the Administering Information Security in Microsoft 365 (SC-401) practice questions, We Exams4Collection Interactive SC-401 Questions only provide you the latest version of professional actual test questions.

Arguments and Local Variables, Midnight in SC-401 China's Fruit and Vegetable Gardens of Evil, Our experts have devised a

collection of exams like SC-401 Practice Tests for the candidates who want to guarantee the highest percentage in the real exam.

Quiz Microsoft - SC-401 - Latest Test Administering Information Security in Microsoft 365 Question

The best approach to finding Administering Information Security in Microsoft 365 (SC-401) exam dumps is to check the Exams4Collection that is offering the Administering Information Security in Microsoft 365 (SC-401) practice questions, We Exams4Collection only provide you the latest version of professional actual test questions.

If you get the certificate of an exam, you can have more competitive force in hunting for job, and can double your salary, So you will enjoy learning our SC-401 study quiz.
