

Professional New ZDTE Test Question & Leading Offer in Qualification Exams & Free Download ZDTE: Zscaler Digital Transformation Engineer

**TEXES PPR EXAM 2024 EC-12 (160) REAL EXAM
TEST BANK WITH 300+ QUESTIONS AND CORRECT
ANSWERS GRADED A/ TEXAS PEDAGOGY AND
PROFESSIONAL RESPONSIBILITIES EXAM LATEST
2024 (BRAND NEW!!)**

A teacher wants to require students to purchase a novel for an assigned reading. Which of the following is the most appropriate source for the teacher to check whether requiring the purchase is allowable? - ANSWER-Texas Education Code

As a result of the Supreme Court decision in Plyler v. Doe (1982), educators can:
a. Share information with outside agencies about the immigration status of their students.
b. Ask students questions regarding the immigration status of their family.
c. Require students to provide Social Security numbers.
d. None of the above - ANSWER-D, none of the above

Which of the following teacher actions will best promote parents as partners in their child's education? - ANSWER-Having the parents sign their child's progress report so they can monitor the child's learning

The Congressional act that mandates school districts to show that all students are achieving adequate yearly progress on tests is the: - ANSWER-No Child Left Behind Act

What is true about the Individuals with Disabilities Educational Improvement Act of 2004? - ANSWER-IEP annual goals align with the No Child Left Behind Act

Which Congressional act employs a broader functional definition of disability than the others listed below? - ANSWER-Section 504 of the Rehabilitation Act

Which Congressional act is designed to integrate individuals with disabilities into the social and economic mainstream of society? - ANSWER-Americans with Disabilities Act

A student qualifies for special education services, and the student needs an Individualized Education Program (IEP). Which THREE of the following

In this fast-changing world, the requirements for jobs and talents are higher, and if people want to find a job with high salary they must boost varied skills which not only include the good health but also the working abilities. The ZDTE exam torrent is compiled by the experienced professionals and of great value. You can master them fast and easily. We provide varied versions for you to choose and you can find the most suitable version of ZDTE Exam Materials. So it is convenient for the learners to master the Digital Transformation Engineer questions torrent and pass the exam in a short time.

As a market leader, our company is able to attract quality staffs on our ZDTE exam materials , it actively seeks out those who are energetic, persistent, and professional to various ZDTE certificate and good communicator. And we believe that the key of our company's success is its people, skills, and experience on ZDTE Study Guide. Over 50% of the account executives and directors have been with the Group for more than ten years. We have strong strenght to lead you to success!

>> New ZDTE Test Question <<

Zscaler ZDTE Exam | New ZDTE Test Question - ZDTE: Zscaler Digital Transformation Engineer

Unlike those impotent practice materials, our ZDTE study questions have salient advantages that you cannot ignore. They are

abundant and effective enough to supply your needs of the ZDTE exam. Since we have the same ultimate goals, which is successfully pass the ZDTE Exam. So during your formative process of preparation, we are willing be your side all the time. As long as you have questions on the ZDTE learning braindumps, just contact us!

Zscaler Digital Transformation Engineer Sample Questions (Q48-Q53):

NEW QUESTION # 48

An IT administrator is reviewing the recently configured ZDX module in their environment and checks the performance data on the dashboard. The administrator notices that no software inventory has populated. What could be a probable reason?

- A. ZDX license doesn't have inventory collection entitlement
- B. Zscaler Client Connector needs to be whitelisted on the EDR tool
- C. ZDX client version being used is 4.3
- D. ZDX client is not configured to collect inventory data

Answer: D

Explanation:

Zscaler Digital Experience (ZDX) relies on Zscaler Client Connector to collect device and application telemetry from endpoints. Performance metrics (such as device, network, and application scores) are enabled as part of the core ZDX deployment, which explains why the administrator can already see performance data on the dashboard. However, software inventory is an additional inventory feature that must be explicitly enabled in the ZDX administration settings.

ZDX documentation describes an "Inventory Settings" page where administrators must turn on a setting such as "Collect Software Inventory Data." When this option is enabled and the minimum supported versions of Client Connector and the ZDX module are present, Client Connector begins collecting installed software details and sending this inventory to the ZDX cloud for visualization. If the collection toggle is left disabled, ZDX will continue to show performance metrics but no entries appear under Software Inventory or related views, even though licensing and versions are otherwise correct. The other options listed either relate to licensing, generic EDR conflicts, or a specific client version and do not match the documented dependency on enabling software-inventory collection. Therefore, the most accurate reason is that the ZDX client (via policy) is not configured to collect inventory data.

NEW QUESTION # 49

In the Zscaler Client Connector (ZCC) Admin Portal, which posture element is supported on Windows but not on macOS?

- A. Full Disk Encryption
- B. CrowdStrike ZTA Sensor Setting Score
- C. Client Certificate
- D. Domain Joined

Answer: B

Explanation:

Zscaler's Device Posture framework in Client Connector supports a broad set of posture checks on both Windows and macOS, such as Certificate Trust, Client Certificate, Firewall status, Full Disk Encryption, Domain Joined, and multiple EDR detections. These are listed in Zscaler technical training material as common capabilities for "Windows und macOS." However, Zscaler's advanced integration with CrowdStrike introduces additional posture signals based on Zero Trust Assessment (ZTA). In the same material, CrowdStrike ZTA Score is explicitly annotated with a Windows-specific minimum version ("CrowdStrike ZTA Score (Win v.3.4.0+)"), highlighting that this ZTA- based posture is implemented for Windows only in the current releases, while the shared list for macOS does not include its own ZTA-specific version.

The newer ZTE/EDU-202 engineer materials build on this by describing separate ZTA Device OS and Sensor scores, and the exam maps this Windows-only ZTA enforcement to the CrowdStrike ZTA Sensor Setting Score option. In contrast, Client Certificate, Full Disk Encryption, and Domain Joined are documented as cross-platform posture types, not restricted to Windows.

NEW QUESTION # 50

What are the valid options as criteria to create an alert rule in ZDX?

- A. DNS Time and Network Response Time
- B. Page Fetch Time and Packet Loss Rate
- C. Server Response Time and Packet Loss Rate

- **D. DNS Time and Server Response Time**

Answer: D

Explanation:

Zscaler Digital Experience (ZDX) uses web probes to measure application performance from the user's perspective. Official ZDX reference material and EDU/ZDTE study guides describe the four key web-probe metrics as Page Fetch Time (PFT), DNS Time, Server Response Time (Time to First Byte), and Availability. These same metrics are explicitly called out in training and exam prep as the values that can be used when defining application-level alert rules (for example, "DNS Time > X ms" or "Server Response Time > Y ms").

ZDX documentation also explains that each alert rule type (Application, Device, Network, or Call Quality) has its own metrics and criteria, and that application alerts are driven by web-probe metrics like DNS Time and Server Response Time, while network alerts use CloudPath metrics such as latency and packet loss. Because both DNS Time and Server Response Time are application-probe metrics, they can legitimately be used together as criteria in an application-type alert rule.

By contrast, combinations that mix web-probe metrics with network-only metrics (like Packet Loss Rate) or vaguely defined "Network Response Time" do not reflect how ZDX structures its alert criteria per type.

Therefore, among the listed options, the pair that correctly represents valid ZDX alert criteria for application monitoring is DNS Time and Server Response Time.

NEW QUESTION # 51

What is the primary benefit of using a subcloud in Zscaler?

- A. To improve the accuracy of geolocation data
- B. To eliminate the need for ZIA Public Service Edges
- C. To increase the number of available Public Service Edges
- **D. To guarantee that web traffic is forwarded to preferred ZIA Public Service Edges**

Answer: D

Explanation:

A subcloud in Zscaler is defined as a subset of ZIA Public Service Edges (data centers) that you group together and associate with specific locations or traffic. Conceptually, it is a logical "pool" of preferred Public Service Edges. When a user or site is mapped to a given subcloud, their traffic is steered only to that selected subset of Service Edges instead of any available data center in the wider cloud.

The main benefit of this design is control and predictability: you can guarantee that web traffic is forwarded to your preferred ZIA Public Service Edges, which is critical when you must keep egress IPs stable for SaaS allow-lists, regulatory requirements, or local data-residency mandates. Subclouds also help with operational resilience, because you can temporarily exclude problematic data centers from a subcloud without changing overall forwarding methods, ensuring continuity while still using your defined group of Service Edges. They do not increase the number of Service Edges, replace ZIA Public Service Edges, or directly affect IP geolocation precision. Therefore, option C correctly captures the primary benefit expected in the ZDTE/EDU-202 context.

NEW QUESTION # 52

How many apps and risk attributes can be monitored using Zscaler's Shadow IT and Data Discovery feature?

- **A. 100K apps and 200 risk attributes**
- B. 50K apps and 75 risk attributes
- C. 30K apps and 80 risk attributes
- D. 10K apps and 5 risk attributes

Answer: A

Explanation:

Zscaler's Shadow IT and Data Discovery capabilities are delivered primarily through its multimode CASB and data protection services. Shadow IT Discovery automatically identifies unsanctioned cloud applications in use and evaluates them across a large set of risk attributes (for example, security controls, compliance posture, data handling, and business continuity).

Updated Zscaler training and exam content for the Digital Transformation Engineer track describes a significantly expanded cloud app catalog, allowing visibility into up to 100,000 applications and evaluation across approximately 200 risk attributes. This scale is necessary to cover the rapidly growing SaaS ecosystem and to give security teams the granularity needed to distinguish between

low-risk and high-risk services.

Earlier public materials referenced smaller catalogs (for example, 8,500 apps with 25 attributes), but the current exam-aligned figures reflect the evolution of Zscaler's data protection and Shadow IT intelligence.

Options A, B, and C therefore underrepresent the scope of Zscaler's catalog and risk model. In the context of the ZDTE curriculum, the correct pairing is 100K apps and 200 risk attributes, which best matches how Zscaler positions its Shadow IT and Data Discovery capabilities for broad visibility and fine-grained risk analysis.

NEW QUESTION # 53

.....

The Zscaler Digital Transformation Engineer (ZDTE) actual questions we sell also come with a free demo. Spend no time, otherwise, you will pass on these fantastic opportunities. Start preparing for the Zscaler Digital Transformation Engineer (ZDTE) exam by purchasing the most recent Zscaler ZDTE exam dumps. You must improve your skills and knowledge to stay current and competitive. You merely need to obtain the ZDTE Certification Exam badge in order to achieve this. You must pass the Zscaler Digital Transformation Engineer ZDTE exam to accomplish this, which can only be done with thorough exam preparation. Download the Zscaler Digital Transformation Engineer (ZDTE) exam questions right away for immediate and thorough exam preparation.
