Microsoft AI-900 Exam Consultant, New AI-900 Test Notes

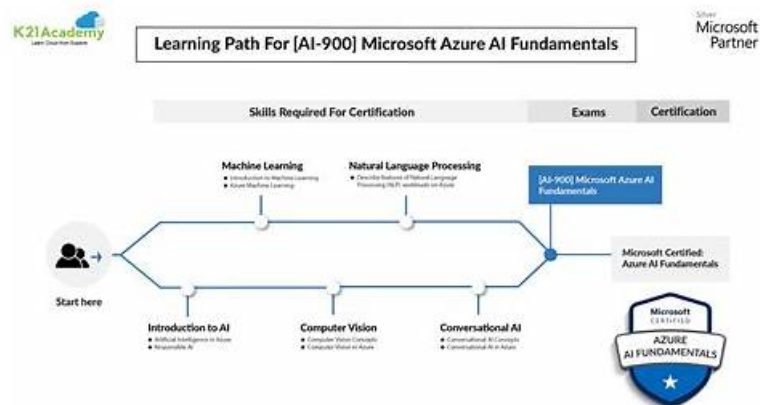

DOWNLOAD the newest TorrentExam AI-900 PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=1wSWU294wfAzwhU30H3igWgGrAsGOGaFS

If you have never bought our AI-900 exam materials on the website before, we understand you may encounter many problems such as payment or downloading AI-900 practice quiz and so on, contact with us, we will be there. Our employees are diligent to deal with your need and willing to do their part on the AI-900 Study Materials. And they are trained specially and professionlly to know every detail about our AI-900 learning prep.

TorrentExam is a website you can completely believe in. In order to find more effective training materials, TorrentExam Microsoft experts have been committed to the research of Microsoft certification AI-900 exam, in consequence, develop many more exam materials. If you use TorrentExam dumps once, you will also want to use it again. TorrentExam can not only provide you with the best questions and answers, but also provide you with the most quality services. If you have any questions on our exam dumps, please to ask. Because we TorrentExam not only guarantee all candidates can pass the AI-900 Exam easily, also take the high quality, the superior service as an objective.

>> Microsoft AI-900 Exam Consultant <<

Pass Guaranteed AI-900 - High Pass-Rate Microsoft Azure AI Fundamentals Exam Consultant

Our service and Microsoft Azure AI Fundamentals exam questions are offered to exam candidates who are in demand of our products which are marvelous with the passing rate up to 98 percent and so on. So this result invariably makes our AI-900 torrent prep the best in the market. We can assure you our AI-900 test guide will relax the nerves of the exam without charging substantial fees. So we are always very helpful in arranging our Microsoft Azure AI Fundamentals exam questions with both high quality and reasonable price. And you can choose them without hesitation. What is more, we give discounts upon occasions and send you the new version of our AI-900 Test Guide according to the new requirements of the exam for one year from the time you place your order. One of our many privileges offering for exam candidates is the update. So we have received tremendous compliments which in return encourage us to do better. So please keep faithful to our AI-900 torrent prep and you will prevail in the exam eventually.

Microsoft Azure AI Fundamentals Sample Questions (Q195-Q200):

NEW QUESTION # 195
To complete the sentence, select the appropriate option in the answer area.

Answer:

Explanation:
Explanation:
According to Microsoft's Responsible AI principles, one of the six core principles is fairness, which ensures that AI systems treat all

individuals equitably and that their outcomes are not influenced by biases present in the training data or algorithms. The official Microsoft Learn module "Identify the guiding principles for responsible AI" clearly defines fairness as the requirement that AI systems should not amplify or perpetuate existing societal biases.

In this scenario, the statement emphasizes that AI systems should NOT reflect biases from the datasets used to train them, which directly aligns with the fairness principle. Bias in AI models can arise when the data used for training is unbalanced or not representative of the real-world population. For instance, if a facial recognition model is trained mostly on images of one demographic group, it may perform poorly on others- an example of unfair bias. Microsoft advocates building and testing AI systems with diverse, high-quality datasets to ensure fair performance across all groups.

The other principles listed-accountability, inclusiveness, and transparency-are also important but do not directly address bias mitigation:

* Accountability ensures that people remain responsible for AI systems and their decisions.
* Inclusiveness promotes accessibility and usability for all people, including those with disabilities.
* Transparency focuses on explaining how AI systems make decisions.

However, Fairness explicitly deals with avoiding discrimination and bias in AI outcomes and training data.

Thus, in Microsoft's Responsible AI framework, ensuring that systems do not reflect biases from datasets is part of the Fairness principle, which promotes equitable and unbiased treatment for all individuals in AI- driven decisions.

NEW QUESTION # 196

Match the services to the appropriate descriptions.

To answer, drag the appropriate service from the column on the left to its description on the right. Each service may be used once, more than once, or not at all.

NOTE: Each correct match is worth one point

Answer:

Explanation:

Explanation:

NEW QUESTION # 197

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Reference:

NEW QUESTION # 198

Which term is used to describe uploading your own data to customize an Azure OpenAI model?

- A. grounding
- B. prompt engineering
- C. completion
- D. fine -tuning

Answer: D

Explanation:

In Azure OpenAI Service, fine-tuning refers to the process of uploading your own labeled dataset to customize or adapt a pretrained model (such as GPT-3.5 or Curie) for a specific use case. According to the Microsoft Learn documentation and AI-900 official study guide, fine-tuning allows organizations to improve a model's performance on domain-specific tasks or to align responses with brand tone and context.

Fine-tuning differs from simple prompting because it requires providing structured training data (usually in JSONL format) that contains pairs of input prompts and ideal completions. The model uses this data to adjust its internal weights, thereby "learning" your organization's language patterns, terminology, or industry context.

Option review:
* A. Completion: Refers to the text generated by a model in response to a prompt. It's the output, not the customization process.
* B. Grounding: Integrates external, up-to-date data sources (like search results or databases) during inference but doesn't alter the model's parameters.
* C. Fine-tuning: # Correct - this is the process of uploading and training with your own data.
* D. Prompt engineering: Involves designing effective prompts but does not change the underlying model.
Thus, fine-tuning is the term used for customizing an Azure OpenAI model using your own uploaded data.

NEW QUESTION # 199
To complete the sentence, select the appropriate option in the answer area.

Answer:

Explanation:

Reference:
