

CIS-PA Exam Demo - CIS-PA Pdf Braindumps

2026 Latest DumpsValid CIS-PA PDF Dumps and CIS-PA Exam Engine Free Share: <https://drive.google.com/open?id=1x90AAJiHzW4VKOvXGPmyJxqsKTYmbceH>

Candidates who want to be satisfied with the Certified Implementation Specialist - Platform Analytics (CIS-PA) preparation material before buying can try a free demo. Customers who choose this platform to prepare for the Certified Implementation Specialist - Platform Analytics (CIS-PA) exam require a high level of satisfaction. For this reason, DumpsValid has a support team that works around the clock to help CIS-PA applicants find answers to their concerns.

ServiceNow CIS-PA Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Administration and Solutions: This domain covers administrative tasks using the Admin Console and accelerating deployment with pre-built Content Packs.
Topic 2	<ul style="list-style-type: none">Architecture and Deployment: This domain covers the foundational components of the Performance Analytics solution and the proper deployment sequence in ServiceNow environments.
Topic 3	<ul style="list-style-type: none">Configure Breakdowns and Breakdown Sources: This section covers setting up breakdowns to analyze indicators across different dimensions, including breakdown mappings, matrices, exclusions, scripted mappings, and bucket groups.
Topic 4	<ul style="list-style-type: none">Data Visualization: This section focuses on presenting data through widgets, interactive filters, appropriate visualizations, dashboards, and analyzing data using Analytics Hub and KPI Details.
Topic 5	<ul style="list-style-type: none">Configure Indicators and Indicator Sources: This domain addresses creating and configuring indicators (performance metrics), including source conditions, fact tables, indicator types, properties, and aggregation scripts.
Topic 6	<ul style="list-style-type: none">This section addresses identifying and resolving issues using Spotlight diagnostic tools to monitor system health and performance.

- Data Collection: This domain explains how Performance Analytics gathers and processes data, including collection flow, configuration properties, and troubleshooting collection issues.

ServiceNow CIS-PA Pdf Braindumps, Valid CIS-PA Exam Duration

If you do all things with efficient, you will have a promotion easily. If you want to spend less time on preparing for your CIS-PA exam, if you want to pass your exam and get the certification in a short time, our CIS-PA Study Materials will be your best choice to help you achieve your dream. Only studying with our CIS-PA learning engine for 20 to 30 hours, we can claim that you can pass you exam without difficulty.

ServiceNow Certified Implementation Specialist - Platform Analytics Sample Questions (Q20-Q25):

NEW QUESTION # 20

Which scenario requires scripted Breakdown Mapping?

- A. The table being mapped is a database view and not an actual table
- **B. There is no direct mapping between the Indicator field and the Breakdown table**
- C. The field to map to is of type Sys ID
- D. The value needed for the Breakdown is available only as a dot-walked field

Answer: B

Explanation:

Scripted Breakdown Mappings are required when there is no direct field relationship between the Indicator source data and the Breakdown source table. In such cases, standard field mapping cannot resolve how indicator records should be categorized, so a script is needed to programmatically determine the correct breakdown value.

Mapping to a Sys ID field (option B) is supported through standard mappings. Database views (option C) can still be mapped if fields are accessible. Dot-walked fields (option D) are commonly supported without scripting. According to ServiceNow Platform Analytics documentation, scripted mappings are specifically intended for complex or indirect relationships, making option A the correct answer.

NEW QUESTION # 21

Which role allows for creating and configuring Indicators, Breakdowns, and managing Data Collection?

- A. PA Contributor
- B. PA Data Collector
- C. PA Power User
- **D. PA Admin**

Answer: D

Explanation:

The PA Admin role provides full administrative access to Platform Analytics. Users with this role can create and configure indicators, define breakdowns and breakdown sources, manage data collection jobs, activate content packs, and administer analytics security and settings.

PA Contributors typically create content within limited scopes, while PA Power Users focus on analysis and dashboards rather than core configuration. The PA Data Collector role is limited to running data collection jobs. ServiceNow documentation clearly identifies PA Admin as the role required for full analytics configuration and administration, making option B the correct answer.

NEW QUESTION # 22

Which configuration confirms that an Automated Breakdown is using a Bucket Group?

- A. The Facts table of the Breakdown Source is set to [pa_buckets]
- B. The Facts table of the Breakdown is set to [pa_buckets]
- C. The Default elements filter of the Breakdown specifies the Bucket Groups
- D. The Related list conditions of the Breakdown Source identify the Bucket Groups

Answer: A

Explanation:

An Automated Breakdown is confirmed to be using a Bucket Group when the Facts table of the Breakdown Source is set to Bucket [pa_buckets]. Bucket Groups define how numeric or duration values are grouped, but the actual bucketed analytics data is stored in the pa_bucketstable during data collection.

The Breakdown Source is responsible for defining where the breakdown facts originate. If its Facts table is pa_buckets, this indicates that the breakdown is based on bucketed values generated by a Bucket Group. The Breakdown record itself does not define the facts table, and default element filters or related list conditions do not establish the use of bucket data.

ServiceNow Platform Analytics documentation clearly states that all bucket-based breakdowns must reference pa_buckets at the Breakdown Source level, making option C the correct and definitive answer.

NEW QUESTION # 23

When are Additional conditions of an Indicator evaluated during Data Collection?

- A. When the Indicator is viewed in the Analytics Hub
- B. After the Indicator Source conditions
- C. Before the Indicator Source conditions
- D. At the same time as the Indicator Source conditions

Answer: B

Explanation:

During data collection, Platform Analytics first applies the Indicator Source conditions to retrieve the base dataset. Once the source data is identified, the system then evaluates the Additional conditions defined on the Indicator itself.

This separation allows indicator-specific filtering without duplicating logic in the indicator source, supporting reuse and performance optimization. Additional conditions do not run in parallel with source conditions and are not evaluated at visualization time.

ServiceNow documentation explicitly explains that Indicator conditions refine the dataset after the source query executes, making option D the correct answer.

NEW QUESTION # 24

An Indicator stores the value 42,502.

If the Precision is set to 2, what is displayed in a Score widget?

- A. 42,502.00
- B. 0
- C. 4.25k
- D. 4,250.20

Answer: C

Explanation:

In Platform Analytics score widgets, the Precision setting controls how numeric values are abbreviated and rounded for display. When precision is set to 2, large numbers are displayed using compact notation (such as k for thousands) with two significant digits.

A stored value of 42,502 is therefore displayed as 4.25k, improving readability while preserving meaningful precision. Full numeric formatting or fixed decimal display is not the default behavior for score widgets.

ServiceNow documentation confirms that precision affects abbreviated score presentation, making option B the correct answer.

NEW QUESTION # 25

.....

When candidates don't practice with the latest CIS-PA exam questions, they fail and lose their precious resources. For candidates who wish to clear the CIS-PA exam in a short time, DumpsValid offers the latest and actual ServiceNow Exam Questions. Our

Certified Implementation Specialist - Platform Analytics (CIS-PA) exam questions are excellent and ensure that users succeed in one go. Authentic CIS-PA Exam Questions are available in these formats: web-based practice exam, desktop practice test software, and PDF format. Since every test taker has unique learning styles, DumpsValid has designed these formats to meet the practice needs of CIS-PA exam candidates.
