- A. They are made up of individuals, each of whom can define, develop, test, and deploy the system
- B. They deliver value every 6 weeks
- C. They are optimized for communication and delivery of value
- D. They release customer products to production continuously

Answer: C

Explanation:

Explanation

This is one way to describe a cross-functional Agile team. A cross-functional Agile team is a group of 5-11 individuals who have the skills and authority to define, build, test, and deploy some element of solution value-all within a short iteration timebox. A cross-functional Agile team is optimized for communication and delivery of value by having clear roles and responsibilities, shared goals and commitments, frequent feedback and collaboration, high trust and accountability, and continuous improvement.
