- B. To automatically migrate legacy data to the development instance
- **C. To review the functional scope as identified for the customer's solution**
- D. To enable the system to automatically detect and resolve data inconsistencies

Answer: C

* Option A: To review the functional scope as identified for the customer's solutionCorrect. Non- standard scope items are activated in the Starter system to allow customers to review and validate the functional scope that meets their specific needs. TheSAP S/4HANA Cloud Implementation Guidestates,

"Non-standard scope items are activated in the Starter system to enable customers to explore and validate the functional scope during Fit-to-Standard workshops, ensuring alignment with their solution requirements."

- A. Each change management dimension is assigned to a specific SAP Activate phase.
- **B. The start of each change management activity is assigned to one specific SAP Activate phase.**

- C. Some change management activities are executed in more than one SAP Activate phase.
- D. The SAP Activate phases build the dimensions of the organizational change management framework.

Answer: B,C

Explanation:

SAP's Organizational Change Management (OCM) framework is tightly integrated with the SAP Activate methodology to ensure effective adoption of SAP S/4HANA Cloud Public Edition. The connection between OCM and SAP Activate is structured to align change management with project phases.

* Option A: Each change management dimension is assigned to a specific SAP Activate phase.

Incorrect. OCM dimensions (e.g., strategy, leadership, realization) span multiple phases, not one specific phase. The SAP S/4HANA Cloud OCM Guide states, "OCM dimensions are applied across the SAP Activate phases, not confined to a single phase."

* Option B: The SAP Activate phases build the dimensions of the organizational change management framework. Incorrect. The OCM dimensions are predefined and independent, not built by SAP Activate phases. The SAP Activate Methodology Guide notes, "The OCM framework's dimensions are established to support SAP Activate, but the phases do not define the dimensions."

* Option C: The start of each change management activity is assigned to one specific SAP Activate phase. Correct. Each OCM activity has a defined starting point within a specific SAP Activate phase, ensuring alignment with project milestones.
