FCP_FGT_AD-7.6 Verified Answers - Latest FCP_FGT_AD-7.6 Exam Online

To maintain relevancy and top standard of Fortinet FCP_FGT_AD-7.6 exam questions, the Prep4sureExam has hired a team of experienced and qualified Fortinet FCP_FGT_AD-7.6 exam trainers. They work together and check every FCP_FGT_AD-7.6 exam practice test question thoroughly and ensure the top standard of FCP_FGT_AD-7.6 Exam Questions all the time. So you do not need to worry about the relevancy and top standard of Fortinet FCP_FGT_AD-7.6 exam practice test questions.

Fortinet FCP - FortiGate 7.6 Administrator Sample Questions (Q110-Q115):

NEW QUESTION # 110

Refer to the exhibits. A web filter profile configuration and firewall policy configuration are shown. You are trying to access www.facebook.com, but you are redirected to a FortiGuard web filtering block page. Based on the exhibits, what is the possible cause of the issue?

⌵

- A. For www.facebook.com, the URL filter action is incorrect.
- B. The firewall policy inspection mode is incorrect.
- C. The web rating override configuration is incorrect.
- D. The web filter profile feature set is configured incorrectly.

Answer: C

Explanation:

The web filter profile shows a URL filter override for www.facebook.com with action Monitor, which should allow access. However, the block page shows FortiGuard categorizing www.facebook.com as Malicious Websites and blocking it. This indicates that the web rating override configuration is incorrect (the override is not applied properly), so FortiGuard's default category action takes precedence and blocks the site.

NEW QUESTION # 111

An administrator needs to analyze and resolve port conflicts between SSL VPN and HTTPS administrative access on the same interface.

In which two ways can this be done? (Choose two.)

- A. Disable SSL VPN if HTTPS administrative access is using port 443 on any interface.
- B. Run SSL VPN on one interface using port 443 and enable HTTPS administrative access on a different interface, also using port 443.
- C. Change the port number for either the SSL VPN service or the HTTPS administrative service if both are on the same interface.
- D. Keep port 443 for both SSL VPN and HTTPS administrative access on the same interface without any problems.

Answer: B,C

Explanation:

You can keep port 443 for SSL VPN on one interface and also use port 443 for HTTPS admin access on a different interface. Since the services are bound to different interfaces, no conflict occurs.

If both SSL VPN and HTTPS admin access are required on the same interface, you must change the port number for one of the services to avoid a port conflict.

NEW QUESTION # 112

A FortiGate administrator is required to reduce the attack surface on the SSL VPN portal.

Which SSL timer can you use to mitigate a denial of service (DoS) attack?

- A. SSL VPN login-timeout
- B. SSL VPN idle-timeout
- C. SSL VPN dtls-hello-timeout
- D. SSL VPN http-request-header-timeout

Answer: D

Explanation:

```
config vpn ssl settings
```

```
set http-request-header-timeout <1-60>
```

```
end
```

Timers can also help to mitigate DoS attacks with SSL VPN caused by partial HTTP requests.

NEW QUESTION # 113

An administrator configured a FortiGate device to act as a collector for agentless polling mode.

What must the administrator add to the FortiGate device to retrieve AD user group information?

- A. Keycloak server
- B. LDAP server
- C. TACACS server
- D. RADIUS server

Answer: B

Explanation:

In agentless polling mode, FortiGate directly queries Active Directory to obtain user and group information. To do this, the administrator must configure an LDAP server on the FortiGate, which allows it to retrieve user group membership details from AD.

NEW QUESTION # 114

Refer to the exhibit.

The exhibit shows the FortiGuard Category Based Filter section of a corporate web filter profile.

An administrator must block access to download.com, which belongs to the Freeware and Software Downloads category. The administrator must also allow other websites in the same category.

What are two solutions for satisfying the requirement? (Choose two.)

- A. Configure a static URL filter entry for download.com with Type and Action set to Wildcard and Block, respectively.
- B. Configure a separate firewall policy with action Deny and an FQDN address object for *.download.com as destination address.
- C. Configure a web override rating for download.com and select Malicious Websites as the subcategory.
- D. Set the Freeware and Software Downloads category Action to Warning.

Answer: A,B

Explanation:

Creating a static URL filter to block download.com specifically allows blocking that site without affecting the entire category.

Using a separate firewall policy with a Deny action for an FQDN address object matching download.com can also block the site while allowing others in the same category.

NEW QUESTION # 115

.....

In addition to our FCP_FGT_AD-7.6 exam questions, we also offer a Fortinet Practice Test engine. This engine contains real FCP_FGT_AD-7.6 practice questions designed to help you get familiar with the actual FCP - FortiGate 7.6 Administrator (FCP_FGT_AD-7.6) pattern.
