And you can free download the demos to check it by yourself.

Google Cloud - Apigee Certified API Engineer Sample Questions (Q60-Q65):

NEW QUESTION # 60

As an API Engineer you are approached late in the day with an emergency request to configure a 2 way TLS connection between Apigee and the backend server. All existing certificates have been revoked. The security team provides you the PEM file for the backend server and your new Apigee TLS certificate. What minimum steps are required to reconfigure 2-way TLS?

Choose 2 answers

- A. Use the KVM to store the contents of the PEM file.
- B. Add the backend servers PEM file to the key store.
- C. Add the backend servers PEM file to the trust store.
- D. Add the backend certificate chain to the trust store
- E. Use the Access Control Policy to reference the PEM file
- F. Add your Apigee TLS certificate to the key store.

Answer: A,B
