

SAP Realistic C_BW4H_2505 Exam Flashcards Free PDF Quiz

Question 1. (Multi Select)

Which objects' values can be affected by the key date in a BW query? Note: There are 3 correct answers to this question.

- A: Display attributes
- B: Hierarchies
- C: Basic key figures
- D: Time characteristics
- E: Navigation attributes

Correct Answer: A, B, E

Question 2. (Single Select)

Which layer of the layered scalable architecture (LSA++) of SAP BW/4HANA is designed as the main

storage for harmonized consistent data?

- A: Virtual Data Mart layer
- B: Data Acquisition layer
- C: Open Operational Data Store Layer
- D: Flexible Enterprise Data Warehouse Core layer

Correct Answer: D

Question 3. (Multi Select)

It is the most straightforward format of our SAP Certified Associate - Data Engineer - SAP BW/4HANA (C_BW4H_2505) exam material. The PDF document has updated and actual SAP Exam Questions with correct answers. This format is helpful to study for the C_BW4H_2505 exam even in busy routines. C_BW4H_2505 Exam Questions in this format are printable and portable. You are free to get a hard copy of SAP Certified Associate - Data Engineer - SAP BW/4HANA (C_BW4H_2505) PDF questions or study them on your smartphones, tablets, and laptops at your convenience.

SAP C_BW4H_2505 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• SAP BW• 4HANA Data Flow: This section of the exam measures the practical ability of SAP Consultants to load data within the SAP BW• 4HANA environment. It assesses familiarity with data movement and transformation processes across different layers of the system.

Topic 2	<ul style="list-style-type: none"> • Data Acquisition into SAP HANA: This section evaluates the capacity of SAP Consultants to integrate various data sources into SAP HANA. It assesses their ability to understand different ingestion techniques and ensure data accessibility for processing.
Topic 3	<ul style="list-style-type: none"> • SAP BW • 4HANA Project and the Modeling Process: This section of the exam assesses how Data Engineers guide and contribute to SAP BW • 4HANA projects. It includes knowledge of modeling workflows, project lifecycle stages, and collaboration strategies within project teams.
Topic 4	<ul style="list-style-type: none"> • SAP BW Query Design: This section of the exam assesses the ability of Data Engineers to create and run queries using SAP BW • 4HANA. It evaluates how well candidates can work with query components to retrieve and structure data effectively for reporting and analysis.
Topic 5	<ul style="list-style-type: none"> • Native SAP HANA Modeling: This section evaluates the ability of SAP Consultants to describe and apply native modeling options in SAP HANA. It emphasizes understanding how to build optimized data structures directly within the HANA platform.
Topic 6	<ul style="list-style-type: none"> • SAP Analytics Tools and SAP Analytics Cloud: This section evaluates the skills of SAP Consultants in using tools like SAP Analytics Cloud, Lumira, and Analysis for Office to visualize and interpret data. It focuses on the consultant's ability to apply business intelligence tools within the SAP ecosystem.
Topic 7	<ul style="list-style-type: none"> • Fundamentals: This section of the exam measures the foundational understanding of SAP Consultants and covers essential terms and concepts related to SAP BW • 4HANA and SAP Business Data Cloud. It focuses on the core framework and architecture necessary to navigate and work with these platforms.

Pdf SAP C_BW4H_2505 Version & Upgrade C_BW4H_2505 Dumps

Lead1Pass presents its SAP Certified Associate - Data Engineer - SAP BW/4HANA (C_BW4H_2505) exam product at an affordable price as we know that applicants desire to save money. To gain all these benefits you need to enroll in the SAP Certified Associate - Data Engineer - SAP BW/4HANA EXAM and put all your efforts to pass the challenging SAP Certified Associate - Data Engineer - SAP BW/4HANA (C_BW4H_2505) exam easily. In addition, you can test specs of the SAP Certified Associate - Data Engineer - SAP BW/4HANA practice material before buying by trying a free demo. These incredible features make Lead1Pass prep material the best option to succeed in the SAP C_BW4H_2505 examination. Therefore, don't wait. Order Now !!!

SAP Certified Associate - Data Engineer - SAP BW/4HANA Sample Questions (Q58-Q63):

NEW QUESTION # 58

You use InfoObject B as a display attribute for InfoObject A. Which object properties prevent you from changing InfoObject B into a navigational attribute for InfoObject A? Note: There are 3 correct answers to this question.

- A. InfoObject B is defined as a Key Figure
- B. Data Type "Character String" is set in InfoObject A.
- C. Conversion Routine "ALPHA" is set in InfoObject A.
- D. High Cardinality is set in InfoObject B.
- E. Attribute Only is set in InfoObject B.

Answer: A,D,E

Explanation:

SAP BW/4HANA Project and Modeling Process

NEW QUESTION # 59

With SAP BW/4HANA, the new HANA-optimized business content is designed according to the LSA++ framework. Which technical namespace is assigned to identify the new SAP ERP-related business content?

- A. /BW4/
- B. /SFA/
- C. /IMO/
- D. /CPMB/

Answer: C

NEW QUESTION # 60

You created an Open ODS view of type Facts.

With which object types can you associate a field in the Characteristics folder? Note: There are 2 correct answers to this question.

- A. Open ODS view of type Facts
- B. Open ODS view of type Master Data
- C. HDI Calculation View of data category Dimension
- D. InfoObject of type Characteristic

Answer: B,D

Explanation:

In SAP Data Engineer - Data Fabric, specifically within the context of Open ODS views, associating fields in the Characteristics folder is a critical task for data modeling. Let's break down the options and understand why A and B are the correct answers:

* Explanation: Open ODS views of type "Master Data" are designed to hold descriptive attributes or characteristics that provide context to transactional data (facts). When you create an Open ODS view of type "Facts," you can associate fields in the Characteristics folder with master data objects. This association allows the fact data to be enriched with descriptive attributes from the master data.

* In SAP BW/4HANA, Open ODS views of type Master Data are often used to model dimensions or attributes that describe the facts. For example, customer or product details can be modeled as master data and linked to fact data.

2. InfoObject of Type Characteristic (Option B) Explanation: An InfoObject of type "Characteristic" is a fundamental object in SAP BW/4HANA that represents a business attribute or property. These InfoObjects can be used to define characteristics in the Characteristics folder of an Open ODS view of type Facts. By associating a field with an InfoObject, you ensure consistency and reusability of metadata across the system.

Reference: InfoObjects are part of the SAP BW metadata repository and are widely used in modeling scenarios. They provide a standardized way to define and manage characteristics such as customer, product, or region.

3. Open ODS View of Type Facts (Option C) Explanation: Open ODS views of type "Facts" are designed to store transactional data (measures) rather than descriptive attributes. Fields in the Characteristics folder cannot be associated with another Open ODS view of type Facts because this would create redundancy and violate the separation of concerns between facts and characteristics.

Reference: The architecture of Open ODS views enforces a clear distinction between fact data (quantitative measures) and characteristic data (descriptive attributes).

4. HDI Calculation View of Data Category Dimension (Option D) Explanation: While HDI (HANA Deployment Infrastructure) Calculation Views of data category "Dimension" are used in SAP HANA to model dimensional data, they are not directly compatible with Open ODS views in SAP BW/4HANA. Open ODS views operate within the BW/4HANA framework and rely on BW-specific objects like InfoObjects or other Open ODS views for associations.

Reference: HDI Calculation Views are part of the native SAP HANA modeling environment and are not natively integrated with BW/4HANA Open ODS views. Therefore, they cannot be directly associated with fields in the Characteristics folder of an Open ODS view.

Conclusion The correct answers are A (Open ODS view of type Master Data) and B (InfoObject of type Characteristic) because these are the only object types that align with the purpose of the Characteristics folder in an Open ODS view of type Facts. They enable the enrichment of transactional data with descriptive attributes while maintaining the integrity and structure of the data model.

NEW QUESTION # 61

How does SAP Business Data Cloud facilitate the use of diverse data sources for AI-powered analytics?

- A. By centralizing data from both SAP and non-SAP sources into a unified semantic layer

- B. By integrating diverse data sources through custom APIs
- **C. By providing a secure platform for storing and managing diverse data sets**
- D. By transforming raw data from diverse sources into a standardized format

Answer: A,C

Explanation:

SAP BW/4HANA Project and Modeling Process

NEW QUESTION # 62

Why do you set the Read Access Type to "SAP HANA View" in an SAP BW/4HANA InfoObject?

- A. To enable parallel loading of master data texts
- B. To use the InfoObject as an association within an Open ODS view
- C. To report master data attributes which are defined in calculation views
- **D. To generate an SAP HANA calculation view data category Dimension**

Answer: D

Explanation:

When the Read Access Type is set to "SAP HANA View" for an InfoObject in SAP BW/4HANA:

* SAP HANA Calculation View Generation:

* This setting enables the generation of an SAP HANA calculation view of the data category Dimension for the InfoObject.

* The view allows seamless integration and use of the InfoObject in other HANA-native modeling scenarios.

* Purpose:

* To enhance data access and leverage SAP HANA's performance for analytics and modeling.
