What's more, part of that Prep4away C_ACDET_2506 dumps now are free: <https://drive.google.com/open?id=1wWoHPaFXakPCxoMDD2cnjIAVeVytJuqJ>

If you can get the certification for C_ACDET_2506 exam, then your competitive force in the job market and your salary can be improved. We can help you pass your exam in your first attempt and obtain the certification successfully. C_ACDET_2506 exam braindumps are high-quality, they cover almost all knowledge points for the exam, and you can master the major knowledge if you choose us. In addition, C_ACDET_2506 Test Dumps also contain certain quantity, and it will be enough for you to pass the exam. We offer you free demo for you to have a try, so that you can have a deeper understanding of what you are going to buy.

SAP C_ACDET_2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.
Topic 2	<ul style="list-style-type: none"> • Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.

Topic 3	<ul style="list-style-type: none"> • Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.

C_ACDET_2506 Exam Pass4sure & C_ACDET_2506 Dump Collection

It is of great importance to consolidate all key knowledge points of the C_ACDET_2506 exam. It is difficult for you to summarize by yourself. It is a complicated and boring process. We will collect all relevant reference books of the C_ACDET_2506 exam written by famous authors from the official website. And it is not easy and will cost a lot of time and efforts. At the same time, it is difficult to follow and trace the changes of the C_ACDET_2506 Exam, but our professional experts are good at this for you. Just buy our C_ACDET_2506 study materials, you will succeed easily!

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q31-Q36):

NEW QUESTION # 31

Which of the following applies in a greenfield deployment scenario when migrating configurations from your test site?

- A. If any configuration type fails during the migration process, you cannot create a new migration request.
- B. You can revert migrated configurations from the target site.
- C. You cannot make other configuration updates in ICM when a migration operation is in progress.
- D. The status changes to Complete when migration is finished.

Answer: C,D

NEW QUESTION # 32

During which SAP Activate Methodology phase do you migrate the configuration to Production?

- A. Migrate
- B. Push
- C. Deploy
- D. Move

Answer: C

Explanation:

The Deploy phase is when final cutover activities take place, including migrating configurations and master data to production, running final system tests, and performing the go-live. The other options are not standard SAP Activate phases for Ariba.

NEW QUESTION # 33

Which of the following data elements must be manually loaded into the Production environment after full configuration migration is completed using the Intelligent Configuration Manager (ICM)? Note: There are 2 correct answers to this question.

- A. Enumerations
- B. Relation and Relation Entries
- C. Units of Measure
- D. User to Group Mapping

Answer: A,B

NEW QUESTION # 34

How do you format the Help Tip for a field?

- A. Select Field Configuration, select the class, and edit the field. In the Help Tip, you can format the text by selecting the string and using regular keyboard controls such as Ctrl-I, Ctrl-B.
- **B. Select Field Configuration, select the class, and edit the field. In the Help Tip, you can add standard HTML tags for formatting**
- C. Select Field Configuration and edit the field. In the Help Tip, you can only use plain text without any formatting options.
- D. Select Field Configuration and edit the field. In the Help Tip, you can format the text by using the mouse to highlight the text and then right-clicking to access formatting options.

Answer: B

Explanation:

SAP Ariba supports basic HTML formatting tags in the Help Tip textfield, such as , <i>, and <u>, which allow formatting like bold, italics, and underline within the help tips. This provides flexibility in presenting clear, well-structured guidance to end users. Options B and C suggesting mouse-based formatting or keyboard shortcuts are not supported because the Help Tip editor is a plain text input that parses HTML but does not offer a rich-text UI. Option D is incorrect because HTML tags are explicitly allowed for formatting.

This method enhances user experience by allowing visually distinct emphasis and line breaks in Help Tips, improving clarity without complicating the UI.

NEW QUESTION # 35

When preparing to load legacy contracts during a Bluefield deployment in SAP Ariba Contracts, which of the following actions are required to ensure a successful migration?

- A. Create a new customized contract upload process specifically for Bluefield deployments to accommodate differences in site structure.
- B. Skip the legacy contract upload step if the Production site already contains migrated Flex Master Data Templates.
- C. Manually enter legacy contract data into SAP Ariba Contracts using the application's UI instead of using import tools.
- **D. Use the exact same process and tools as used in the Greenfield migration scenario to upload legacy contracts.**

Answer: D

Explanation:

In Bluefield deployments, the legacy contract migration process is the same as in Greenfield deployments.

The standard approach uses SAP Ariba's import tools to upload contract data in bulk; no special new processes are needed.

Manual entry via UI is inefficient and error-prone. Also, existing Flex Master Data Templates do not negate the need to migrate legacy contract data.

Following the established Greenfield procedures ensures data consistency and alignment with configured templates and workflows in the target environment. This includes exporting contract data from legacy systems, validating, transforming as needed, and importing through the Production UI under contract management.

This standardization simplifies migrations across different deployment scenarios.

NEW QUESTION # 36
