The software is designed to help with Designing and Implementing Microsoft DevOps Solutions (AZ-400) exam dumps preparation. Designing and Implementing Microsoft DevOps Solutions (AZ-400) practice test software can be used on devices that range from mobile devices to desktop computers.

## Microsoft Designing and Implementing Microsoft DevOps Solutions Sample Questions (Q366-Q371):

### NEW QUESTION # 366

You have a brand policy in a project in Azure DevOps. The policy requires that code always builds successfully. You need to ensure that a specific user can always merge change to the master branch, even if the code fails to compile. The solution must use the principle of least privilege. What should you do?

- A. Add the user to the Build Administrators group,
- **B. From the Security settings of the branch, modify the access control for the user.**
- C. From the Security setting of the repository, modify the access control tor the user.
- D. Add the user to the Project Administrators group

**Answer: B**

Explanation:

In some cases, you need to bypass policy requirements so you can push changes to the branch directly or complete a pull request even if branch policies are not satisfied. For these situations, grant the desired permission from the previous list to a user or group. You can scope this permission to an entire project, a repo, or a single branch. Manage this permission along with other Git permissions.

<https://docs.microsoft.com/en-us/azure/devops/repos/git/branch-policies>

### NEW QUESTION # 367

How should you complete the code to initialize App Center in the mobile application? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation:

Scenario: Visual Studio App Center must be used to centralize the reporting of mobile application crashes and device types in use. In order to use App Center, you need to opt in to the service(s) that you want to use, meaning by default no services are started and you will have to explicitly call each of them when starting the SDK.

Insert the following line to start the SDK in your app's AppDelegate class in the didFinishLaunchingWithOptions method.

`MSAppCenter.start("{Your App Secret}", withServices: [MSAnalytics.self, MSCrashes.self])` References:

<https://docs.microsoft.com/en-us/appcenter/sdk/getting-started/ios>

### NEW QUESTION # 368

You have a private project in Azure DevOps and two users named User1 and User2.

You need to add User1 and User2 to groups to meet the following requirements:

- \* User1 must be able to create a code wiki.
- \* User2 must be able to edit wiki pages.
- \* The solution must use the principle of least privilege.

To which group should you add each user? To answer, drag the appropriate groups to the correct users. Each group may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation:

User1: Project Administrators

You must have the permission Create Repository to publish code as wiki. By default, this permission is set for members of the Project Administrators group.

User2: Contributors

Anyone who is a member of the Contributors security group can add or edit wiki pages.

Anyone with access to the team project, including stakeholders, can view the wiki.

### NEW QUESTION # 369

You have web app named App1 that uses Application Insights in Azure Monitor to Store log data. App1 has users in multiple locations.

You need to query App1 requests from London and Paris that return error. The solution must meet the following requirements:

- \* Return the timestamp, url, result Code, and duration fields.
- \* Only requests made the last hour.

How should you complete the query?

**Answer:**

Explanation:

Explanation:

### NEW QUESTION # 370

You have the Azure DevOps pipeline shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

#### Answer:

Explanation:

Explanation:

Box 1: 1

The Cloud agent job only.

Box 2: 4

The pipelines has the four tasks: NuGetrestore, Compile Application, Copy Files, and Publish Artifact.
