UiPath Automation Business Analyst Associate Exam (2023.10) Sample Questions (Q59-Q64):

NEW QUESTION # 59

Which of the following roles is responsible for defining the automation architecture and advising the development team?

- A. Business Analyst
- B. Solution Architect
- C. Automation Developer
- D. Infrastructure Engineer

Answer: B

Explanation:
TheSolution Architectplays a pivotal role in automation projects by defining theoverall automation architecture, acting as thetechnical lead, and advising the development teamon implementation approaches.
Their responsibility is to ensure that the solution design aligns with the automation goals, technical standards, and scalability requirements.
They collaborate closely with the business analyst to understand the process requirements and then map out a future-state processby selecting suitable tools, frameworks, and best practices. Solution architects also evaluate integration requirements, security considerations, infrastructure dependencies, and performance expectations.
Throughout the automation lifecycle - from solution design to development, UAT, and deployment - the solution architect remains involved to resolve technical issues, optimize the design, and validate the solution's robustness. Their involvement ensures technical consistency and quality across all stages of implementation.

NEW QUESTION # 60
Which three roles from the Implementation Team participate in the Process Analysis stage?

- A. Business Analyst, Infrastructure Engineer, Project Manager
- B. Solution Architect, Project Manager, Business Analyst
- C. Automation Developer, Solution Architect, Client SME
- D. Project Manager, Developer, Client IT

Answer: B

Explanation:
During theProcess Analysisstage, the following three key roles from the Implementation Teamare involved:
* Solution Architect
* Project Manager
* Business Analyst
Each role brings a unique perspective and responsibility to the analysis. Thebusiness analystfocuses on understanding the business goals and documenting theAs-Isprocess. Thesolution architectevaluates the process from a technical standpoint to identify automation opportunities and potential roadblocks. Theproject manageroversees the planning and timelines to ensure alignment with the broader project goals.
This collaborative analysis results in a comprehensive and well-documentedProcess Definition Document (PDD), which becomes the foundation for the subsequent design and development phases. This stage is critical to ensuring that the correct processes are chosen for automation and that the team is aligned on the scope and expectations.

NEW QUESTION # 61
What is the eighth and final stage in the UiPath Automation Implementation Methodology?

- A. Project Closure
- B. User Acceptance Testing (UAT)
- C. Process Analysis
- D. Deployment and Hypercare

Answer: A

Explanation:
Theeighth and final stagein the UiPath Automation Implementation Methodology isProject Closure. This stage ensures the formal completion of the automation project, including documentation, knowledge transfer, performance reviews, and stakeholder sign-offs.
At this point, the automation has been developed, tested, deployed, and stabilized. The focus shifts to closing open items, confirming that all success criteria have been met, and collecting feedback from both theClient TeamandImplementation Team. Any lessons

learned are documented, which can be reused for future automation initiatives.

Project Closure is critical to wrap up the engagement in a structured way. It includes archiving documents, performing final quality checks, and transitioning maintenance responsibilities. Involving all stakeholders in this phase ensures transparency, accountability, and a complete handover of the automated process into a business-as-usual state.

NEW QUESTION # 62

What document outlines the tests to be performed and logistics for end-user testing after development?

- A. Solution Design Document (SDD)
- B. User Acceptance Testing (UAT) Plan
- C. Application Tracker
- D. Project Readiness Checklist

Answer: B

Explanation:

TheUser Acceptance Testing (UAT) Planis the document that details howend-user testingwill occur once development is complete. It defines thetest cases,success criteria,testing timelines, andresponsible parties from both the Implementation and Client Teams.

This document is essential for organizing the UAT phase, ensuring that all involved stakeholders are aware of what will be tested, how issues will be logged, and who is responsible for resolving them. It also outlines the criteria that must be met for the automation to be considered acceptable and ready for production.

The UAT Plan supports a structured and transparent testing process, minimizing the risk of miscommunication and ensuring that the delivered solution meets business expectations. It helps validate that the automation aligns with the agreed-upon requirements, business rules, and user needs captured during the earlier stages of the project.

NEW QUESTION # 63

Which one of the following statements is TRUE about the Process Definition Document (PDD)?

- A. It is prepared solely by the Project Manager
- B. It is filled with only the As-Is process details
- C. It is a document used for project closure after deployment
- D. It contains only the To-Be process design and future-state flows

Answer: B

Explanation:

TheProcess Definition Document (PDD)is primarily filled with theAs-Is process details, makingOption C the correct statement. The PDD captures how the process works today - including steps, inputs/outputs, systems used, exceptions, and roles involved.

It is typically created through collaboration between theBusiness AnalystandSolution Architect, based on workshops and shadowing sessions with the Client Team. This document forms the foundation for all subsequent steps in the implementation lifecycle, especially theSolution Designstage, where the To-Be process is planned.

The PDD ensures all stakeholders have ashared understandingof the current process before automation design begins. It also helps identify scope boundaries and validate that automation requirements are complete and accurate.
