

# 2026 NSE7\_SSE\_AD-25 Exam Dumps Collection | High Pass-Rate NSE7\_SSE\_AD-25 100% Free Test Dumps

Updated **NSE7\_OT5-7.2** Exam Dumps -

Proven Way to Achieve Fortinet Certified

Solution Specialist (FCSS) in OT Security Certification

It's our responsibility to offer instant help to every user on our NSE7\_SSE\_AD-25 exam questions. If you have any question about NSE7\_SSE\_AD-25 study materials, please do not hesitate to leave us a message or send us an email. Our customer service staff will be delighted to answer your questions on the NSE7\_SSE\_AD-25 learning engine. And we will give you the most professional suggestion on the NSE7\_SSE\_AD-25 practice prep with kind and considerate manner in 24/7 online.

Dumpkiller provides you with free demos of its Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator NSE7\_SSE\_AD-25 exam product. You can try a free demo to eliminate any confusion regarding the authenticity of our Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator NSE7\_SSE\_AD-25 PDF and practice tests (web-based & desktop software). It is also our policy to facilitate you with NSE7\_SSE\_AD-25 free actual dumps updates in case of new Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator NSE7\_SSE\_AD-25 test changes within three months of your shopping. Contact us any time, if you need any guidance about our Fortinet NSE7\_SSE\_AD-25 exam product. There is only one way to get all these amazing NSE7\_SSE\_AD-25 exam dumps offers and that is purchasing our product today.

## NSE7\_SSE\_AD-25 Test Dumps - NSE7\_SSE\_AD-25 Practice Engine

If they fail to do it despite all their efforts, so "Dumpkiller" they can get a full refund of their money according to terms and conditions. The practice material of "Dumpkiller" is packed with many premium features, and it is getting updated daily according to the real Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator (NSE7\_SSE\_AD-25) exam syllabus. The product of "Dumpkiller" came into existence after consulting with Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator (NSE7\_SSE\_AD-25) many professionals and getting their positive reviews.

## Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator Sample Questions (Q58-Q63):

### NEW QUESTION # 58

A customer wants to ensure secure access for private applications for their users by replacing their VPN. Which two SASE technologies can you use to accomplish this task? (Choose two.)

- A. SD-WAN on-ramp
- B. zero trust network access (ZTNA)
- C. secure web gateway (SWG) and cloud access security broker (CASB)
- D. secure SD-WAN

**Answer: A,B**

Explanation:

ZTNA replaces traditional VPNs by enforcing identity- and posture-based access to private applications. SD-WAN on-ramp

integrates with FortiSASE to securely route traffic from branch users to private applications over the SASE fabric, ensuring secure and optimized access.

#### NEW QUESTION # 59

A FortiSASE administrator is configuring a Secure Private Access (SPA) solution to share endpoint information with a corporate FortiGate.

Which three configuration actions will achieve this solution? (Choose three.)

- A. Apply the FortiSASE zero trust network access (ZTNA) license on the corporate FortiGate.
- **B. Register FortiGate and FortiSASE under the same FortiCloud account.**
- **C. Add the FortiGate IP address in the secure private access configuration on FortiSASE.**
- D. Authorize the corporate FortiGate on FortiSASE as a ZTNA access proxy.
- **E. Use the FortiClient EMS cloud connector on the corporate FortiGate to connect to FortiSASE**

**Answer: B,C,E**

Explanation:

To configure a Secure Private Access (SPA) solution to share endpoint information between FortiSASE and a corporate FortiGate, you need to take the following steps:

- \* Add the FortiGate IP address in the secure private access configuration on FortiSASE:
- \* This step allows FortiSASE to recognize and establish a connection with the corporate FortiGate.
- \* Use the FortiClient EMS cloud connector on the corporate FortiGate to connect to FortiSASE:
- \* The EMS (Endpoint Management Server) cloud connector facilitates the integration between FortiClient endpoints and FortiSASE, enabling seamless sharing of endpoint information.
- \* Register FortiGate and FortiSASE under the same FortiCloud account:
- \* By registering both FortiGate and FortiSASE under the same FortiCloud account, you ensure centralized management and synchronization of configurations and policies.

References:

FortiOS 7.6 Administration Guide: Provides details on configuring Secure Private Access and integrating with FortiGate.

FortiSASE 23.2 Documentation: Explains how to set up and manage connections between FortiSASE and corporate FortiGate.

#### NEW QUESTION # 60

Refer to the exhibits.

A FortiSASE administrator has configured an antivirus profile in the security profile group and applied it to the internet access policy. Remote users are still able to download the eicar.com-zip file from <https://eicar.org>.

Which configuration on FortiSASE is allowing users to perform the download? (Choose one answer)

- A. Intrusion prevention is disabled.
- **B. Deep inspection is not enabled.**
- C. Web filter is allowing the URL.
- D. Application control is exempting all the browser traffic.

**Answer: B**

Explanation:

The core of the issue shown in the exhibits is the lack of visibility into encrypted traffic.

- \* HTTPS Encryption: The eicar.org website uses the HTTPS protocol for its downloads. This means the data payload, including the test malware file, is encrypted as it traverses the network.
- \* SSL Inspection Modes: As seen in the Security profile group exhibit (image\_5705fc.jpg), the SSL inspection mode is explicitly set to Certificate inspection mode.
- \* Visibility Gap: Certificate inspection only analyzes the initial SSL handshake, such as the server certificate and SNI (Server Name Indication). It does not decrypt the traffic payload. Consequently, the antivirus engine in FortiSASE cannot "see" or scan the eicar.com-zip file hidden within the encrypted session.
- \* Resolution Requirement: To detect and block malicious files over HTTPS, SSL Deep Inspection must be enabled. Deep inspection allows FortiSASE to act as a proxy, decrypting the traffic for full content scanning by the antivirus and IPS engines before re-encrypting it for the endpoint.
- \* Log Analysis: While the web filtering logs (image\_5704e5.jpg) show the traffic is "Allowed" because the URL is not blocked by a web filter category, this is only the first step of inspection. The antivirus engine is present but ineffective because it is blind to the encrypted content due to the lack of deep inspection.

### NEW QUESTION # 61

Which two additional components does FortiSASE use for application control to act as an inline-CASB?  
(Choose two.)

- A. Web filter with inline-CASB
- B. SSL deep inspection
- C. DNS filter
- D. intrusion prevention system (IPS)

**Answer: A,B**

Explanation:

FortiSASE uses the following components for application control to act as an inline-CASB (Cloud Access Security Broker):

\* SSL Deep Inspection:

\* SSL deep inspection is essential for decrypting and inspecting HTTPS traffic to identify and control applications and data transfers within encrypted traffic.

\* This allows FortiSASE to enforce security policies on SSL/TLS encrypted traffic, providing visibility and control over cloud applications.

\* Web Filter with Inline-CASB:

\* The web filter component integrates with inline-CASB to monitor and control access to cloud applications based on predefined security policies.

\* This combination provides granular control over cloud application usage, ensuring compliance with security policies and preventing unauthorized data transfers.

References:

FortiOS 7.6 Administration Guide: Details on SSL deep inspection and web filtering configurations.

FortiSASE 23.2 Documentation: Explains how FortiSASE acts as an inline-CASB using SSL deep inspection and web filtering.

### NEW QUESTION # 62

What is required to enable the MSSP feature on FortiSASE? (Choose one answer)

- A. MSSP user accounts and permissions must be configured on the FortiSASE portal.
- B. Role-based access control (RBAC) must be assigned to identity and access management (IAM) users using the FortiCloud IAM portal.
- C. Multi-tenancy must be enabled on the FortiSASE portal.
- D. The MSSP add-on license must be applied to FortiSASE.

**Answer: B**

Explanation:

To enable the Managed Security Service Provider (MSSP) feature on FortiSASE, the administrative framework must be established outside of the local SASE instance within the broader FortiCloud ecosystem.

\* FortiCloud IAM Integration: The FortiSASE MSSP portal relies on FortiCloud Identity & Access Management (IAM) to define the scope of management for internal teams. Administrators do not create local "MSSP users" within the SASE portal itself; instead, they must use the FortiCloud IAM portal to assign specific Role-Based Access Control (RBAC) to IAM users.

\* Permissions and Scope: These RBAC settings determine which customer tenants (Organizational Units or OUs) an MSSP administrator can view, configure, or monitor. Without the proper role assignment in the IAM portal, the MSSP portal and its multi-tenant viewing capabilities will not be accessible to the user, even if the account has the necessary licenses.

\* Hierarchical Management: Once RBAC is correctly assigned, the MSSP administrator can leverage the FortiCloud Organizations service to manage multiple customer accounts from a single pane of glass. This centralized approach ensures that security policies and configurations can be standardized across the entire customer base while maintaining strict data isolation between tenants.

According to the FortiSASE 25 Multitenant Deployment Guide, configuring the IAM portal is the primary prerequisite that grants an MSSP internal team the permissions necessary to perform operations on customer FortiSASE tenants.

### NEW QUESTION # 63

.....

The valid updated, and real Dumpkiller NSE7\_SSE\_AD-25 questions and both practice test software are ready to download. Just take the best decision of your professional career and get registered in Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator NSE7\_SSE\_AD-25 certification exam and start this journey with Dumpkiller NSE7\_SSE\_AD-25 Exam PDF dumps and practice test software. All types of Fortinet NSE7\_SSE\_AD-25 Exam Questions formats are available at the affordable price.
