UiPath Certified Professional Automation Business Analyst Professional v1.0 Sample Questions (Q65-Q70):

NEW QUESTION # 65

What is an example of a relevant process stakeholder input necessary for the business analysis phase?

- A. Create a potential cost savings graph of the business process or requirement
- B. Provide a full list of applications used by the process**
- C. Offer process solution design workflows
- D. Organize testing phase meetings

Answer: B

Explanation:

In the business analysis phase, it's vital to understand all components that make up the process, including the software applications involved. A comprehensive list of these applications enables a thorough evaluation of the process's digital environment, helping to tailor the automation solution more accurately.

NEW QUESTION # 66

When deciding the priority of processes from a pipeline, what is the order in which the development should be done?

Instructions: Drag and Drop the items on the left to the boxes on the right in a correct order

Answer:

Explanation:

NEW QUESTION # 67

What is the primary goal of task analysis in the context of evaluating automation potential?

- A. To determine the level of expertise required to perform the task
- B. To measure the time spent on a specific task or process
- C. To identify potential bottlenecks or areas for improvement
- D. **To visualize and analyze the steps involved in a task**

Answer: D

Explanation:

The primary goal of task analysis in the context of evaluating automation potential is to visualize and analyze the steps involved in a task. This involves collecting data on how employees perform their tasks, identifying patterns, and analyzing which parts of the process can be automated. Task analysis helps in understanding the workflow in detail, which is crucial for discovering automation opportunities and designing effective automation solutions¹.

References: The concept of task analysis and its role in identifying automation potential is discussed in the UiPath Documentation Portal, particularly in the section "Task Mining - Introduction" found at

<https://docs.uipath.com/task-mining/automation-suite/2021.10/user-guide/introduction1>.

NEW QUESTION # 68

Who is responsible for preparing the test data?

- A. The SME with the development team
- B. The process owner with the Business Analyst
- C. **The SME with the Business Analyst**
- D. The process owner with the IT team or system owners

Answer: C

Explanation:

In the context of RPA (Robotic Process Automation), preparing the test data is a collaborative effort that typically involves the Subject Matter Expert (SME) and the Business Analyst. The SME provides the domain knowledge and understanding of the process, while the Business Analyst has the technical know-how and understanding of the RPA tools and capabilities. Together, they ensure that the test data is representative of the actual data that the RPA solution will handle, which is crucial for effective testing and validation of the automated workflows¹.

References: The role of the SME and Business Analyst in preparing test data is outlined in the UiPath Documentation Portal, specifically in the section "Data-Driven Testing" found at

<https://docs.uipath.com/studio/standalone/2023.10/user-guide/data-driven-testing1>.

NEW QUESTION # 69

Who should be involved in the UAT phase?

- A. Process Owner, RPA Developer, Business Analyst and Support Team
- B. RPA Developer, Solution Architect, and Client Business Team
- C. **Business Analyst, Process Owner, and Subject Matter Expert**
- D. Support Team, Solution Architect, Business Analyst and Process Owner

Answer: C

Explanation:

During the User Acceptance Testing (UAT) phase, the individuals who should be involved include the Business Analyst, Process Owner, and Subject Matter Expert. This group ensures that the automation meets business requirements, is technically accurate, and adheres to operational needs, which are critical for validating the solution before full deployment.
