

Reliable CDCS-001 Exam Tutorial & CDCS-001 Latest Test Simulator

Newest CDCS-001 Reliable Test Vce & Leading Offer in Qualification Exams & Unparalleled CDCS-001: Certified Data Centre Specialist (CDCS)

ExamBoosts is a website specifically provide the certification exam information sources for GAQM professionals. Through many reflects from people who have purchase ExamBoosts's products, ExamBoosts is proved to be the best website to provide the source of information about [CDCS-001 Certification Exam](#). The product of CDCS-001 is a very reliable training tool for you. The answers of the exam exercises provided by ExamBoosts is very accurate. Our ExamBoosts's senior experts are continuing to enhance the quality of our training materials.

The CDCS-001 exam covers a wide range of topics related to data center management, including power and cooling, networking, storage, virtualization, security, and disaster recovery. CDCS-001 exam consists of 100 multiple-choice questions and must be completed within 120 minutes. The passing score for the exam is 70%, and candidates who pass the exam receive a certificate that is valid for three years.

GAQM Certified Data Centre Specialist (CDCS) Sample Questions (Q20-Q25):

NEW QUESTION # 20

For which one of these processes is Direct Current essential, and will not work with alternating current?

- A. Heating
- B. Electrolysis
- C. Lighting
- D. Turning a motor

Answer: B

Explanation:
Explanation:

Direct Current (DC) is essential for the process of electrolysis. Electrolysis is the process of breaking down a compound using an electric current. The electric current causes ions to move, which results in a chemical reaction that breaks down the compound. In order for electrolysis to work, a direct current is required, as the ions must flow in one direction. Alternating Current (AC) changes direction and would not provide a consistent flow of ions.

Heating, lighting, and turning a motor can be done by either DC or AC. Heating can be done by passing an electric current through a heating element, which can be powered by either DC or AC. Lighting can be done by passing an electric current through a light bulb, which can be powered by either DC or AC. A motor can be powered by either DC or AC, but the type of motor and the application will determine which type of current is more suitable.

NEW QUESTION # 21

Which one of the following uses sensors such as laser beams or touch sensor?

- A. CCTV

P.S. Free 2026 GAQM CDCS-001 dumps are available on Google Drive shared by TestkingPass: <https://drive.google.com/open?id=1f-grMckDUiLChwiw7JL6PxOJdMqAB3OA>

Our Certified Data Centre Specialist (CDCS) (CDCS-001) PDF file is portable which means customers can carry this real questions document to any place. You just need smartphones, or laptops, to access this Certified Data Centre Specialist (CDCS) (CDCS-001) PDF format. These Certified Data Centre Specialist (CDCS) (CDCS-001) questions PDFs are also printable. So candidates who prefer to study in the old way which is paper study can print Certified Data Centre Specialist (CDCS) (CDCS-001) questions PDF as well.

The CDCS-001 exam consists of 100 multiple-choice questions that are designed to test your knowledge and understanding of data center operations and management. CDCS-001 exam is administered by the Global Association for Quality Management (GAQM), an international organization that provides professional certification programs in various fields of IT and management. CDCS-001 exam is available in multiple languages and can be taken online or in person at a GAQM testing center.

To earn the CDCS certification, candidates need to pass a 2-hour exam that consists of 100 multiple-choice questions. CDCS-001 Exam is conducted in both offline and online formats, and the passing score is 70%. Certified Data Centre Specialist (CDCS) certification is valid for three years, and candidates need to renew their certification through continuing education.

CDCS-001 Latest Test Simulator | CDCS-001 Exam Book

In order to meet the needs of all customers, our company employed a lot of leading experts and professors in the field. These experts and professors have designed our CDCS-001 exam questions with a high quality for our customers. We can promise that our CDCS-001 Study Guide will be suitable for all people, including students and workers and so on. You can use our CDCS-001 practice materials whichever level you are in right now.

Achieving the CDCS certification demonstrates a candidate's commitment to excellence in data centre operations and management. It also enhances their career prospects and enables them to take on more challenging roles in the industry. Employers also benefit from having certified CDCS professionals on their team, as they can ensure the efficient and effective operation of their data centres.

GAQM Certified Data Centre Specialist (CDCS) Sample Questions (Q46-Q51):

NEW QUESTION # 46

Which component is designed to protect electrical equipment from damage caused by overload or short circuit?

- A. Transfer Switch
- B. Stabiliser
- C. Transient
- D. Circuit Breaker

Answer: D

Explanation:

A circuit breaker is a device designed to protect electrical equipment from damage caused by overload or short circuit. Circuit breakers are designed to detect when too much current is flowing through a circuit and to shut the circuit off when that happens. This protects the equipment from damage due to overloading or short circuiting, and it also helps prevent fires and other accidents.

NEW QUESTION # 47

Which component is designed to protect electrical equipment from damage caused by overload or short circuit?

- A. Transfer Switch
- B. Stabiliser
- C. Transient
- D. Circuit Breaker

Answer: D

Explanation:

Explanation

A circuit breaker is a device designed to protect electrical equipment from damage caused by overload or short circuit. Circuit breakers are designed to detect when too much current is flowing through a circuit and to shut the circuit off when that happens. This protects the equipment from damage due to overloading or short circuiting, and it also helps prevent fires and other accidents.

NEW QUESTION # 48

Which one of the following is an advantage of Air Cooled Self-Contained System?

- A. It doesn't require ductwork and/or dropped ceiling
- B. All components contain more than one unit
- C. It has more heat removal capacity per unit
- D. Lowest installation cost

Answer: A

Explanation:

Air cooled self-contained systems are highly efficient and do not require ductwork and/or dropped ceiling for installation. This makes them a great choice for locations where installation costs are a major factor, such as in residential applications, or in places with limited space. Additionally, air cooled self-contained systems have more heat removal capacity per unit compared to water cooled

systems, making them more cost-effective in the long run.

NEW QUESTION # 49

Which one of the following is an advantage of using Natural Gas?

- A. Maximum carbon build up
- B. Tends to cost more
- C. Minimum carbon build up
- D. More exhaust able

Answer: C

Explanation:

The main advantage of using natural gas is that it tends to produce fewer carbon emissions than other fossil fuels, such as coal or oil. Natural gas combustion produces less carbon dioxide and other pollutants than other fuels, making it a cleaner and more renewable source of energy. Additionally, natural gas costs less than other fuels, making it a more cost-effective option.

NEW QUESTION # 50

Which one of the following is a disadvantage of Water Cooled System?

- A. Condenser water piping loops long distances
- B. Usage of the building's condenser water is less expensive than chilled water
- C. Introduces an additional source of liquid
- D. All components are located inside the CRAC

Answer: C

Explanation:

Explanation

Water cooled systems introduce an additional source of liquid, which can be a potential source of contamination and damage to the IT equipment. Additionally, water cooled systems require more maintenance than air cooled systems and are more expensive to install due to the additional cost of the cooling tower, piping, and pumps.
