Actual C-C4H56-2411 Test Pdf - C-C4H56-2411 Reliable Braindumps Free

You can study C-C4H56-2411 exam engine anytime and anyplace for the convenience our three versions of our C-C4H56-2411 study questions bring. What is more, it is our mission to help you pass the exam. Our study materials will provide you with 100%

assurance of passing the professional qualification C-C4H56-2411 Exam. We are very confident in the quality of C-C4H56-2411 guide dumps. Our pass rate is high as 98% to 100%. You can totally rely on us.

SAP C-C4H56-2411 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Personalization and Extensibility: This part assesses the expertise of a Solution Customization Expert and involves managing personalization, extension fields, validations, and determinations. It looks at how users can tailor and extend the system to meet specific business needs.
Topic 2	<ul style="list-style-type: none">Cases: This domain measures the skills of a Business Process Analyst and focuses on the configuration of document types, party roles, status schemas, and business flows. It evaluates the understanding of case management and process structuring within the system.
Topic 3	<ul style="list-style-type: none">Scenario Based Questions: This section evaluates the problem-solving abilities of a Solution Consultant and presents questions based on fictional scenarios to test comprehensive knowledge of SAP Service Cloud Version 2 in real-world contexts.
Topic 4	<ul style="list-style-type: none">Master Data: This part evaluates the knowledge of a Data Management Specialist and focuses on setting up master data within the system. It includes configuring essential entities such as Account, Contact, Product, Organization, and employees to support business operations. User Management: This domain tests the abilities of an Access Control Manager and involves managing the creation of users and business roles, including assigning the appropriate authorizations. It ensures the secure and efficient administration of user access within the platform.
Topic 5	<ul style="list-style-type: none">Basic Setup This section of the exam measures the skills of a System Administrator and covers the initial configuration steps required to set up the SAP Service Cloud Version 2 system for the first time. It assesses the ability to perform foundational setup tasks to ensure the system is ready for use.
Topic 6	<ul style="list-style-type: none">Service Objects: This section targets the proficiency of a Service Operations Specialist and covers the setup of service objects like Registered Products, Installed Base, and Warranty. It looks at how these elements are configured to support service management processes.
Topic 7	<ul style="list-style-type: none">Communication Channels: This section is intended for a Communication Solutions Specialist and covers the configuration of the Agent Desktop for Computer Telephony Integration (CTI) and Interaction Center processes. It also includes setting up the email communication channel for inbound and outbound scenarios.

SAP Certified Associate - Implementation Consultant - SAP Service Cloud Version 2 Sample Questions (Q59-Q64):

NEW QUESTION # 59

How can you adapt the status schema of a case type? Note: There are 2 correct answers to this question.

- A. The status schema cannot be adapted.
- B. Use code list restrictions.
- C. Add or remove statuses in the existing status schema.
- D. Change the existing status schema.

Answer: C,D

Explanation:

In SAP Service Cloud V2, the status schema of a case type can be adapted by changing the existing status schema to modify the sequence or behavior of statuses. Administrators can also add or remove statuses in the existing status schema to tailor the case lifecycle to business needs. According to SAP documentation, "The status schema of a case type can be adapted by modifying the existing schema or adding/removing statuses as required." The status schema cannot be adapted (A) is incorrect, as adaptations are supported. Code list restrictions (D) limit dropdown values, not status schema changes.

SAP Help Portal: Case Type Configuration in SAP Service Cloud V2

NEW QUESTION # 60

Which objects can you configure for registered products?

- A. Warranty Type
- B. Custom Party Roles
- C. Functional Location Source
- D. Installed Base Types

Answer: A

Explanation:

In SAP Service Cloud V2, Warranty Type is a configurable object for registered products, allowing administrators to define warranty details such as duration and coverage, which are then associated with registered products. According to SAP documentation, "Warranty types can be configured and assigned to registered products to manage service entitlements." Installed Base Types (A) are configured for installed bases, not registered products directly. Functional Location Source (C) is relevant in SAP S/4HANA, not Service Cloud V2. Custom Party Roles (D) are used for case routing or relationships, not registered product configuration.

SAP Community: Product Configuration in SAP Service Cloud

NEW QUESTION # 61

Which of the following features can be used to tailor the user interface for the business? Note: There are 2 correct answers to this question.

- A. Business role
- B. Homepage branding
- C. Language adaptation
- D. Content security policy

Answer: B,C

Explanation:

To tailor the user interface in SAP Service Cloud V2, Homepage branding allows administrators to customize the look and feel of the homepage, including logos and color schemes, to align with corporate branding. Language adaptation enables the modification of field labels and texts to support different languages or business-specific terminology. According to SAP documentation, "Homepage branding and language adaptation are key features for customizing the user interface to meet business needs." Business role (B) controls access and permissions, not UI customization. Content security policy (C) is a security feature, not related to UI tailoring.

SAP Learning: UI Adaptation and Branding

NEW QUESTION # 62

Service agents working on a specific case type in SAP Service Cloud Version 2 need to access and perform defined actions in an external solution. What steps must an administrator perform to make this possible? Note: There are 3 correct answers to this question.

- A. Create a mashup to embed the web page of the external solution.
- B. Develop a custom business object.
- C. Include a dedicated step pointing to the mashup in one of the phases of the case type.
- D. Use the web page URL of the external solution for extracting input parameters in the mashup.
- E. Define a custom screen for the mashup.

Answer: A,C,D

Explanation:

To enable service agents to access and perform actions in an external solution for a specific case type, administrators must create a mashup to embed the web page of the external solution to integrate it into the Agent Desktop. They should use the web page URL of the external solution for extracting input parameters in the mashup to pass case-specific data. Additionally, including a dedicated step pointing to the mashup in one of the phases of the case type ensures agents can access the external solution during case processing. According to SAP documentation, "Creating a mashup, configuring its URL parameters, and integrating it into the case type via a dedicated step are required for external solution access." Developing a custom business object (A) is unnecessary for this scenario. Defining a custom screen for the mashup (D) is not a standard requirement.

Reference:

SAP Help Portal: Mashup Configuration in SAP Service Cloud V2

SAP Community: External Solution Integration

NEW QUESTION # 63

Which of the following objects can be displayed in the Entities facet of the Customer Hub screen? Note: There are 2 correct answers to this question.

- A. Registered products
- B. Maintenance plan
- C. Service orders
- D. Cases

Answer: A,D
