# Oracle 1Z0-1055-25 Test Dump | Reliable 1Z0-1055-25 Braindumps Sheet

Actual4Exams 1Z0-1055-25 practice test has real 1Z0-1055-25 exam questions. You can change the difficulty of these questions, which will help you determine what areas appertain to more study before taking your Oracle Fusion Cloud Financials: Payables and Expenses 2025 Implementation Professional (1Z0-1055-25) exam dumps. Here we listed some of the most important benefits you can get from using our Oracle Fusion Cloud Financials: Payables and Expenses 2025 Implementation Professional (1Z0-1055-25) practice questions.

## Oracle 1Z0-1055-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Implementing Expenses: This section of the exam measures skills of Expense Management Administrators and focuses on managing and configuring employee expense processes. It includes expense report processing, approval rules, and audit policies. Candidates must understand system configurations for templates, corporate card programs, conversion rate policies, travel integration, and AI-driven automation in expense management.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Setting up Common Configurations in the Supplier Invoice to Payments Process This section of the exam measures skills of Accounts Payable Analysts and focuses on understanding the core setup required for supplier invoicing and payment processes. It covers the Enterprise Structure, Financial Reporting Structure, and Data Security model. Candidates must know the purpose of Business Units and Reference Sets and be able to manage Supplier and Bank Account Master Data effectively.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Implementing Supplier Invoices: This section of the exam measures skills of Financial Systems Specialists and covers the setup and processing of supplier invoices. It focuses on understanding supplier invoice processing, AI-assisted automation, and key configurations such as invoice options, distribution sets, tolerances, holds, approvals, and release procedures. Candidates also learn how to manage business rules for invoice validation and processing efficiency.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>Implementing Payments: This section of the exam measures skills of Payments Configuration Specialists and focuses on the payment lifecycle in the Oracle Fusion Payables module. It includes understanding the supplier payment process, AI role in automation, and the configuration of payment options, methods, disbursement choices, and process profiles. The section also involves managing approval workflows and payment process templates for secure and accurate disbursement management.</li></ul>
Topic 5	<ul style="list-style-type: none"><li>Implementing Accounts Payable Balances: This section of the exam measures skills of Finance Operations Managers and covers Accounts Payable (AP) reporting, analysis, and period closing activities. It explains AP balance configurations, calendar management, and reconciliation with the General Ledger. Candidates must understand the setup of aging periods, payables calendars, and best practices for ensuring accurate financial close processes.</li></ul>

## Oracle Fusion Cloud Financials: Payables and Expenses 2025 Implementation Professional Sample Questions (Q22-Q27):

### NEW QUESTION # 22

You participated as a functional consultant in the implementation of Oracle Procurement as well as Payables for customer ABC Consulting. A Payables Analyst has logged a ticket stating that the "Create Supplier" task is not showing up in the Supplier work area.

a. You checked the related settings and found that the Payables Analyst user account has been defined as a Procurement Agent. Why was the Payables Analyst NOT able to see the "Create Supplier" task in the Supplier work area?

- A. The analyst was not given the Supplier Manager role.
- B. The analyst was not given the Procurement Administrator role.
- C. The analyst was not given the Supplier Administrator role.
- D. The analyst was not given the Procurement Requester role.

Answer: A

Explanation:

### Comprehensive and Detailed In-Depth

In Oracle Fusion Applications, access to specific tasks and functionalities is governed by the roles assigned to a user. The "Create Supplier" task within the Supplier work area is a critical function that allows authorized users to add new suppliers to the system. To access this task, a user must possess the appropriate roles that grant the necessary permissions.

A . The analyst was not given the Procurement Administrator role.

The Procurement Administrator role encompasses a broad range of procurement-related activities, including configuration and oversight functions. However, the ability to create suppliers is not inherently included within this role's permissions. Therefore, assigning the Procurement Administrator role alone would not grant access to the "Create Supplier" task.

B . The analyst was not given the Supplier Manager role.

The Supplier Manager role is specifically designed to manage supplier-related activities, including the creation and maintenance of supplier records. Assigning this role to a user provides them with the necessary permissions to access the "Create Supplier" task within the Supplier work area. In the scenario described, the absence of the Supplier Manager role is the reason the Payables Analyst cannot see the "Create Supplier" task. This is corroborated by Oracle's documentation, which states that users require the Supplier Manager role to create suppliers.

support.oracle.com

C . The analyst was not given the Supplier Administrator role.

While the Supplier Administrator role grants access to certain supplier-related functions, it does not include the permissions necessary to create new suppliers. Users with only the Supplier Administrator role may have visibility into supplier information but lack the capability to add new supplier records. Therefore, the absence of this role is not the cause of the issue.

D . The analyst was not given the Procurement Requester role.

The Procurement Requester role is intended for users who initiate purchase requisitions and related procurement activities. This role does not encompass supplier creation capabilities. Assigning the Procurement Requester role would not grant access to the "Create Supplier" task, and its absence is not related to the issue at hand.

In summary, to enable the Payables Analyst to access the "Create Supplier" task, the Supplier Manager role must be assigned to their user account. This role provides the necessary permissions to create and manage supplier records within the Oracle Fusion Applications.

### NEW QUESTION # 23

You implemented the service provider model for Payables payments, where your United Kingdom (UK) headquarters works solely as an outsourced payment processing unit on behalf of your other UK business units.

What is this type of payment service provider model known as?

- A. Procurement
- **B. Dedicated**
- C. Self-Service
- D. Dedicated and Self-Service

**Answer: B**

### NEW QUESTION # 24

Previously, cash advances were applied automatically to expenses when the auditor ran the expense reimbursement process. Now, Oracle Expenses allows employees to have the ability to manually apply their cash advances to the relevant expense report. As an Application Implementation Consultant, you advise your client to enable this feature and allow employees to perform manual application of cash advances to their expense reports for the US Business Unit.

Which statement is NOT true about this feature?

- A. Unused cash advance amounts are applied to the next expense report or refunded to the company by the employee.
- **B. Auditors can make changes to cash advances that are applied to an expense report.**
- C. Employees need to include a justification if they don't apply an available cash advance when submitting an expense report.
- D. If approvers or auditors reject expense reports, the cash advances that are applied to the reports are automatically removed and returned to the employee's available cash advances.

**Answer: B**

### NEW QUESTION # 25

You are trying to use the Match in Full option for a purchase order, but your search for the PO is returning no results.

Which two are the reasons for this?

- A. The match approval level is set to 3-way matching
- B. The match approval level is set to 4-way matching
- C. The Supplier or Purchase Order is set up for self-billing
- D. The Purchase Order is already partially matched to an invoice

**Answer: C,D**

Explanation:

Comprehensive and Detailed In-Depth

In Oracle Financials Cloud, the Match in Full feature allows users to create invoices by matching the full amount of a purchase order (PO) efficiently. However, certain conditions can prevent a PO from appearing in the Match in Full search results.

Analysis of Each Option:

A . The match approval level is set to 4-way matching

The match approval level determines the matching requirements between the PO, receipt, inspection, and invoice. A 4-way matching requires that the PO, receipt, accepted quantities from inspection, and invoice quantities all match within defined tolerances before payment approval. This setting, however, does not impact the availability of the PO in the Match in Full search results. Therefore, a 4-way matching configuration is not a reason for the PO not appearing in the search results.

B . The Supplier or Purchase Order is set up for self-billing

Self-billing arrangements mean that the buyer generates the invoice on behalf of the supplier. In such scenarios, the Match in Full feature is not applicable because the invoicing process is handled differently. As per Oracle documentation, "Match in Full can't be used in the following circumstances:... A supplier or the purchase order is set up for self-billing." docs.oracle.com Therefore, if the supplier or PO is configured for self-billing, the PO will not appear in the Match in Full search results.

C . The match approval level is set to 3-way matching

Similar to 4-way matching, a 3-way matching requires that the PO, receipt, and invoice quantities match within tolerances before payment approval. This setting ensures that the goods received and invoiced align with the PO terms. However, the match approval level, whether 3-way or 4-way, does not affect the PO's availability in the Match in Full search results. Thus, a 3-way matching configuration is not a reason for the PO not appearing in the search results.

D . The Purchase Order is already partially matched to an invoice

The Match in Full feature is designed for situations where the supplier sends an invoice for the full amount of the PO. If a PO has already been partially matched to an invoice, it indicates that some portions of the PO have been invoiced, and the remaining amounts do not represent the full PO value. According to Oracle documentation, "Match in Full can't be used in the following circumstances:... The purchase order has already been partially matched to an invoice." docs.oracle.com Therefore, a PO that has been partially matched will not appear in the Match in Full search results.

Conclusion:

The two reasons preventing the purchase order from appearing in the Match in Full search results are:

B . The Supplier or Purchase Order is set up for self-billing

D . The Purchase Order is already partially matched to an invoice

These conditions make the Match in Full feature inapplicable, thereby excluding the PO from the search results.

## NEW QUESTION # 26

You are an Expenses Manager at a large company and need to address complaints from your corporate card provider about delayed transaction payments incurred by former employees who are now inactive. To ensure timely and efficient processing of valid business charges posted to an inactive employee's corporate credit card, you can run the following two processes: Upload Corporate Card Transactions and Process Corporate Card Transactions for Inactive Employees.

Which two are capabilities included in these processes?

- A. Individual Pay Liability
- B. Outstanding Cash Advances
- C. Employee Termination Date
- D. Grace Period

**Answer: C,D**

Explanation:

Comprehensive and Detailed In-Depth

In Oracle Financials Cloud, managing corporate card transactions for inactive employees is crucial to maintain timely payments and avoid disputes with card providers. The processes Upload Corporate Card Transactions and Process Corporate Card Transactions for Inactive Employees are designed to handle such scenarios effectively.

Key Capabilities of These Processes:

Employee Termination Date (Option A):

Role in Processing: The system identifies inactive employees based on their termination or inactive status. When the Process Corporate Card Transactions for Inactive Employees process is executed, it scans for employees whose status has changed to inactive (e.g., due to termination or unpaid leave) and identifies any outstanding corporate card transactions associated with them.  
Reference:

Grace Period (Option D):

Role in Processing: A grace period can be configured to allow the system to process transactions that are posted after an employee's termination date. This ensures that any legitimate business expenses incurred shortly before termination are not overlooked. The default grace period is set to 0 days but can be adjusted as needed.

Configuration Path: To modify the grace period, navigate to the Manage Expenses System Options page:

In the Setup and Maintenance work area, select:

Offering: Financials

Functional Area: Expenses

Task: Manage Expenses System Options

Options Not Included:

Outstanding Cash Advances (Option B):

This pertains to any cash amounts advanced to employees that have not yet been reconciled. The processes in question focus on corporate card transactions and do not directly address outstanding cash advances.

Individual Pay Liability (Option C):

This refers to scenarios where employees are responsible for paying their corporate card bills directly (Individual Pay). The processes mentioned are designed to handle transactions for inactive employees, regardless of the payment liability setup (Individual Pay, Company Pay, or Both Pay).

By utilizing these processes and configuring the grace period appropriately, companies can ensure that all valid business expenses incurred by inactive employees are processed efficiently, thereby maintaining good standing with corporate card providers and ensuring accurate financial reporting.

How Corporate Card Transactions for Inactive Employees Are Processed

## NEW QUESTION # 27

.....

If you purchase our study materials to prepare the 1Z0-1055-25 Exam, your passing rate will be much higher than others. Also, the operation of our study material is smooth and flexible and the system is stable and powerful. You can install the 1Z0-1055-25 exam guide on your computers, mobile phone and other electronic devices. There are no restrictions to the number equipment you install. In short, it depends on your own choice. We sincerely hope that you can enjoy the good service of our products.
